I was recently made aware that my name appears in the Final Environmental Impact Report and that my responses to this questionnaire were submitted by the City of Torrance as an official public comment on the Draft Environmental Impact Report. This was never made clear to me at the time. I did not knowingly submit a public comment to Metro, nor was I informed that my responses would be used in this way or attributed to me in an official environmental document.

I believe this is deeply misleading. Residents should be clearly informed when their input is being submitted as formal public comment on a state-level environmental review, especially when the material provided to them is framed in a way that appears designed to steer responses.

I wanted to bring this to the Board's attention so you are aware that some comments attributed to residents may not reflect informed, intentional participation in the environmental review process.

Thank you for your time and for considering this concern.

Agenda Item 10: FOR
Agenda Item 11: FOR

Dear Metro Board of Directors,

As a UCLA student, I strongly urge the Metro Board to proceed with Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor.

I am FOR Agenda Item 10: Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor. This heavy rail option will best serve UCLA students and residents of the San Fernando Valley and West LA!

I support the determination by Metro staff that Modified Alternative 5 is the best alternative to serve the needs of this Corridor. It includes (1) a direct stop at UCLA Gateway Plaza, (2) direct connections to other Metro lines, (3) stations placed where students and residents will go, and (4) frequent trains with low headways. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that we can benefit from this Line as soon as possible.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for Los Angeles.

Agenda Item 10: FOR
Agenda Item 11: FOR

Dear Metro Board of Directors,

As an Angeleno and former westside resident, I strongly urge the Metro Board to proceed with Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor.

I am FOR Agenda Item 10: Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor. This heavy rail option will serve the greater LA area, tourism, and residents of the San Fernando Valley and West LA.

I support the determination by Metro staff that Modified Alternative 5 is the best alternative to serve the needs of this Corridor. It includes (1) a direct stop at UCLA Gateway Plaza, (2) direct connections to other Metro lines, (3) stations placed where students, commuters, and tourists will go, and (4) frequent trains with low headways. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that all of Los Angeles can benefit from this Line as soon as possible.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for the West side and beyond.

Agenda Item 10: FOR
Agenda Item 11: FOR

Dear Metro Board of Directors,

As a UCLA student, I strongly urge the Metro Board to proceed with Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor.

I am FOR Agenda Item 10: Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor. This heavy rail option will best serve UCLA students and residents of the San Fernando Valley and West LA!

I support the determination by Metro staff that Modified Alternative 5 is the best alternative to serve the needs of this Corridor. It includes (1) a direct stop at UCLA Gateway Plaza, (2) direct connections to other Metro lines, (3) stations placed where students will go, and (4) frequent trains with low headways. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that students at UCLA can benefit from this Line as soon as possible.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. As more students commute to campus, and as UCLA expands to the South Bay, everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for UCLA and beyond.

As a UCLA student public transport is very limited and there are not a lot of fun activities to do in Westwood it would be nice to not have to drive everywhere as parking is a nightmare. The future students of UCLA deserve a good transport system and more options to explore the city outside of having a car.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for Los Angeles.

Agenda Item 10: FOR
Agenda Item 11: FOR

Dear Metro Board of Directors,

As a UCLA student, I strongly urge the Metro Board to proceed with Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor.

I am FOR Agenda Item 10: Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor. This heavy rail option will best serve UCLA students and residents of the San Fernando Valley and West LA!

I support the determination by Metro staff that Modified Alternative 5 is the best alternative to serve the needs of this Corridor. It includes (1) a direct stop at UCLA Gateway Plaza, (2) direct connections to other Metro lines, (3) stations placed where students will go, and (4) frequent trains with low headways. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that students at UCLA can benefit from this Line as soon as possible.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. As more students commute to campus, and as UCLA expands to the South Bay, everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for UCLA and beyond.

I would love if there was an easier way to get to LAX from UCLA which is why I'm in support of this project. Going to the airport is incredibly expensive if you are in a rush and I would love if there was a reliable, efficient, and accessible way to travel within LA. It's time for LA to catch up to the Bay Area and have a better more efficient Metro system!!!

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that we can benefit from this Line as soon as possible.

I'm from Ventura County, so I either take the train or drive to school. Whether on the 761 bus from the Van Nuys station or on the 405 freeway itself, my life has been dominated by the congested Sepulveda Pass. The Sepulveda Line would change the lives of anyone remotely like me. A reliable, consistent option that will end up being the fastest travel route by a landslide during rush hours. The 405 Freeway frequently goes viral for the congestion it accumulates; it's frankly embarrassing that LA does not have any viable transit option to bypass such a heavily trafficked road, especially since Sepulveda Blvd will not be getting bus-only lanes anytime soon. If you care about your constituents, if you care about actually providing a robust transit network to one of the biggest employers in Los Angeles, the Sepulveda Line Modified Alternative 5 would be no question.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

We all know the dreaded traffic on the Sepulveda pass and it's about time we really consider an underground heavy rail solution for this issue that's plagued LA for ages. Living near the Yellow line, this would expand my transit options by so much, and I'm already thankful for the ability to take the train to work downtown.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

I am FOR Agenda Item 10: Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor. This heavy rail option will best serve UCLA students and residents of the San Fernando Valley and West LA!

I support the determination by Metro staff that Modified Alternative 5 is the best alternative to serve the needs of this Corridor. It includes (1) a direct stop at UCLA Gateway Plaza, (2) direct connections to other Metro lines, (3) stations placed where students will go, and (4) frequent trains with low headways. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that students at UCLA can benefit from this Line as soon as possible.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. As more students commute to campus, and as UCLA expands to the South Bay, everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for UCLA and beyond.

Agenda Item 10: FOR
Agenda Item 11: FOR

Dear Metro Board of Directors,

As a current UCLA student, I urge the Metro Board to proceed with Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor. Having worked in real estate in Bel Air, and having seen the respective arguments for and against the metro, I staunchly side with the people FOR agenda items 10 and 11. We cannot let corporate greed and an already difficult real estate market interfere with the needs of our working class civilians and students.

I am FOR Agenda Item 10: Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor. This heavy rail option will best serve UCLA students and residents of the San Fernando Valley and West LA!

I support the determination by Metro staff that Modified Alternative 5 is the best alternative to serve the needs of this Corridor. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that we can benefit from this Line as soon as possible.

I attended UCLA way back in the '90s and the idea of commuting seemed unthinkable. A few years after graduation, I moved to Van Nuys. It's mind boggling how easy it would be to commute from the Valley to school if this subway gets built. Not to mention having an easy route to LAX, which was another challenge as a student in the 90s. This route will be such a boon for LA residents.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for Los Angeles.

Agenda Item 10: FOR
Agenda Item 11: FOR

Dear Metro Board of Directors,

As a UCLA graduate, I strongly urge the Metro Board to proceed with Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor.

I am FOR Agenda Item 10: Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor. This heavy rail option will best serve UCLA students and residents of the San Fernando Valley and West LA!

I support the determination by Metro staff that Modified Alternative 5 is the best alternative to serve the needs of this Corridor. It includes (1) a direct stop at UCLA Gateway Plaza, (2) direct connections to other Metro lines, (3) stations placed where students and residents will go, and (4) frequent trains with low headways. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that we can benefit from this Line as soon as possible.

While I am no longer a student at UCLA, I commute regularly from the San Fernando Valley to West Los Angeles, and having a rail option will significantly improve the quality of living for hundreds of thousands of individuals who live and work across LA. When I was a student in 2017, I found myself in a car totaling accident during rush hour commuting back home in Sherman Oaks from the Westwood campus. I strongly believe that a rail option will not only decrease commute times by preventing further traffic-causing accidents, but also improve public safety while stimulating economic growth for businesses in the area.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for Los Angeles.

It includes (1) a direct stop at UCLA Gateway Plaza, (2) direct connections to other Metro lines, (3) stations placed where students will go, and (4) frequent trains with low headways. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that students at UCLA can benefit from this Line as soon as possible.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. As more students commute to campus, and as UCLA expands to the South Bay, everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for UCLA and beyond.

Agenda Item 10: FOR
Agenda Item 11: FOR

Dear Metro Board of Directors,

As a resident of the Valley and UCLA community member, I strongly urge the Metro Board to proceed with Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor.

I am FOR Agenda Item 10: Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor. This heavy rail option will best serve the residents of the San Fernando Valley and West LA!

I support the determination by Metro staff that Modified Alternative 5 is the best alternative to serve the needs of this Corridor. It includes (1) a direct stop at UCLA Gateway Plaza, (2) direct connections to other Metro lines, (3) stations placed where students and residents will go, and (4) frequent trains with low headways. I hope that Metro can expedite the environmental review of the Sepulveda Line to speed up construction, reduce costs, and ensure that we can benefit from this Line as soon as possible.

I wake up at 5am to beat the 405 traffic and then sleep in my car until 9am meetings.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

Thank you for voting to transform public transportation for Los Angeles.

Los Angeles has all the potential to be a transit city. This is what the original founders of the city had in mind. A getaway that starkly contrasted from the congestion of the east coast cities. This proposal moves us further towards this vision so that we can make this city more accessible for everyone.

I am also FOR Agenda Item 11: the South Bay extension for the K Line should follow the existing Metro Right of Way. Everyone will greatly benefit from a fully connected, comprehensive rail network that ONLY the ROW option can deliver quickly and cost effectively.

To the Metro Board of Directors,

I am a homeowner in the City of Lawndale and am one of the residents that will be affected by the proposed C Line Extension. While the Hybrid alignment is referred to as the Locally-Preferred Alternative (LPA), I have not spoken to any locals who prefer this alignment. The existing freight line tracks along the Metro Right of Way (ROW) are already less than 50 feet from homes, living rooms and bedrooms. Adding additional rail lines will move tracks even closer to private homes. I do not know anyone that wishes to have rail lines within two car-lengths of their bedrooms. I am not sure that the increase in noise and decrease in safety is a benefit in quality of life for those that live in close proximity to the rail tracks.

If it is the desire of the Board to create alternative transportation options and increase ridership on those alternatives, Metro's own reports show a proposed increase of 5,000 new daily riders on a line that runs through neighborhoods, while the line that runs down a busy thoroughfare shows a proposed increase of 5,500 new daily riders. The Hawthorne Boulevard option adds an additional 182,500 riders per year. Per Metro's reports, for long-term viability, the Hawthorne Boulevard option is clearly the better choice.

Please DO NOT CERTIFY the Final Environmental Impact Report (EIR) and DO NOT approve the project along the Metro Right of Way (ROW) green belt in Lawndale. Alternatively, please approve the Hawthorne Boulevard Option and route the C Line Extension along the Hawthorne Boulevard route. This route runs in the middle of eight (8) lanes of automobile traffic, which is a far lesser environmental impact than close to bedrooms and living rooms. Up until the late 1950s, the Pacific Electric Railway Company had an electric car rail line along the same route, running their Red Cars.

Regards, Brent Gesch

Good morning,

I would like to express my support for Item 10, specifically selecting Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor Project. Choosing this alternative will have numerous benefits for the entire L.A. region, and I urge the Board to prioritize the best alternative for one of the most important transportation projects in recent history. Alternative 5 will ensure fast, frequent, reliable transit connecting the Westside and Valley, with automated trains and better connections to the Metro G line, Metro ESFV Project, as well as Metrolink and the Pacific Surfliner.

Additionally, I would like to express my support for the approval of the Hybrid Alignment LPA for Item 11. I urge the board to reject Motion 11.1 by Director Mitchell to advance the Hawthorne Alignment. The Hawthorne alignment is far more expensive, and does not utilize the existing Right-Of-Way that Metro already owns. Selecting the Hybrid Alignment will ensure the South Bay gets the transit it deserves, utilizing existing freight corridors while using state-of-the-art safety technologies. Selecting the Hawthorne Alignment will lead to a large budget deficit and further delay the project with billions of missing funding. Therefore, I urge the Board to approve the Hybrid Alignment and advance the C/K Line Southern Extension.

Thank you for the opportunity to comment.

Good morning,

I would like to express my support for Item 10, specifically selecting Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor Project. Choosing this alternative will have numerous benefits for the entire L.A. region, and I urge the Board to prioritize the best alternative for one of the most important transportation projects in recent history. Alternative 5 will ensure fast, frequent, reliable transit connecting the Westside and Valley, with automated trains and better connections to the Metro G line, Metro ESFV Project, as well as Metrolink and the Pacific Surfliner.

Additionally, I would like to express my support for the approval of the Hybrid Alignment LPA for Item 11. I urge the board to reject Motion 11.1 by Director Mitchell to advance the Hawthorne Alignment. The Hawthorne alignment is far more expensive, and does not utilize the existing Right-Of-Way that Metro already owns. Selecting the Hybrid Alignment will ensure the South Bay gets the transit it deserves, utilizing existing freight corridors while using state-of-the-art safety technologies. Selecting the Hawthorne Alignment will lead to a large budget deficit and further delay the project with billions of missing funding. Therefore, I urge the Board to approve the Hybrid Alignment and advance the C/K Line Southern Extension.

Thank you for the opportunity to comment.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As Los Angeles struggles to unwind our single-story urban sprawl which more lanes on the freeway can't solve, I, as a resident of San Pedro and a member of the NWSP Planning and Land Use Committee but writing on my own behalf, urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

Here in San Pedro we wait for the day that Metro rail will come to our town as the Red Cars once did. This project is one step closer to that dream.

As for Item 33, I want to add that SB 79 will generate revenue badly needed by Metro. If we don't want to end up like other transit agencies around the nation that are facing fiscal cliffs, we need new revenue and ridership drivers. SB 79-enabled housing will greatly boost Metro's position.

> I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to a vocal few. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support the majority of South Bay people, and the staff's recommendation, and vote no on 11.1. As I said before, as someone who works in aerospace, this project will be crucial to connecting job centers for such an important industry of LA to the rest of LA, enabling opportunities for people who work in aerospace and live around LA, who want to work in the South Bay's important aerospace industry. It is of national importance that this project gets going ASAP, due to these jobs in the area.
>
> I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.
>
> I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. I recognize that there are concerns about voices opposed to housing that will now be opposed to transit, but I guarantee you, the same people against housing are already basically the same people opposed to transit projects.

Good morning,

On behalf of South Bay Forward, we re-submit our **support letter for Item 11: Hybrid LPA**. We are in strong support of the staff recommendation and the years of process, evaluation, and input that has been poured into this recommendation. This option provides the most housing, community, jobs, mobility, and environmental benefits and makes the best use of regional investment in transit centers and multimodal accessibility. We have followed the DEIR and FEIR process closely as an advocacy organization for the past 3 years. After 46 years of study and planning, we urge you to stay the course with the staff recommendation as it offers for the best possible path towards completion and realization of this long-promised Measure M and R project to the South Bay and 1.5 million new riders. It provides critical upgrades to the rail corridor that Metro owns and will make the corridor both safer and quieter for residents, while providing neighborhood-accessible trails and an accessibility-friendly station in Redondo Beach with parking and restrooms.

As a CBO, we work **on a volunteer basis** to provide outreach about the FEIR with our South Bay Bicycle Block Party and South Bay Transit Summit event held in North Redondo Beach and Torrance, respectively. We have performed outreach in the cities of Lawndale, Lomita, Long Beach, and Hermosa Beach and hosted events and tabling at Torrance Transit Center. We also worked to build support and consensus across allied organizations with our South Bay On Board Coalition, in broad support of the FEIR and Hybrid LPA for certification. See our CBO statement.

We are **against the last-minute motion Item 11.1: Hawthorne Option** on which we were not consulted and which goes against decades of planning and years of professional work and expertise and a betrayal of our trust in the public process and support for the Hybrid LPA. We were preparing for a vote to certify and approve the LPA that was selected by the Board and evaluated in the Final EIR. We were not preparing to relitigate the case for Hawthorne vs ROW/LPA once again as we did in May 2024, and are dismayed at the very little noticing that we have had to prepare our comments and to present the case once again. We are concerned

this option will, at best, push the project back by 4 or more years, or at worst, put the project in perpetual limbo with multiple yearslong review processes in NEPA, adding complexity and timelines that will only further delay much-needed transit to our subregion. We have to be realistic with timelines in this federal administration. This option creates major impacts to businesses, places transit riders on a high-injury corridor putting pedestrians and riders at risk of serious injury, and requires complex utility relocations of high-voltage transmission lines and major regional storm drains. We are highly concerned by this unusual process and what little time we have had to respond to it and feel this is not the proper way to conduct major planning decisions costing $2-3 billion and after decades of study. This process and decision should not be so high-stakes nor make or break.

Review the board reports and attachments on Item 11 including the Hawthorne Option Key Issues document. Listen closely to staff presentation and to a diverse set of stakeholders in public comment. **If you have confidence in staff recommendation and public input, we urge you to select the staff recommendation**. If further time or review is needed to address the new motion or provide contingency, that should be considered instead of a sudden alignment shift at the 11th hour. Our members and advocates will do our best to provide focused public comment amidst the changes.

the Final Environmental Impact Report (EIR) for the Hybrid Locally Preferred Alternative (LPA).

We also include a summary of our CBO outreach activity and information about the South Bay On Board Coalition, which are separate entities. See all support letters previously submitted by South Bay On Coalition organizations in December 2025 in this Folder.

This project represents a once-in-a-generation opportunity to extend light rail further into the South Bay, improving regional connectivity, reducing traffic congestion, and delivering on the promise of Measure M for high-quality, sustainable transit to our communities. The project will generate thousands of local jobs, relieve traffic and housing impacts, modernize the existing rail corridor, and link Redondo Beach and Torrance with direct rides to LAX, Inglewood, the Westside, and Downtown Los Angeles.

Thank you for your leadership and continued partnership in advancing multimodal transportation and sustainability. We ask that you Support Item 11 at the Planning & Programming Committee Meeting (1/14) and Board Meeting (1/22).

Sincerely,

Brianna Egan

Dear Holly Mitchell,

Current generations deserve better. But especially future ones.

Paris, New York, Tokyo, Copenhagen, etc Any world class city, like LA is attempting to become.

Might have been hard (change is hard, loud vocal nimby minority backlash is always there - often caused by cars btw, ie. Sprawl) but has any political leader ever not ultimately done right by their «constituents» by prioritizing and building world class public transit?

Disregard noise, - do the right thing for future generations.

Dear Chair Dutra and members of the board,

The Rail Passenger Association of California and Nevada (RailPAC) is an all-volunteer non-profit passenger rail advocacy group, founded in 1978.

Agenda item #10 (2025-1062, Sepulveda corridor):

RailPAC supports the staff-recommended Locally Preferred Alternative (Modified 5), unanimously approved by the Planning Committee on 1/14/2026. It is the alternative with the highest benefit-to-cost ratio, and will best serve the future transit needs of Los Angeles.

Agenda item #11 (2025-0818, C line extension):

RailPAC supports approval and FEIR certification of the staff-recommended Locally Preferred Alternative (LPA), which travels along the Metro-owned Right-of-Way (ROW). We commend Metro for measures such as walking paths, landscaping, sound walls, freight improvements, and grade separations for safety, noise reduction and enhancing pedestrian and bicycle mobility. This is a critical project to enhance mobility in the South Bay, and to allow direct rail transit connectivity in the future between Long Beach, the South Bay and LAX areas. The Hawthorne Option is far costlier and more difficult to construct, for negligible enhanced benefit compared to the LPA.

Dear Directors and Board Clerk,

Yesterday the stakeholders on the C-Line extension project were limited to 30 seconds each while public comments for the Sepulveda Transit project were all allowed one full minute each. 15 of our callers got passed over never being called to speak. During the Construction Committee, although shorter and only a handful of commenters, we were cut to 30 seconds each as well.

Next week for the full board public hearing on the C-Line FEIR, if comments need to be limited please consider limiting on the Sepulveda Transit people as a fair trade. Especially since they're largely in support without any issues to discuss while on the C-Line our livelihoods are at stake.

Thank you for your attention to the matter.

Sincerely,
Niki Negrete-Mitchell

Dear Metro Board of Directors,

I am writing to express my fervent support for the Green/C Line extension, specifically the plan to extend the line from the current Redondo Beach Station terminus to the proposed terminus at the Torrance Transit Center.

This extension is critically important to the region. It is not just a localized improvement; it is the backbone for the future of the LA Metro Rail network. This project is a necessary step toward the eventual connection of the C Line to the Long Beach A Line, a link that would revolutionize transit connectivity across the South Bay and Long Beach.

Furthermore, it is vital that Metro takes a definitive stand against the obstructionism that often halts these essential projects. We cannot allow NIMBYism to dictate the future of our public infrastructure. The vocal minority must not be allowed to drown out the needs of the silent majority who rely on and desire efficient public transit.

History and data have consistently shown that rail and increased transit connections dramatically improve neighborhoods. They increase walkability, improve housing prices, and significantly reduce pollutant emissions. To be opposed to this project is, effectively, to be opposed to improving the lives of your constituents.

I urge the Board to look past the opposition and move forward with this project for the greater good of Los Angeles County.

Sincerely,

Thomas, Gardena

Dear Metro Board Clerk,

My name is Darrell, and I am writing to formally express my support for the **South Bay Extension** and specifically the **Hybrid Locally Preferred Alternative (Hybrid LPA)**.

This project is a major opportunity to expand reliable transportation access in the South Bay, increase community connectivity, and support long-term economic growth. A modern rail extension brings more people into local areas, supports small businesses, and creates stronger access to jobs, schools, and community events across the region.

Southern California is falling behind other global and U.S. regions with robust transit systems, including places like **Japan** and **New York City**. The South Bay Extension is exactly the type of investment that helps modernize Los Angeles County, strengthen the regional economy, and make daily travel more practical for regular working people.

I strongly encourage Metro leadership to support the **Hybrid LPA**, and I urge the Metro Board to stay aligned with the long-term public benefit of this project. A small number of organized homeowners should not be allowed to block a transit investment that serves the wider region and the broader public interest.

I also want to specifically note my concern regarding board members who have advanced actions that could undermine the Hybrid alignment and delay or weaken this project, including:

- **James Butts**
- **Holly Mitchell**
- **Jacquelyn Dupont-Walker**
- **Tim Sandoval**

Please move forward with the South Bay Extension and keep the project on track through support of the **Hybrid LPA**.

Thank you for your time and for accepting public comment.

Sincerely,

Darrell H.

From: Daniel Van Horne
To: Board Clerk
Subject: (EXTERNAL) Public Comment: South Bay Extension, Hybrid Alignment, Sepulveda Line Alt 5, and SB 79
Date: Monday, January 19, 2026 3:32:09 PM

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Do not click links or attachments unless you trust the sender. Be aware of phishing signs such as urgent requests, unexpected links, or offers that seem too good to be true. Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

I support expanding Metro, but only if choices are grounded in reality, not ideology.

For the South Bay extension, the hybrid alignment is the only serious option. It balances cost, constructability, travel time, and neighborhood impact. Anything more extreme risks overruns and delays that undermine public trust and project viability.

For the Sepulveda Line, Alternative 5 is the correct choice. It delivers the strongest combination of capacity, reliability, and long-term system performance. Settling for weaker alternatives would be a permanent mistake on one of the region's most critical corridors.

However, none of this works without land-use alignment. Metro's refusal to support SB 79 directly undercuts ridership, value capture, climate benefits, and fiscal justification for these investments. Building multi-billion-dollar rail lines while opposing transit-oriented housing is a policy contradiction that guarantees underperformance.

Commit to the South Bay hybrid alignment, select Sepulveda Line Alternative 5, and stop sabotaging transit by blocking the housing that makes it succeed.

Daniel Van Horne

Be cautious of spoofed emails that appear to come from trusted sources. Report suspicious emails. Follow Metro policies and update accounts only through official channels.

Dear Metro Board Members,

I'm writing to inform you that I am AGAINST the Metro C Line (now K Line) extension that's being planned along the railroad tracks through Lawndale, CA. The current extension plan would slice through our community and steal more than 100 homes from decent families. I live two houses down from the railroad tracks, any closer and I would've received the "imminent domain" notice in my mailbox that my neighbor received. Their entire family will be uprooted by this Metro project if it continues as planned. Grandmother and grandfather, mother and father, and all of their children - three generations - being forced out of their homes. They really don't want to leave, and I'm writing especially to help defend them. The rest of my reasons could be considered trivial compared to the uncertainties that will come upon this family if their home is taken from them. And they're not alone, there are more than 100 families just like them that have also received "imminent domain" notices in their mailboxes.

Besides the crime of driving hundreds of people out and tearing down their homes, the construction of this Metro line will be lengthy and noisy. It is sure to kick up lots of concrete dust and soil for us to breathe in for the next couple of years. There are schools near where the Metro is planning the construction, and that amount of disturbance would be horrible for the children who attend. And once installed, Metro trains would run almost non-stop near our houses throughout the day, passing by a couple of times an hour. The regular train coming by once or twice a day was bad enough, so I can't imagine those speedy Metro trains whizzing through and disrupting my entire neighborhood's lives every single day.

In addition, I have family members on the other side of the railroad tracks. Right now I can walk over the tracks to reach them in a matter of minutes. People walk their dogs up and down those tracks, and children have put up swings in the pine trees. All of those comforts will be stolen away from my city, and reluctantly traded for a Metro line that could be placed elsewhere. I would have to take a big detour to find my family, and people trying to get exercise would have to settle for hard concrete paths instead of soft grass and soil. However, if those were the only problems the current Metro plan posed, I would not be writing this email. The biggest objection to this project is that Metro plans to evict and displace good people - hundreds of people. Metro must not let this happen, the current plan should not go forward.

Thank you for considering my objection to the Metro C Line (now K Line) extension along the railroad tracks through Lawndale.
Sincerely,

Hannah Limuti

Dear Metro Board Members,

My name is Matt Monson, and I'm a West Side resident. I'm writing to urge that the Locally-Preferred Alternative to use the existing Metro right of way for the K Line Extension to Torrance be approved, and that the motion to abandon this plan for the much-worse option along Hawthorne Boulevard be rejected. There are many reasons why the Hawthorne option would be a change for the worse -- including a huge cost increase, years of delays, extra property takings, worse service, and the list goes on -- but on top of all that, it would continue the self-destructive pattern of torpedoing vital regional-scale improvements to mollify the few.

You can never make a choice that will be perfect for everyone. Nevertheless, there is a clear sensible answer here, and I implore you to proceed with it.

Thank you,
Matt Monson

Dear LA Metro Board Members,

I am writing to formally submit a public comment in strong support of the K Line South Bay Extension.

Specifically, I would like to express my support for the alignment as outlined in the recently published Final Environmental Impact Report (FEIR). I believe this project is a vital step forward for our regional transit network and will greatly benefit the community.

Thank you for your time and for considering my comments.

Best regards,

Eliot Foss

Dear Metro Board,

I am a Redondo Beach resident and I am writing in support FOR the LPA alignment for the K Line extension to Torrance, to be discussed at the 10am meeting on January 22nd. High-quality transit *is a good thing* and is indicative of a healthy, thriving community. We need transit in the South Bay as well to further economic development and community building. This project would make the Metro accessible to me and many other Redondo Beach residents via a short hop on the Redondo Beach 102 bus (or a longer walk).

I specifically encourage the Board to certify the LPA and I am writing AGAINST Item 11.1 (the Hawthorne alignment). The LPA alignment is better than the Hawthorne alignment because the Hawthorne alignment costs significantly more while not having much of an advantage. The Hawthorne alignment would not do anything for the bus system or businesses on Hawthorne because there are no stops on the road until around the South Bay Galleria, and being able to see the metro line from Hawthorne does not mean better connectivity with buses. The Redondo Beach Transit Center from the LPA has better connections with the buses than the South Bay Galleria station proposed in the Hawthorne alignment because it is already a central bus stop. The South Bay Galleria is still accessible from the transit center, so any benefit that the South Bay Galleria stop provides is covered with much better capability by the Redondo Beach Transit Center stop. The Hawthorne alignment's further distance from residential areas does not provide much of an advantage because the freight line in the right-of-way will still continue to run. The LPA will provide improvements to the safety and sound of the freight line by providing quiet zones and better grade crossings, while the already quiet light rail trains would not impact much. There will even be a walking path along the rail at certain portions! The experience of homeowners along the right-of-way will be improved by this project by having safer railways next to them. Finally, going with the Hawthorne alignment would require undoing a significant amount of the work that has been done for the FEIR for the LPA, wasting all the effort from the past few years and delaying the project. The increased cost of the Hawthorne alignment would also delay the project and put high quality transit further out of reach of the South Bay. In a world where transit funding is becoming increasingly difficult to come by, making cost-effective and beneficial decisions is important.

This build is necessary for transit not just in the South Bay but beyond to places like Long Beach where the line could further extend. If the Hawthorne alignment is picked, this project will be put into unnecessary fiscal danger, running the risk of not just South Bay residents but many more residents of the county losing this vital

service.

In addition, I am FOR Item #10 to approve the LPA for the Sepulveda Transit Corridor Project to build up the quality of the LA Metro transit system. South Bay residents would benefit by being able to access more locations faster if the Sepulveda line is built. I would also encourage the Metro board to declare support of SB79's transit oriented development. More development around transit stations means more ridership and thus more revenue for the Metro to continue building out the transit system. Building extensions like the K line extension is just the first step, SB79 allows many more people to have easy access to the system, creating a thriving Los Angeles. When transit thrives, the people thrive. Thank you for your time reading this comment.

Best regards,
Corban King

To the Metro Board of Directors,

I am writing to express my strong support for advancing the South Bay Extension using the Hybrid LPA.

I spend time in Torrance regularly and know firsthand how limited the transportation options are if you are not driving. Having a fast, reliable rail connection to the South Bay would be genuinely transformative, not just for commuters, but for everyday trips, social connections, and access to jobs, education, and services.

This extension is also essential to future regional connections, including a one-seat ride linking the South Bay and Long Beach to LAX. Integrating the South Bay more fully into the regional rail network would deliver benefits far beyond a single corridor.

The Hybrid LPA strikes an important balance by improving speed, reliability, and access while remaining realistic about cost and constructability. I urge the Board to certify the environmental review and approve the Hybrid LPA so this long-planned project can move forward.

Respectfully,
Adrian Dorsey

Dear LA Metro Board,

I am writing to express my full support for the Hybrid LPA alignment for the C Line. The proposed right of way already exists and already includes an active rail corridor, making it the most cost-effective option and, by a significant margin, the quickest to construct. This alignment reflects years of careful planning and collaboration. I respectfully urge you not to undo the substantial progress that has already been made or delay the construction.

In addition, I respectfully request that you initiate the FEIR for the modified LPA of the S Line as soon as possible. There is no clear justification for additional delays or for increasing project costs when a viable and well-vetted option is already available.

Finally, I strongly encourage you to adopt SB79 as written, without modifications or dilution. SB79 is a critical tool for enabling the transit-oriented development necessary to address our ongoing housing challenges and to significantly improve the effectiveness and ridership of the Metro system. Weakening this legislation would undermine its purpose and the broader regional benefits it is intended to deliver.

Please see our attached letter signed by our friends and community members who will be unable to come to the meeting but still wish for their voices to be counted.

Thank you for your time and consideration,

-Friends of LA Metro

Meeting Name: Board of Directors - Regular Board Meeting
Meeting date/time: 1/22/2026 10:00 AM
File #: 2025-0818
Agenda #: 11.

Hello,
I am writing as a 20-year resident of Lawndale.
Over the years, Metro has hosted public comment and info meetings in our neighborhood.
At the meeting I attended, the Metro Rep. informed families that expansion down the railroad tracks would cause Metro to take back any land where families had pushed their boundaries into the railroad area.
Metro did not inform the public that it was intending to take homes from residents for its expansion plan.
We only became aware that homes would be taken when our neighbor received a letter a few weeks ago stating this.

Whether or not Metro has the legal right to do this, I do not know. But I do know that Metro used deceptive tactics to move its plans along. It told resident one thing, and now is sending letters stating that homes will be taken. An expansion plan that evicts more than 100 families from their homes is a bad plan.

I am against this expansion because of the homes that Metro plans to take -- and because of the way that Metro concealed this from the public.

There must be another way to accomplish an expansion without de-homing families.
Please do better for the families of our communities.

Sincerely,
Caroline Limuti,
Lawndale Resident

Hello,

I am all for the K Line extension to Torrance. I live one mile from the Redondo Beach/Marine Station and I would catch the rail whenever I have to be at certain places at a certain time. I would agree with the ROW option (more than the Hawthorne option) because it provides better connection with the then-new Redondo Beach Transit Center. Riders from any bus route that connect with Redondo Beach Transit Center can easily access the Redondo Beach Transit Center station.

My name is Hunter Lowry and I have lived in Lawndale for 20 years. When I first moved here, I was aware that there was a train track at the end of my block, but the roughly two trains a day was a minor inconvenience. I recognize that Lawndale is not a spot that is well known in Southern California, and I know that it's a working class area and filled with people of color, but that shouldn't be an excuse to ram a Metro rail line through a quiet residential area. I mean, we all know that if this were Beverly Hills or Manhattan Beach, the idea of years of construction ending with hundreds of trains running through the neighborhood would not even be on the table.
Let's do the right thing and put this rail line down Hawthorne Boulevard and not the ROW , close to people's homes, leading to potentially a decade of danger and disruption, and the destruction of our peaceful enjoyment of our homes, when a better alternative would be safer, quicker, and lead to a broader use of that Metro line.
I implore you- this would damage the lives of so many people. Use the Hawthorne route.

Thank you,
Hunter Lowry

Dear LA Metro Board of Directors,

I am writing to express my strong support for the proposed C/K Line extension to Torrance, California via the Hybrid LPA.

As a South Bay resident and someone who lives in Redondo Beach, I see firsthand the need for improved, reliable public transit connectivity between the South Bay and the broader Los Angeles region. The C/K Line extension would provide a critical transportation alternative for residents, workers, and students while reducing congestion on already overburdened roads.

This project represents a meaningful investment in equitable mobility, economic opportunity, and environmental sustainability. Expanding high-capacity rail service to Torrance would better connect historically underserved communities, support local businesses, and help the region meet its long-term climate and emissions-reduction goals. It would also improve access to jobs, education, and essential services throughout Los Angeles County.

I strongly encourage the Metro Board to continue prioritizing and advancing the Hybrid LPA C/K Line extension. This project is vital to the future of the South Bay and to the overall effectiveness of LA County's transit network.

Thank you for your leadership and continued commitment to improving transportation options for our region. I appreciate your consideration and look forward to seeing this important project move forward.

Sincerely,
Jacob McIlvaine

Dear Members of the Metro Board,

I live in Lawndale and would be directly impacted by the proposed ROW route for the C Line extension. I'm writing to ask you to support the board motion to choose the Hawthorne Boulevard alignment instead.

The ROW option would bring hundreds of trains per day starting at 4 a.m. and running until midnight through a residential neighborhood that was never designed for this level of activity. The constant noise and vibration would fundamentally change daily life for my family and my neighbors.

Even more troubling is the projected eight years of construction. That means nearly a decade of heavy equipment, toxic dust, and disruption just feet from our homes. Many residents here are working families who cannot simply relocate or work from home to avoid these impacts. It is also very difficult for us to make it downtown for your board meetings.

There is also the issue of the jet fuel pipelines that run through this corridor and supply fuel to LAX. The pipeline owners themselves have said disrupting these pipelines or even temporarily shutting them down for relocation will have "significant" impacts to flights at LAX as it cuts off the fuel supply.

Hawthorne Boulevard is the smarter, safer option. It places rail in a commercial corridor where transit belongs (the red line once ran in the exact same corridor) and avoids imposing extreme harm on residential communities.

As a transit rider myself and someone who will actually ride this new extension, please choose the Hawthorne Boulevard alignment.

Thank You,

Jorge Jiminez

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed at least 4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths without displacement. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. Further delays are not progress. I trust 40+ years of study, analysis, and expertise. Bring rail now!

Meagan Karl

Dear Board Members,

As an almost lifelong County resident who has waited too long for frequent, reliable, and convenient public transit in our region, I urge you to:

1. **Please support Item 11** and **oppose Item 11.1**. Metro owns the right-of-way for this project. Anyone who purchased a home adjacent to a rail corridor did so knowing that was a historical and ongoing use.
2. **Please support Item 10**, the Modified Alternative 5 route for the Sepulveda Transit Corridor which will best serve UCLA and other key destinations with frequent, high-quality service.
3. **Please oppose Item 33** - California needs to plan for smart, sustainable growth. Legalizing housing in close proximity to transit is common sense policy that cities around the world have embraced over the past 50+ years. Metro would do well to utilize SB-79 to facilitate more TOD housing around Metro stops.

Thank you,

To whom it may concern,

I am writing to formally express my opposition to the proposed Measure C Metro line. After reviewing the available information, I do not believe this project adequately serves the best interests of our community.

My concerns include the project's overall cost, long-term financial burden on taxpayers, potential disruption to neighborhoods and businesses, and the lack of clear evidence that the proposed route will deliver proportional benefits in terms of congestion reduction or improved transit accessibility. Additionally, there appears to be insufficient transparency regarding construction impacts, environmental consequences, and ongoing maintenance obligations.

While I support responsible investment in public transportation, such investments must be fiscally sound, thoughtfully planned, and responsive to community input. At this time, Measure C does not meet those standards. I respectfully urge you to reconsider this proposal or, at minimum, pause further action until more comprehensive analysis and meaningful public engagement can take place.

Thank you for your time and consideration of my perspective. I trust that my concerns will be taken into account as decisions regarding Measure C move forward.

Sincerely,

Daniel Solomon

Attention: Board Members

Dear [Board Chair and Members],

I am writing to formally express my opposition to the proposed C Line Extension, Item 11. After reviewing the available information, I do not believe this project adequately accounts for the well-being, health, and safety of residents living near—or directly along—the proposed route.

Of particular and immediate concern are the significant and potentially harmful impacts on neighboring homes, including persistent noise and vibration, degradation of air quality, and prolonged construction activity occurring in close proximity to occupied residences. For homes located immediately adjacent to or directly on the proposed track alignment, these impacts are not hypothetical—they represent a serious threat to residents' physical health, mental well-being, and basic quality of life. The cumulative effects of continuous disruption, environmental exposure, and stress have not been sufficiently analyzed, disclosed, or mitigated, leaving affected households facing unacceptable risks.

While I support responsible and thoughtfully planned public transportation improvements, such projects must prioritize the health and well-being of affected communities. At this time, the C Line Extension, Item 11 does not appear to adequately mitigate or fully disclose the risks posed to nearby residents. I respectfully urge the Board to reconsider this proposal or delay further action until comprehensive health impact assessments and meaningful community engagement are conducted.

Thank you for your time and consideration. I trust that these concerns will be carefully weighed as decisions regarding the C Line Extension, Item 11 move forward.

Sincerely,
Fernando Tartaglia

As a former New Yorker, I am against extending the Metro Rail to the South Bay. That would bring even more homeless mentally ill people and crime to our relatively safe community. Why screw up even more of LA that existing Meteo lines have done?? We're already under siege from all the developers that all of a sudden are enamored with building monstrous apartment buildings! No Metro Rail in the South Bay!!

Sincerely,
Eileen Neill

Honorable Members of the LA Metro Board:

I am writing in opposition to the proposed Hybrid Alternative for the Metro C Line Extension. I live near LAX and frequently drive to Torrance for dining, shopping, banking, or doctor appointments. What you are considering is a train to nowhere (Hybrid Alternative) vs a highly productive rail line on Hawthorne Blvd that would easily be extended to Del Alamo Fashion Center and even Torrance Memorial. Hawthorne Blvd has millions of square feet of commercial real estate and is the crown jewel of commercial corridors in the South Bay.

Unfortunately, you only have one chance to get this right. While I understand that transit officials typically prefer to inconvenience and displace working-class communities of color as the Hybrid Alternative does to the majority Hispanic/Latino community of Lawndale, this specific option offers zero upside to affected residents in Lawndale or people like myself who would take the train to Torrance if it went anywhere desirable in Torrance.

I strongly encourage you to reject the Hybrid Alternative and pursue the elevated rail line on Hawthorne Boulevard. The long-term outcome of connecting the unparalleled amount of desirable commercial destinations on Hawthorn Blvd instead of the slightly less expensive connection to an oil refinery and industrial park in Torrance would certainly be something to take pride in.

Thank you,

John B
Los Angeles, CA

LA Metro Board Clerk,

To: LA Metro Board,

I have never been more embarrassed for my city than I am right now. I am very much for thoughtful public transportation and good housing, but this project—as it is currently outlined—is abhorrent.

I was at Al Muratsuchi's town hall a few months ago, and specifically asked him about this project. I pointed out that El Camino College is in Torrance and he reminded me that technically, it's in an unincorporated area so he didn't have responsibility for the transportation needs there.

Ok, I get that, I guess…

He also said "Well, my sense of some of the political dynamics is that the City of Torrance is going to want to get the money and spend it within the city of Torrance."

REALLY?!? So, it's a rush to spend money In TORRANCE before it goes away? Who cares if it destroys a neighboring city?!?

My understanding of the current situation is that Torrance is going ahead with pushing the Metro K line through a small under-resourced city, even though no other Southbay City is taking any firm stance. (I wouldn't either because it's ethically icky!) Four of the most impacted cities are adamantly against this alignment altogether, and two have started lawsuits!

And the alignment doesn't even make sense – unless of course you don't think certain neighborhoods are worth spending money on when BIG TORRANCE is waiting to fulfill their transit dream for political brownie points ASAP.

Truly shameful.

Jessie Foster

To whom it may concern,

My name is Angela Drew and anytime I hear about hundreds of old growth trees that could potentially be destroyed for a project that could easily take a more sensible route, I am alarmed.

Environmentalists and environmental justice groups find this project absolutely repugnant! (Just look at SouthBayEnviroJusticeAlliance on Instagram.)

The Pro-Hybrid LPA messaging fails to mention that rail tracks are toxic because the wood (ties) are treated with creosote, which is a carcinogenic tar-like substance, and the jagged rocks (called ballasts.) It's generally safe if not disturbed.

But, when this stuff is disturbed during demolition or construction, the **wood and dirt spreads cancer-causing dust, and the rocks produce fine particles which embed deeply in lung tissue**, impairs oxygen uptake and leads to conditions like silicosis.

Rail workers will have protective breathing equipment when doing this work, but there are STILL plenty of workman's comp lawsuits… But the Lawndale families who literally live within a few yards of this activity will NOT HAVE ANY PROTECTION.

In fact, Metro sponsored SB 71, which extends and expands CEQA exemptions for transit projects within existing rights-of-way until 2040! **It exempts projects like this light rail, infrastructure from full CEQA review if they meet specific criteria, such as inclusion in regional plans.** This allows Metro to accelerate track work along lines like the K Line **without full environmental reviews, thus bypasses scrutiny of localized air quality and health impacts in vulnerable neighborhoods. SHAME!**

This clearly should be underground, and if certified, will be a (another) black mark— not only LA Metro's reputation—but the Metro board members who let this happen.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I'm using the Southbay Forward online "email kit" that my friend told me about to express my opinion about the new K-line south. I really didn't appreciate how this email form preloaded a boilerplate message that says I support this project. I had to delete that nonsense because I DO NOT SUPPORT THIS!

But, I don't know any other way to get you this email, so here is my message: Of course it makes more sense to put the lightrail on Hawthorne Boulevard! It would definitely be more useful to me to not have to roll over to a side street behind a Target and a cemetery! (#boycottTarget)

Why was this anyone's first choice? I know people who live over there in North Redondo and it just doesn't look safe and it's not fair for the folks at the senior home!

Hello LA Metro Board,

I have lived in Redondo Beach and worked in Torrance for almost 5 years, and have walked, biked, drive, & taken the LA metro system around our beautiful city. It would be very wonderful to have a station within biking distance of my house, so I can get around LA without adding to the traffic & parking congestion. Please extend metro lines to Torrance & Redondo!

Thank you,
Wesley Reynolds

Dear Metro Board of Directors and Project Planning Team,

I am writing to formally express my **strong support** for the K Line extension to Torrance. As a resident of Torrance, 90504, I believe this project is a vital investment in our regional transportation infrastructure.

Connecting the South Bay to the wider Metro rail network —including direct access to LAX and the Westside, will significantly reduce my reliance on the 405 and 110 freeways. This extension is essential for creating a more accessible, sustainable, and connected Los Angeles.

I urge Metro to prioritize and approve this extension.Thank you for your time and for your work in improving our city's transit.

Best regards,
Julio Ceballos

To whom it may concern,

My name is Joshua Blonsky, I am a LA resident and rider of Metro transit. I am writing to urge the Metro Board to adopt the K-Line extension to the Redondo Beach Transit Center and onto Torrance immediately.

Extensions to the K-Line South to Torrance and eventually to Long Beach and then North to West Hollywood/Hollywood are fundamental to the transit future of LA. Riders like me, who have access to cars but also want access to transit, need projects like this K-Line extension in order to encourage us out of our cars with one-seat rides and easy transfers.

The Metro Board should immediately adopt the K-Line locally preferred extension to the Redondo Beach Transit Center and Torrance Transit Center.

Best,
Joshua Blonsky

FOR C/GREEN LINE HAWTHORNE BLVD ALIGNMENT

South Bay Cities Council of Governments,

I support the Hawthorne alignment of the Green/C-Line Extension to Torrance. It is the safest option and saves so many trees. Below are all the reasons I support the Hawthorne alignment.

1. SAVES MORE TREES: The route along the ROW would require ~220 to be removed. DON'T KILL ALL OUR TREES! That is significantly more than the 40-50 smaller trees required for the Hawthorne alignment.

2. ENVIRONMENT: Hawthorne Elevated would allow for more biking paths, jogging paths, dog-walking, etc. along the Harbor ROW in an area considered "park poor" per LA County Parks & Wildlife.

3. SAFETY: Hawthorne elevated is safer as 200-300 trains per day would NOT be running past schools and parks where children play, it would NOT share a corridor petroleum gas tankers that run along a path where there are multiple high pressure gas lines that carry gas and jet fuel.

4. INCREASED RIDERSHIP: Hawthorne Elevated will increase Metro ridership as a stop at the Galleria will better serve commuters in Lawndale, Redondo Beach, and Torrance, making it a destination for shopping, restaurants, entertainment and other businesses.

5. CONNECTIVITY: Buses already stop at Artesia and Hawthorne so connectivity is seamless by directly boarding desired bus at the Artesia/Hawthorne bus stop which will be accommodated by the new station's configuration.

6. BOOST ECONOMY: Hawthorne Elevated contains a stop at the South Bay Galleria, future South Bay Social district that will not only help support the many shops soon to be built there, but will also serve any offices, hotels, or apartment units on Hawthorne Blvd that are part of the Galleria's upcoming redesign.

7. REVITALIZE LAWNDALE: Light rail elevated on Hawthorne Blvd, will help to support and revitalize the businesses on that shopping corridor without sacrificing parking, which would also be beneficial to Redondo Beach and Torrance commerce

Please choose the Hawthorne alignment for the safety of residents and save the trees!

Thank you,

Bob Huang

Board Clerk
Los Angeles County Metropolitan Transportation Authority

Dear Board Clerk,

Please include the following statement in the official record for the upcoming Metro Board meeting:

We are in strong support of certifying the Final Environmental Impact Report (FEIR) and adopting the Hybrid Locally Preferred Alternative (LPA) for the D Line Extension to Torrance. Advancing this project is essential for improving regional mobility, expanding equitable transit access, and providing the South Bay with a reliable, high-capacity connection to the broader Metro system.

Thank you for ensuring this correspondence is distributed to the Board.

Sincerely,

Sherwin & Marilyn Rubin
Torrance residents since 1968

Hello Metro Board,

For item # 2025-1062, though I was and still am in favor of Alt 4, if that is not an option I am For the proposal in order to support high quality, high capacity transit between the valley and the Westside.

For item # 2025-0818, I am For it as well in order to further expand transit to the South Bay and set the stage to expand the line to Long Beach.

For item # 2026-0037, I am Against it, as the Hawthorne option will likely come with so many construction difficulties that it will potentially jeopardize the project.

For item # 2025-0985, I am For it, in order to further support the financing of Measure M programs.

For item # 2026-0035 I am For this proposal as well, as reforming the LA Metro Board to better reflect the Counties overall transit needs as opposed to the concerns of a few NIMBY's is a must.

For item # 2025-1028, I am For this proposal as well, in order to ensure Phase 2B2 of the A Line Extension to Montclair is achieved.

For item # 2025-1081, I am For this proposal as it will expand access and public participation in transit governance in critical and necessary ways.

For item # 2025-1033, I am For the proposal in order to ensure a diversity high quality transit information and travel systems for the benefit of riders.

For item # 2025-1053, I am Against the measure, as the measure is a futile attempt at avoiding necessary housing improvement the City's and County desperately need.

Thank you so much,
Oliver Mather

Hi,

I'd like to send in a comment for the Metro board meeting tomorrow, January 22nd 2026 at 10AM. I am unable to attend in person but would like to voice my unwavering support for the Hybrid LPA for the South Bay extension:

As an LA resident and frequent commuter to Torrance and San Pedro, having access to public transportation would be immensely beneficial for me and for the community. The South Bay has long needed better transit and access to the greater city, and needs it as soon as possible. Greater mobility around the city will only increase property values and further connect communities. Building on existing Metro-owned land without any displacement ensures it has no negative impact on the current conditions of the area, only benefits.

Given the efficiency of the proposed plan there is no question of the overwhelming benefits to the community that it would offer, nor any reason to question its viability moving forward. I stand with the many LA and South Bay residents in support of the Hybrid LPA for the South Bay extension.

Thank you for your consideration.

Best,
Caroline Hayes

Hello,

My name is Ashley, I live in Lawndale, and I support the Hawthorne Blvd elevated option and strongly oppose the ROW option. The Hawthorne option will revitalize Lawndale, boost the economy, preserve green space, and increase ridership, among many other benefits. Hawthorne Blvd is already designed for commuter railway track and previously housed the Pacific Electric Red Cars.

The ROW option is opposed by entire communities, as it poses significant physical, financial, environmental, and emotional risks. It will decimate communities that have existed for generations.

Please support the Hawthorne Blvd elevated option.

Thank you,
Ashley

I would like to send you an email as a Long Beach resident in support of HYBRID LPA and FEIR certification. Our metropolitan area is light years behind the mobility for citizens compared to other national and global metropolitan areas. Delaying this connection from Long Beach to LAX will only hurt the growth of the region. We have many low income workers that could have a much better life if committing didn't require thousands of dollars a year and many hours of high attention traffic. Please do not let some people inhibit the enrichment of the lives of many. Owning a home does not mean you are a more important member of the community. We all live here.

Please resend the entire Metro Board the LWV support for the Locally Preferred Alternative along the Right of Way.

Stay the course.
Deliver the planned LPA sooner rather than wait for a magical alternative that we can't afford.

Hawthorne and Artesia Blvds are both high injury corridors.
Do not dump transit users into the middle of a highway.

Do not force people to use a train station in the median of a highway, take an elevator, walk across the highway, walk across a third of a mile of asphalt parking lot, and cross Kingsdale Ave to reach the Redondo Beach Transit Center.

The LPA gives a short, at grade, seamless and SAFE connection between the rail and bus stations.

As a resident of the South Bay, it is imperative that LA Metro approves the FEIR for the LPA ROW Alignment as it reduces funding risk, lessens disruptions during construction, and most importantly, timely links the South Bay to the broader Metro network, serving as a crucial corridor for communities that have long lacked sufficient access to rapid mass transit. Any alterations to this plan risks the project's cancellation entirely, leaving our residents in limbo for potentially half a decade. This extension will one day be the backbone for mass rapid transit in the future for our communities, and it would be shameful for it to fail on the final push.

A concerned resident,
Dylan Suarez

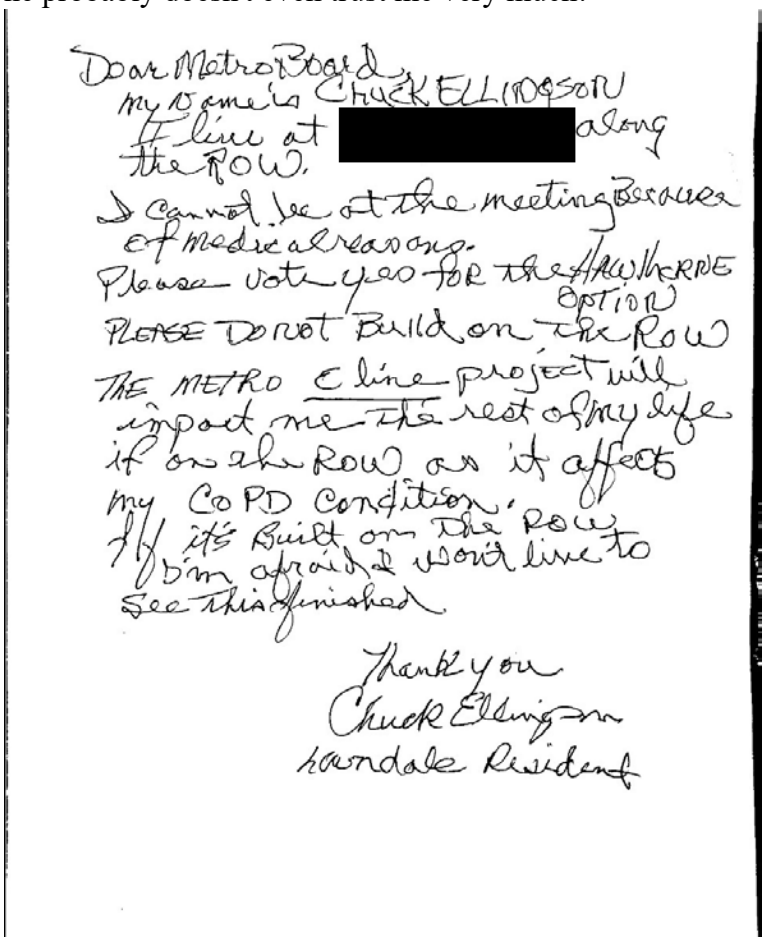
Hi Metro Boards of Directors,

I was asked to pass along this letter from my neighbor, Chuck. He doesn't trust the internet or computers, or the government - so here it is... I think I'm about the only person he trusts, and he probably doesn't even trust me very much!



Dear Metro Board,
My name is CHUCK ELLISON
I live at [redacted] along
the ROW.
I cannot be at the meeting Because
of Medical reasons.
Please vote yes FOR the HAWTHORNE OPTION
PLEASE DO NOT Build on the ROW
THE METRO E line project will
impact me the rest of my life
if on the ROW as it affects
my COPD Condition.
If it's Built on the ROW
I'm afraid I won't live to
See this finished.

Thank you
Chuck Ellingson
Lawndale Resident

Hi Metro Board Members and Deputies,

My name is Chelsea Schreiber. I live along the ROW, and I am sure many of you have heard me speak at board meetings before. (Hi!)

I am writing at 1:16 a.m., and I just got home after another long night of canvassing. I was sent from one house to the next (literally sent - people made phone calls to their family or friends and sent me to their homes) talking with families and trying to explain what is going on. That has been my reality for the last three days straight. (And honestly the last three years - but the last three days has been a panic to make sure people are aware for the last opportunity to speak.)

As I have been telling you for years, many people in this community still do not know about this project. That part has not changed. People are still learning about it for the first time when someone shows up at their door. That was especially clear today during MLK day when I was finally able to talk to people who are usually not home.

What has changed is something new and deeply concerning. Not only do many residents still not know what is happening, but now many of them are afraid to show up at all bc of their fear of ICE.

Over the past three days of walking the streets of Lawndale and talking directly with residents, one theme has come up again and again. Our community is heavily minority, and many residents who attended the meeting in May 2024, or who had planned to attend again, are now telling me they are afraid to come on Thursday because they are worried about ICE being present.

This fear is real and consistent. I have heard it repeatedly. Many people have told me directly that they will not attend the meeting because they are afraid of being arrested by ICE. Even while canvassing, I see how present this fear is. Some residents are afraid to open their doors at all. When they do, it often takes a long time to build enough trust for them to feel safe

talking.

I think this is critically important context for the Board to understand, especially when thinking about public participation. Most of the people I am speaking with are residents, and many of them are still afraid of ICE. I'm not worried about our turnout being low, but I am sad many people won't be coming to have their voices heard because of this fear. It's not because people do not care (they do - they care to the bottom of their souls). It is because fear is shaping whether they feel safe enough to participate.

I am doing everything I can to talk to everyone, but I cannot give people 100 percent reassurance that ICE will not be present. If there is any assurance that can be given, I believe it would make a meaningful difference. I've noted which houses have this fear - and would love to go back and assure them that it is not warranted.

Please let me know if this is something I can tell residents. I truly believe more people would attend if they knew they were not at risk of being arrested simply for showing up to a public meeting.

It's been an emotional few days, so I'll share more tomorrow when I sleep for a few hours - but I want to share one last thing. I am grateful for this project - I've met some of my very best friends just because it has given me the excuse to knock on their doors and talk about the train. I'm from Minnesota, not here, so our family doesn't visit often. Since becoming enraged because of Metro's shitty outreach, my neighbors have embraced me and Jj kids. We've spent Thanksgivings and Christmases with neighbors - and im so grateful for the motion to pivot to Hawthorne Blvd. and listen to the community. That means my family can stay in our home and my kids can grow up with people who love and adore them - and this has allowed me very uniquely to get to know truly every single person on our street - and the majority of people in our neighborhood. In a world where we're so isolated, that's incredibly unique. Sometimes my kids and I go on walks outside of our area just because I don't have the capacity to stop and talk to everybody 15 minute walks with the dog turn into 2 hour walks - which is lovely, but a lot sometimes. But I am so grateful for that "problem." Sorry it's late and I'm rambling and emotional after a day of tears from community members. They cry when a I tell them about the motion - I cry - we all cry - and it's all tears of joy. So, thank you for listening to the community. We honestly didnt have faith that we were being listened to - so there is so much joy and surprise right now that if you drove through our neighborhood lately, you would drive home smiling. If anybody wants to join me on Tuesday or Wednesday, you are welcome to join. There is so much negativity lately that it's been such a breathtaking few days.

If you have any questions, I am happy to answer them. I am also happy to connect you directly with residents who have shared these concerns with me.

Thank you for understanding what is happening on the ground right now.

Sincerely,
Chelsea Schreiber
5 foot 1 Lawndale mom and, turns out, mighty fighter of justice (who knew! Not I.)

Dear Directors,

Attached please find Kevin Mitchell's handout that went together with his comments at the EMC meeting this past Thursday, Jan 15 as he ran out of hard copies and had a computer crash.

We very much appreciate your attention to our comments and it is always a pleasure to see you.

I cc'd the Board Clerk so that the rest of the Directors who were not present for General Public Comments may also be included.

Thank you and see you this Thursday!

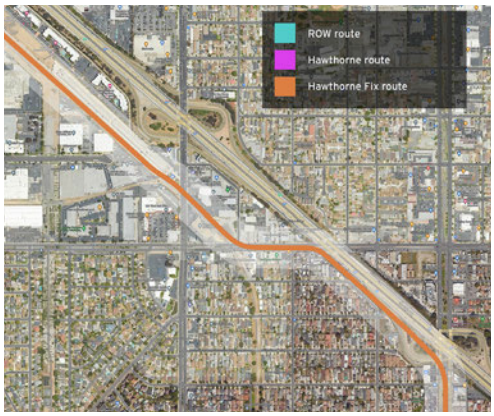
Warm reggards,
Niki Negrete-Mitchell, [redacted]
Kevin Mitchell, [redacted]

Hawthorne route north of Manhattan Beach Blvd. was designed to be destructive to businesses and purposefully add exorbitant and unnecessary costs to the Hawthorne option.

ROW

Hawthorne Option

Hawthorne fix



Metro argues that their ownership of the Harbor Subdivision Corridor Right-Of-Way (ROW) greatly reduces the cost of rail through the South Bay. So why do they not use it where they can?

From the Redondo Marine Station, the ROW runs parallel to the 405 until Manhattan Beach Blvd. where it swings south through Lawndale and Redondo neighborhoods. From the RB Marine station, the Hawthorne Option route dog-legs before Inglewood Ave., recklessly running over a Self-Storage business, a Chevron station, to then runs directly adjacent to freeway on and off ramps, taking out a mechanic's shop, a billboard company, a flooring company, to then squeeze through a sliver of embankment between the 405 and other businesses. All unnecessary.

By simply using the ROW up to Manhattan Beach Blvd., then swinging on to the 6 lane blvd. with a wide median, the elevated train gracefully avoids the carnage that Hawthorne Option proposes. Not only does it spare the local businesses, it avoids conflicts with freeway access and reduces it's footprint with Caltrans. Cost identical to ROW.

Since this proposed design flaw creates so much disturbance to local business and freeway access it would naturally create significant cost implications. That it has not been addressed creates the appearance that it is intentional which brings all of Metro's recommendations for this project in to question. A junior designer can see this mistake. It was brought to the Metro Board's attention two years ago, yet still not addressed in this recent publication, "Hawthorne Option: Key Issues and Responses September 2025."

Since this route deviation has to be purposeful, it begs the question, "What for?" And secondly, "Who directed it?" Since much of the decision making has centered around costs, we're left with the obvious: an intentional design flaw to pad the numbers. The implications of this behavior on a project of this size and importance should have all Board Members re-thinking the efficacy of this recent publication and Metro's leadership overall.

To whom it may concern
Please consider the Hawthorne Blvd option. I am a Torrance resident and truly believe this option makes the most sense for the future. Hopefully you consider a small voice in a sea of activists who can organize and drown out others. I am not alone in my concerns that light rail belongs on a transit corridor.
Thank you for your time

Dear Metro Board,
I write this email in support of the hybrid alignment on the K Line South Bay extension. Don't let a tiny number of people ruin an amazing project for the rest of us. The cancellation of this project will leave Los Angeles as a car-dependent mess, and the switch to the Hawthrone alignment will be so much more expensive, and that's money we don't have! The people opposing this alignment and project are, quite frankly, incorrect in every conceivable way. I am a young person who would like to be able to be proud of my city and be able to live here for the rest of my life. This project is part of myself and young people across LA to get that chance. Don't let a few old people (who are somewhat responsible for the current exodus of many young people in the first place) ruin it for everyone. Support the future of this city, and please approve the Metro K Line South Bay Hybrid Alignment!
Thank you for reading this,
Guy Franklin

To the board clerk team members at metro.net . . .

I am willing to agree that I will keep with the two new stopovers for the Metro K Line South Extension to the Redondo Beach Galleria Transit Center and to the Mary K. Giordano Transit Center in Torrance.
Let's hope that the cities of Redondo Beach and Torrance should accept that approval completely until it's potential opening in Early March 2034.

Also, please let me know if either one of the board clerk team members should also accept with the upcoming Metro C Line Eastern Extension to the proposed Imperial/Pioneer Station, the Norwalk Civic Center Station, and the Norwalk Metrolink Station if the city of Norwalk should accept that other approval completely maybe after the year 2034.

Finally, we should all know that when exactly the Metro E Line Extension will take place in order to start construction to Montebello in the year 2035, and to Downtown Whittier in the near future like in the year 2037 upon completion for that approval.

Thank you all so very much for your generosity.

Yours Sincerely,

JOSE DENNIS ALABASO

As a resident of Torrance who works in El Segundo, I have been excited to hear the progress Metro has made over the last several years towards better serving the South Bay region, and delighted to hear the route along an existing Metro-owned freight ROW, which is significantly cheaper, serves another large transit driver in the Redondo Beach Transit Center, and less prone to delaying complications from CalTrans, had been selected.

Which is why I am severely disappointed to hear that a vocal minority of homeowners are attempting to kill this project on completely delusional grounds. This project will not affect ANY of their homes, will help the environment, connect communities, and will, in fact, make the existing freight corridor, which THEY BOUGHT THEIR HOUSES NEXT TO, significantly safer.

If the Metro Board caves to this hogwash and reroutes, or worse, cancels this desperately needed transit link, I and many others who live, work, and vote in the South Bay will be FURIOUS. Please don't let it come to that.

Sincerely,

Jonathan Balcewicz

Please select the Metro staff recommended hybrid LPA. It provides the most obvious route with a direct connection to the Redondo Beach transit center and will actually improve the rail corridor while also being the cheapest to construct. This is a key link to one day realize the full potential of this line reaching Long Beach which will be transformative to all of southern Los Angeles.

As a Redondo Beach resident, this project should not spend nearly a billion extra taxpayer dollars to disrupt the community for years, remove businesses and bow to the complaints of the few residents who already live with an active railway. The extra money saved with the hybrid alignment is much better spent on the Sepulveda pass heavy rail project, which is also critical to the system and city as a whole.

Olá,

As a tax paying resident of Los Angeles county for the past 15 years, I cannot stress enough my support of the HYBRID LPA. In a city that is choking on smog and perpetually stuck in traffic, we DESPERATELY NEED as many public transit options as possible. Also, a city that's drowning in debt, we need the cheaper option. (hence the HYBRID LPA). Think about the long game, this extension is vital for a future connection to the A line in Long Beach thus giving people a cheaper option to reach LAX.

Please for the love of god stop listening to NIMBYS who are a cancer to public infrastructure. They are ruining society for everyone around them for their own (absolutely ridiculous) selfish reasons. More transit benefits ALL of us. Less cars on the roads, less time in traffic and better mental Health / quality of life for everyone.

Thank you,
Nicholas Fernandes

I'm a Redondo Beach resident who doesn't drive and relies heavily on Metro to leave the Beach Cities and I would just like to speak up against the Hawthorne alternative and the people who are pushing it. I don't know what they say in their statements to you, but behind your back they rail against Metro, accuse your employees of lying in the fEIR, and misrepresent your CBO program as paid astroturfing to manipulate this vote. At the last meeting I attended (South Bay COG transportation committee), they accused Metro of paying us to give public comment. Please don't vote against the EIR and for the Hawthorne alternative to please people who hate your agency and spread conspiracy theories to tar your reputation over your own employees and the people who rely on you as our primary mode of transportation.

Please have some pride in the work your agency has put into this project so far, and please believe in your own employees' recommendation.

Honorable Board Clerk,
Please find a letter related to January 22, 2026 Board Agenda item 11.1, Board Report 2025-0818. The attached letter comes from the Redondo Beach Mayor and City Council members voting on the issue, opposing the LPA Hybrid ROW option in favor of the Motion submitted by Mitchell, Sandoval, and Dupont-Walker, in File #: 2026-0037 moving that the Board direct the Chief Executive Officer to:
APPROVE the Hawthorne Option, a 4.5-mile light rail line with two (2) stations that extends from the existing Redondo Beach (Marine) Station at its northern terminus along Hawthorne Boulevard before rejoining the Metro Right of Way south of 190th Street to its southern terminus station at the Torrance Transit Center, as the Project (Project);
Please submit and file the letter for the Meeting Record.
If there are any additional steps required, please let me know.
Thank you.

To the Metro Board-

About Item #11 on Thursday's meeting on Jan 22, 2026, I am writing this email to provide support FOR the C Line Extension to the Torrance Project. This line that will be named as the K Line is an extension project that will support many residents' abilities to access more areas within the South Bay more easily and efficiently, removing many transportation barriers to getting to Redondo and Torrance without an automobile.

I urge the board to move forward with approving the project and helping residents increase accessibility.

Furthermore, concerning item 33 on the agenda, I am in support FOR the SB 677 adoption and urge the board to APPROVE the adoption of the SB in order to provide some clarity on how to move forward with housing development around transit zones. Thank you!

Dear Metro Board,

I am writing to ask that you certify the Draft EIR for the Hybrid LPA for the South Bay Extension to Torrance.

I fully support the project overall and think this alignment is the best option which takes advantage of the existing Metro owned right of way via a grade separated track while also adding improvements to the existing neighborhoods. It is critical that the project is not cancelled or further delayed by looking into more costly alternatives.

Thank you for advancing high-quality transit in the region.

Dear Metro Board Members,

I am writing in advance of the Board's Thursday, January 22 consideration of Items 11 and 11.1.

If this Board certifies the Hybrid ROW alignment, it places itself, starting today and well into the future, in a position of deep public distrust, heightened regulatory scrutiny, and escalating legal, operational, and financial exposure. These risks are not theoretical. They flow directly from choosing a higher-impact alignment when a demonstrably safer, lower-risk, and publicly supported alternative exists.

At least three municipalities and their residents have formally urged selection of the Hawthorne Boulevard alignment. A fourth now joins that majority, based on clear, documented safety, environmental, operational, and community reasons. All of these positions were developed without the use of privately funded public relations campaigns or paid messaging. They reflect genuine community analysis and public-interest judgment, not manufactured outreach.

Importantly, the Mitchell-Sandoval-Dupont Walker motion recognizes the practical advantages of the Hawthorne Boulevard alignment, including stronger access to existing businesses, retail corridors, and regional destinations, as well as compatibility with planned growth such as the more than 600 housing units proposed within the South Bay Galleria improvement plans. These are concrete land use and mobility benefits that support ridership, economic vitality, and long-term system value.

The human dimension of this decision cannot be minimized. The fear and housing insecurity associated with displacing even a single residential family matters, especially in today's severe housing shortage. For many residents, relocation does not mean simply finding another equivalent home. It often means losing an affordable, stable sanctuary that cannot realistically be replaced in the current market, even with assistance. The resulting long-term health consequences, loss of stability, erosion of community ties, and degradation of overall quality of life carry lasting social and human costs.

At the first re-established C-Line community meeting, following a period in which the project had been effectively dormant, a resident suffered a medical emergency. That moment underscored the real and immediate stress this process has placed on people's health and well-being.

Many individuals continue to live with ongoing fear related to displacement, safety, and long-term stability, while also confronting the significant and unavoidable impacts identified in the environmental reports. Importantly, these impacts are in fact avoidable through selection of a lower-risk alignment. These impacts are not abstract. They are already occurring.

While acquisition of commercial or industrial properties may be mitigated through established business relocation and startup assistance programs, residential displacement is fundamentally different. Homes are not interchangeable assets. Families do not simply relocate a sanctuary, social fabric, affordability, and stability in the same way a business relocates operations. Treating these impacts as comparable understates the human cost.

Beyond displacement and stress, the Hybrid ROW introduces avoidable safety and infrastructure risk. The corridor contains active pipeline infrastructure that requires long-term integrity protection, coordination, and ongoing monitoring. Any relocation, reinforcement, padding, or protective measures still intersect with subsurface conditions that have not yet been fully characterized for long-term soil integrity and cumulative disturbance risk.

The Torrance Refinery has indicated that continuous jet fuel distribution to Los Angeles International Airport cannot be halted. Any disruption, sequencing conflict, or integrity issue therefore carries implications that extend far beyond the immediate corridor, affecting regional transportation reliability and broader economic activity tied to LAX operations. These risks are not confined to a single neighborhood; they scale regionally and nationally.

An elementary school and a high school in Lawndale are located approximately one block from the corridor. These sensitive receptors were not meaningfully addressed in portions of the project's analysis, despite their obvious relevance to safety, exposure, and community protection. Overlooking nearby schools in proximity to expanded rail and freight activity elevates both public concern and regulatory vulnerability.

In addition, the Hybrid ROW materially increases long-term liability, insurance exposure, and

institutional risk. Co-locating commuter rail with hazardous freight operations, pipeline infrastructure, dense residential receptors, and nearby schools increases the probability of injury related to health impacts, property damage, and cascading claims over the life of the system are a mere few mentioned. These risks persist for decades across operations, maintenance, emergency response, and unforeseen incidents.

Emergency access considerations here are not about routine daily service disruptions or minor incidents. Considerations of catastrophic and multi-system scenarios such as derailments, pipeline integrity failures, hazardous material releases, and compounded infrastructure events requiring rapid multi-agency access, evacuation coordination, and sustained incident command under constrained physical conditions.

While operational plans contemplate spatial and temporal separation between freight and commuter activity, real-world emergency conditions inevitably create circumstances where freight movement and commuter operations overlap or converge during incidents, recovery operations, or service restoration. This co-presence cannot be fully eliminated in practice and increases both complexity and consequence severity.

From an institutional perspective, these conditions translate directly into higher long-term insurance premiums, underwriting scrutiny, claims exposure, litigation risk, and reputational vulnerability. These liabilities become embedded in Metro's operating risk profile and compound over time.

Analytical Integrity and Independent Review

Beyond physical risk, the integrity of the underlying technical record itself warrants independent scrutiny. While staff and consultants have invested significant effort over many years, the Board ultimately bears responsibility for whether the analysis supporting certification is accurate, unbiased, and internally consistent.

Residents and independent professionals have identified material discrepancies in portions of the technical work. For example, in one instance, noise monitoring locations were documented as being positioned significantly different from the stated locations, including variances on the order of approximately ninety feet in one case and forty feet in another. These are not isolated issues; there are numerous additional discrepancies that cannot reasonably be cataloged within a single email and warrant independent verification. Measurement accuracy matters because these inputs directly affect modeled impact conclusions..

In addition, retired engineer Dr. Holly Osborne and retired aerospace engineer Ray Holler have raised multiple concerns regarding mathematical assumptions, engineering measurements, and analytical methodology within portions of the project materials. These are not casual critiques; they come from individuals with deep technical training who are accustomed to

precision, validation, and error checking.

When technical inputs contain unresolved discrepancies or unverified assumptions, the resulting conclusions inherit that uncertainty. Without an independent, neutral review lens, the Board risks certifying a record that embeds avoidable analytical weakness.

Regulatory Implication: Certification based on disputed measurements or unresolved technical discrepancies materially increases vulnerability to regulatory challenge, audit scrutiny, post-certification credibility risk, and future exposure related to the reliability of engineering analyses, benefit calculations, forecasting assumptions, and the defensibility of projected performance outcomes.

Major capital agencies succeed when project decisions align with long-term fiscal sustainability, operational reliability, environmental responsibility, and public trust. When those pillars diverge, agencies inherit avoidable downstream risk: regulatory challenges, funding uncertainty, community opposition, and erosion of institutional credibility. These are precisely the risks this Board has consistently stated it seeks to avoid across all capital programs.

The Hawthorne Boulevard alignment offers a clear and responsible path that reduces exposure across all of these dimensions. It improves access to existing commercial centers and planned housing growth, avoids placing new rail infrastructure in immediate proximity to sensitive residential receptors, schools, hazardous freight activity, and pipeline infrastructure, minimizes displacement pressure and long-term community harm, and provides a more stable platform for delivery, funding confidence, operational resilience, and public acceptance. It is the alignment that demonstrably reduces risk while delivering greater public benefit.

This decision ultimately calls for setting aside any agendas, momentum, or external pressures and exercising the duty this Board was entrusted to uphold: protecting public safety, preserving community stability, maintaining fiscal discipline, and safeguarding institutional integrity. The Board's role is to choose the alignment that best serves the public interest, not the path of least resistance.

I respectfully urge the Board to advance the Hawthorne Boulevard alignment and to choose the option that reduces harm, protects residents, strengthens public trust, and positions Metro for durable long-term success.

I also want to acknowledge and thank Board Members Mitchell, Sandoval, Dupont-Walker, and Butts for their leadership, careful consideration, and willingness to engage thoughtfully on the merits and risks associated with the alignment decision.

Summary of Key Risk Considerations for Board Review

- **Residential Displacement & Quality of Life:** Irreplaceable loss of stable homes during a severe housing shortage, long-term health stress impacts, and avoidable degradation of community stability.

- **Sensitive Receptors:** Elementary and high school located approximately one block from the corridor were not meaningfully addressed in portions of the analysis.

- **Pipeline Integrity, Soil Uncertainty & Fuel Continuity:** Active pipeline infrastructure intersects with unresolved subsurface conditions. Torrance Refinery has indicated jet fuel distribution to LAX cannot be halted, scaling risk beyond the immediate corridor.

- **Liability, Health Risk Probability & Insurance Exposure:** Increased probability of injury, health impacts, property damage, long-tail claims, higher insurance premiums, underwriting scrutiny, and embedded institutional risk over decades of operation.

- **Catastrophic Emergency Response Constraints:** Emergency access concerns involve multi-system incident scenarios, not routine service disruptions, requiring complex multi-agency coordination under constrained physical conditions.

- **Unavoidable Freight–Commuter Co-Presence in Emergencies:** Operational separation cannot fully eliminate overlap during incidents, recovery, or service restoration, increasing consequence severity.

- **Analytical Integrity & Independent Review:** Documented discrepancies in measurement accuracy and engineering assumptions identified by qualified professionals raise record defensibility concerns.

- **Governance & Regulatory Exposure:** Elevated vulnerability to regulatory scrutiny, audit review, post-certification challenge, future engineering reliability concerns, benefit modeling defensibility, and institutional credibility risk.

Thank you for your consideration.

Respectfully,

Karen Ruby

LA Metro Board Clerk,

Honorable Chair Dutra and Members of the LA Metro Board,

I was born and raised in the South Bay, and my family still lives there. Many of them are older, not wealthy, and have limited transportation options. I strongly support the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. This option uses the existing rail corridor with grade separations and mitigations to improve safety and reduce noise, while adding new bus connections and better bike and pedestrian access. It delivers clear community benefits and a realistic path to construction.

The South Bay remains a transit desert, and this extension promised in Measure R and Measure M is long overdue. Reliable rail access would help me, my family and others like them get around more easily while staying connected to jobs, services, and loved ones. The Hybrid LPA is more feasible and cost-effective than the Hawthorne Option and has broad support from the City of Torrance and local organizations. I urge the Board to uphold the staff recommendation.

Dear Metro Board Members,

On behalf of Gaburi Chicken, a local restaurant serving the Torrance community, I am writing to express our strong support for the C/K Line Extension to Torrance and the certification of the Final EIR under Item 11.

While we are unable to attend the Board meeting in person, it is important for us to share our support on the record. Improved transit access is essential for local businesses like ours, as it benefits our employees, customers, and the overall vitality of Downtown and Old Torrance.

We respectfully urge the Metro Board to approve the Final EIR and move this important project forward for the long-term economic and community benefit of the South Bay.

Thank you for your time and consideration.

Sincerely,

Hiroyasu Kato

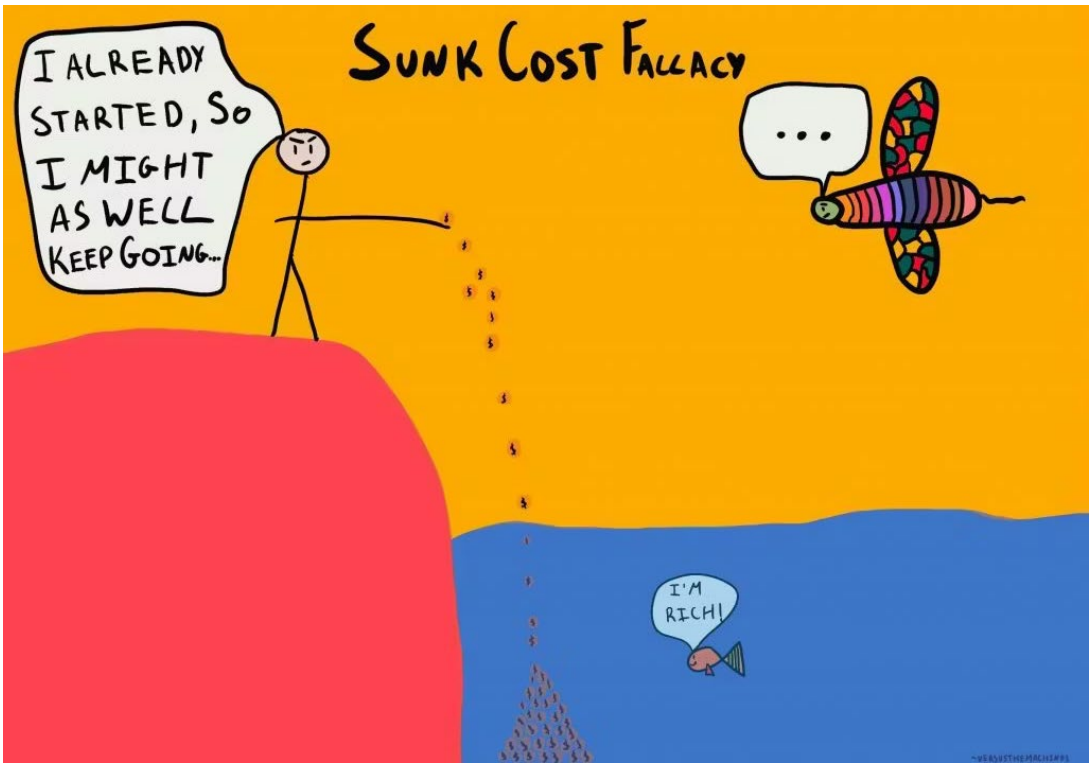
To: Chair Dutra, METRO Board members, and other interested parties,

The Hybrid "LPA" for the C/K Line Extension South to Torrance does NOT represent a thoughtful solution, only a mindset of "***hey we already have this property, so let's spend LOTS of time and money defending how to squeeze a square peg into a round hole!***"



As Metro's Final EIR (FEIR) explicitly details, **multiple** eminent domain acquisitions of private properties along the freight corridor **are required** to accommodate elevated guideway, dangerous underground petroleum lines will need to be realigned, hundreds of old-growth trees must be removed, and the freight tracks must be demolished, moved over and rebuilt- all with a few feet of private homes!

Taxpayer funds from Measure M and R—half-cent sales taxes approved for passenger transit—**should not be used to subsidize "upgrades" to a privately owned freight corridor, which only requires rebuilding because Metro requires relocating it to fit two new light rail tracks along side of it, on the rail right-of-way (ROW)!**

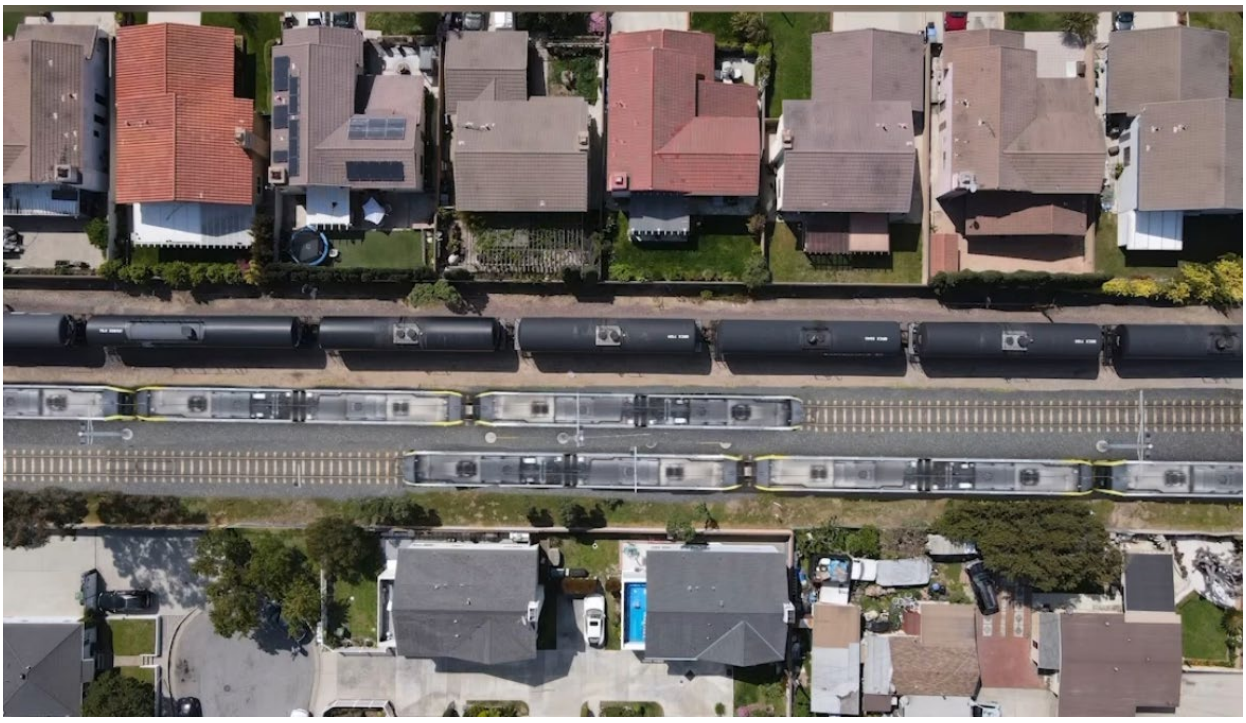
This is NOT what most of the Southbay wants; it's only been accepted because of the false narrative that "the metro extension can't happen AT ALL if it doesn't go down the ROW." We have heard this from day one!

Funny, because that would imply that METRO staff has been gaslighting all of us by pretending to thoroughly and thoughtfully comparing the two routes as viable options. Huh…

ALSO…Please don't do Lawndale any favors! **We don't need any "gifts" that we didn't ask for and don't want!** *You would know this if you had ever bothered to talk to us…* **Rubber-banding cryptic flyers at the very last minute to our fences is NOT engagement!**

Lawndale residents **don't want a cement walking path! We want public transportation where we already use it: ON HAWTHORNE BLVD.** We deserve to keep our hundreds of trees and grass that our tax money has been used for decades to make this the ONLY PUBLICLY ACCESSIBLE green space with big mature trees that is available to everyone at anytime in our city! The other limited green spaces with any trees belong to a few elementary schools that the city agrees to share, and are off limits to the public when school is in session and on most holidays. IE: MOST OF THE TIME!

Also, we don't need METRO to "fix" the noise of the freight trains. We are not complaining about the existing freight operations, which only rumble by a few times a day—AND NEVER IN THE MIDDLE OF THE NIGHT—underscoring that this "**modernization" only serves Metro's needs, not community desires!** On the other hand, having the light rail here could very well mean that BNSF will be inclined to only use the corridor when the light-rail is not in use- **between 1am and 4am!**



Misinformation on timeline, ridership, and benefits must stop. The promised "under-19-minute ride" from Redondo Beach and Torrance to LAX overstates benefits, as the FEIR notes no superior speed over buses, while the Hawthorne Blvd alignment provides similar K Line connectivity and first/last-mile options. Claims of fulfilling Measure R/M ignore that these funds target passenger rail, ***not private freight enhancements Metro must fund due to its own alignment choice!***

Exaggerated economic and funding claims make our engineering friends just cringe!
Projections of "15,000 jobs and 1.5 million new riders" exceed FEIR estimates of 11,500 daily trips, unproven amid ridership drops, and ignore induced demand worsening 405 congestion.

And who even knows the cost and complexity involved with moving seven sensitive petroleum pipes so close to private homes? Specific costs for relocating these pipelines remain undisclosed in public Metro documents, as the Hybrid is only 15% designed, with utility coordination ongoing but not finalized. The FEIR evaluates utility relocation impacts broadly (Chapter 3.11), treating them as "standard mitigable effects" without itemized petroleum pipe expenses, **which could balloon the $2.23 billion (2022)** estimate amid inflation and seismic risks in an earthquake-prone area. Is Metro just going to ignore this issue and have a contractor come in and handle it later, at a ballooning cost ? **We all saw how well this worked out with the LAX People mover…**

The "secured $1.4 billion" invokes sunk-cost fallacy, advancing the Hybrid ROW option despite FEIR-noted property takings and much higher risks, when Hawthorne Blvd avoids the negative impact on **hundreds of Lawndale family homes (in favor of protecting a Torrance Volvo dealership, which will suffer a support pillar in their lot ?!?) Oh, the irony of public transit favoring a car dealership over an entire community in Los Angeles, huh? History repeating.**

Hawthorne Blvd achieves identical transit outcomes as the Torrance politicians and the METRO CBOs keep repeating as a mantra: K Line links to jobs/housing under 25 minutes, LAX access—using surface LRT with bus priority, per FEIR alternatives analysis, while skipping residential impacts and private freight costs.

Also, the METRO CBO's should correct their misleading messaging: **The FEIR confirms no complete bike trail under Hybrid from Lawndale to Redondo Beach** Transit Center, and does not come anywhere closer to Del Amo mall, is at least a 19 minute walk from the bus stops on Hawthorne Blvd, blocking active transport equity. This could be achieved with Hawthorne Blvd!

The Hybrid ROW option inflicts toxic demolition very close to family homes, eminent domain (detailed in FEIR's Real Estate Acquisitions Report), noise from construction/operations, and severed neighborhoods via multiple walls and fencing barriers, destroying hundreds of large trees , all violating justice principles when Hawthorne preserves cohesion, safety and environmental equity and spreads the "pain" of the construction inconvenience across multiple cities. **That's just plain fair!**

"Transit centers" like Redondo Beach's are mere bus bays at this point —**easily relocated surface stops with no rail platforms built**—and offering no fixed rail infrastructure at this point. Diverting existing bus routes off of Hawthorne Blvd, down a side street, behind a cemetery, is widely seen as annoying and ridiculous! Yet, certification of the ROW locks in these harms over resident-preferred, lower-impact paths.

Has Metro even bothered to ask riders how they feel?! THAT IS NOT A RHETORICAL QUESTION; because did you only rely on Torrance officials for guidance?

https://www.instagram.com/reel/DTecrUkkSjZ/?igsh=NTc4MTIwNjQ2YQ==

DON'T DUMP MONEY INTO THIS SUNKEN COST PIT! PIVOT! Do the right thing for ALL OF US in the Southbay!

Honorable Metro Board,

I'm writing today in SUPPORT of the hybrid LPA, the Metro staff recommended option. As a 29 year old aerospace engineer who wants a transportation option that affordably and environmentally gets me to potential jobs, I want the lowest cost option that has the highest likelihood of being built.

The metro board should look no further than California High Speed rail for an example of cost and schedule overruns when an option that doesn't use already-acquired right of way is selected. The hybrid LPA does not have this problem. My generation is going to have to deal with the economic and environmental consequences of your vote today. Please listen to our voice.

I’m very upset… because was Metro only ever pretending to consider Hawthorne Blvd?!

In multiple Metro meetings, Metro representatives have claimed they are working hard to repair eroded trust from communities, that they no longer want to blast through and destroy neighborhoods. They say they are listening and this helps us. They say they also are very conscientious about replacing trees or bushes; 2-1. They say they will also assist businesses who might be impacted by construction. etc.

The ownership argument of the ROW no longer carries weight since we now know they do buy up “excessive property acquisitions” and sell them after it’s determined they won’t be using it. For all these reasons, the ROW is not attractive, and Hawthorne (elevated) is looking even better.

We deserve better, METRO!

Hello Chair Dutra, et. al,

Winter session began last week, and since the vague rumblings of this project has been in the zeitgeist for so long, I make it a habit to ask my students about it. El Camino College is close to this project, and has thousands of young Metro riders.

Yet, I've never found that there was ever any student awareness of the C/K line coming to Torrance, especially the controversy over which alignment alternative it might take. That is, until last fall, when the people of Lawndale invited the student newspaper to do a story about their community meeting, which they put together after being frustrated with Metro's lack of timely engagement.

The meeting was held to keep the community informed—with what they could find out from various sources—since Metro was not being forthcoming to Lawndale's city officials or the community!

Unfortunately, the student reporter, wanting to get "both sides" dropped much of the critical content describing the meeting, and her lengthy interviews with impacted residents. Instead, she was pulled in by Briana Egan, head of SouthBayFwd, and given a tour of the new K like with Metro staff, who told her that the hybrid ROW alignment would be good for EL Camino College students.

But this is NOT what students want. **They were never even asked!** The closest Metrorail station will STILL be the Rosecrans station, and the bus routes that students take are on Crenshaw Blvd OR Artesia, with many students living in the impacted neighborhoods of Lawndale, Hawthorne, and Redondo Beach!

The main transit stop is Crenshaw Blvd & Manhattan Beach Blvd and it is directly adjacent to campus and connects by bus to Crenshaw Station on the C Line. The ROW alignment isn't even helpful for the many students in North Torrance!

All of these cities voted for the Hawthorne alternative, and if these students had been asked, they would've said the same!

Dear Metro Board,

I'm a young Lawndale resident imploring you to vote NO on Item 11 at this Thursday's board meeting.

I'm 23 years old, and I was born and raised here in Lawndale, just a few houses away from the row.

I recently spoke at a community meeting at William Green park in Lawndale, where I gave a short speech about why the metro should not be built right through our community green space. I am copying the speech below

> "My name is April, I'm a recent college graduate and I was born and raised here in Lawndale. I participated in our city's Youth Advisory Committee for years, where we planned events for the youth of Lawndale.
>
> When the pandemic hit, and suddenly school and all my extracurricular activities were canceled or moved online, the ROW became my default third space. For those who don't know, a third space is a place outside of work and the home which provides leisure, community, and relaxation. I'd walk there nearly every day, and it became a ritual of calm reflection and enjoying this natural green space we have here in Lawndale.
>
> So I was saddened to hear that Metro was planning to demolish this space to run the Metro line to Torrance. Now, don't get me wrong: I'm *very* pro-public transportation. I don't own my own car, and I lived abroad for a year, where public transportation was cheap, ubiquitous, and reliable, unlike it has been

historically here in Los Angeles County. I know first-hand how good public transit connects communities, increases equity, and overall makes life better.

It's a good thing, then, that there's a way for Metro to complete their project *without* destroying our community green space: go down Hawthorne.

If Metro chooses to build the K-line down our community green space, not only will Lawndale lose its biggest source of public trees and grass, but we as residents will be exposed to the environmental and safety externalities of this project. These include tree removal, noise, toxic dust, and extreme proximity to family homes. Moreover, Urban tree canopy is crucial for improving air quality, reducing urban heat, managing stormwater, providing shade, and supporting biodiversity. Loss of mature trees can exacerbate heat vulnerability and environmental health disparities, especially in historically underserved communities like portions of Lawndale.

So, Metro, if you're listening, I implore you: Build the K-line down Hawthorne. Let us keep our green space. Let our community maintain our dignity, health, cohesion, and self-determination. If you do otherwise, you're establishing yourselves as perpetrators in a legacy of environmental injustice forced upon already under resourced communities. Let your legacy be a positive one instead. Become an example to public transit companies and organizations throughout the nation by showing that we can connect cities without destroying communities."

I urge you to vote NO on Item 11 and pursue the Hawthorne alternative that serves both transit goals and community preservation.

All the best,
April

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

"As a resident of LA County, BLAH BLAH BLAH." This is from the Metro-staff the sponsored CBO "SouthBay Fwd's tool kit." They are getting paid to rig this K-line project and you, as the Metro board, are unwittingly letting them get way with usurping the public's voice with Metro funds! This is what collusion and deception look like.

Please ignore all of these lazy form letters with canned statements. I am hijacking this silly firm with some real talk:

This group of folks are NOT in the affected area of this project, but are on activist/trajectories and just don't care about anything but winning this project for a feather in their political cap.

They are conflating the facts by saying that ONLY the hybrid ROW option will gain these transportation advantages, and completely ignoring the harm to the local community, or the fact that the cities of Hawthorne, Lawndale, Hermosa Beach, and Redondo Beach ALL want this project on Hawthorne Blvd.

https://www.instagram.com/reel/DThaw1lDUut/?igsh=NTc4MTlwNjQ2YQ==

Members of their groups have been rude, classist and dismissive online, have shouted down Lawndale speakers at SB COG meetings, have zoom-bombed our community meetings, and are just blatantly disrespectful.

This is a once in a generation project that needs to be done RIGHR: it belongs on Hawthorne Blvd!

LA Metro Board Clerk,

Hello!

Don't believe the hyperbole that the ONLY way Metro will ever connect the SouthBay to LAX is if it plows through Lawndale via the hybrid ROW— and it has to be done RIGHT NOW! That is just ludicrous!

I will be continuing to go to the airport from my existing Redondo Beach station on Marine, thank you very much. The busses drop off here already and it's also closer to where I am going (ie: downtown or the airport!) than that oddball RB transit station rail stop would be! Who thought this new RB transit center station was a good idea?

Also… Why do we need TWO Redondo Beach stations anyway? WAS THIS JUST A WAY TO SECURE THAT THE RR path WOULD BE USED? The transit center belongs in a transit corridor!

It's truly obscene how that little community has been discounted and gaslit. I can't believe the vitriol spewed toward them; it's just embarrassing.

LA Metro Board Clerk,

Dear Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear pathway to construction.

The South Bay is a transit desert and desperately needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

Thank you for your time,
Jonah

My name is Cathy Mantell and I reside along the ROW in Redondo Beach.

I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard, NOT the hybrid ROW.

The Final EIR should not be certified because it does not show the true cost of the project by including the removal and relocation of the 7 gas pipelines underneath the ROW. Further, the ROW is simply not wide enough to accommodate a freight train and two light rail tracks. Significant and unavoidable impacts that will be permanent are also identified.

Community support is behind Hawthorne, NOT the hybrid ROW. Metro polls showing otherwise are skewed and were based on faulty premises.

Metro's own studies show that Hawthorne will have a 35% higher ridership because it will be located in a commercial corridor and exactly where the old Red Car used to run.

This is a generational decision. Please do the right thing and extend the line down Hawthorne Boulevard.

Thank you.

Cathy Mantell

Metro Board and Other Interested Parties,

My name is Joyce Warren, and as a third generation Lawndale resident, I strongly oppose the ROW and support the Hawthorne Blvd elevated option.

At this point, you all understand the physical, financial, and environmental dangers the ROW option poses to the residents of our communities. (The fear of living next to such a volatile mix of trains and hazardous materials, literally keeps many of us up at night.) The Hawthorne Blvd option would provide an economic boost to the area, preserve home values and green spaces, and likely have an increased ridership.

You have the facts. But at this moment, do you have the courage to make the right decision for the people who will be impacted the most? Do you have the compassion to recognize that, for many of us, this project will disrupt homes and communities built and sustained over generations?

For decades, the South Bay has felt like a place where government and governance contained human elements. Where residents could, should, and did reach out to the folks who purported to make decisions on their behalf and in their best interest. Please, listen to the people whose homes and way of life would be severely impacted by this decision. Please, listen to the studies and research that show the Hawthorne Blvd option is viable and preferred.

Many thanks,

Joyce Pualani Warren, PhD

Hello,

My name is Alyssa Collins, I live in Los Angeles, and I support the Hawthorne Blvd elevated option and **strongly oppose** the ROW option. The Hawthorne option will revitalize Lawndale, boost the economy, preserve green space, and increase ridership, among many other benefits. Hawthorne Blvd is already designed for commuter railway track and previously housed the Pacific Electric Red Cars.

The ROW option is opposed by entire communities, as it poses significant physical, financial, environmental, and emotional risks. It will decimate communities that have existed for generations.

Please support the Hawthorne Blvd elevated option.

Thank you,
Alyssa Collins

Honorable Chair Dutra and Directors of the LA Metro Board,

I want the C/K Line Extension to Torrance Hybrid LPA. It is infuriating that Supervisor Mitchell has done this last minute corrupt, backroom deal that ignores staff expertise and public opinion. It is confounding that she is once again listening to the unwarranted complaints of a handful of NIMBYs over the well-being of millions.

I don't understand why she wants to align with the likes of the MAGA right-wing politicians who are the majority of the Hermosa Beach City Council, who ignored that 9 out of the 10 comments at their meeting from actual Hermosa Beach residents were in favor of the Hybrid LPA.

Studies show the most economical and quickest to build is the Hybrid LPA route.

I urge you to support the Hybrid LPA.

Dear Metro Board,

I am strongly in favor of the K-Line extension (formerly C-Line) into the South Bay community.

We have been left out, in terms of using public transport, esp for those of us in the lower South Bay. The transit centers have simply been too far away to make riding trains or light rain worthwhile. By the time you drive there, you might as well just drive the rest of the way.

This line will greatly benefit So. Bay residents of LA County. I urge you to vote "Yes" on the plan.

Sincerely,

Honorable Metro Board Members,

I urge you to do the right thing and vote for the C/K Line to Torrance on the Right of Way Hybrid LPA as Metro Staff have recommended.

I am a lifetime resident of Southern California, a 40 year resident of Torrance and an active member of our community. For decades Torrance residents have been waiting for light rail service.

For way too long Torrance has been considered a " donor" community to Metro. The more than $100 million in Metro Tax collected in Torrance every year has paid for light rail throughout the county - but not here.

It is time for true equity in Metro projects. But, please do not listen to the loud voices of a few folks from nearby cities that would rather impact Hawthorne Boulevard with an elevated light rail that has a planned stop next to a failed mall.

I know you agree that it is time to complete this project. Please support the staff recommendation and vote YES on the Hybrid LPA on the Right of Way.

Thank you for your time.

My best,

Terry Furey

Hello LA Metro, my name is Faraz, I use LA Metro everyday to work in the South Bay region, and I strongly support Item #11 for the Metro staff recommendation to use the Hybrid Locally Preferred Alternative. But I am opposed to item #11.1 to use the Hawthorne Blvd alternative.

I heard from Director Mayor James Butts during the Jan 14th Planning Commission that he was very concern about the budget fiscal cliff and that LA Metro needed to find ways to cut back on expensive projects. And yet that same Director wants to pick the Hawthorne Blvd alternative, which is much more expensive than the Hybrid LPA alternative. Hawthorne Blvd also needs more time to construct and get approvals (example: Hawthorne Blvd goes into the 405 FWY property which means LA Metro needs approval from CalTrans). And additional properties are needed on the Hawthorne Blvd alternative (both to purchase & eminent domain) compared to the Hybrid alternative which LA Metro already owns the properties to build at.

It appears that Item #11.1 is there to sabotage the Torrance extension by delaying it (and worse, cancelling the project). South Bay residents and workers deserve rail transit and it should have been built yesterday (not today). So please LA Metro Board, approve Item #11 and please get this project constructed asap so that raising costs doesn't destroy the dream of rail transit from LAX to Torrance to Long Beach.

Thank you for your time in reading this.

Sincerely,
Faraz Aqil

Dear Metro Board,

As a resident of the South Bay, I am writing in strong support of approving the final EIR as written for the ROW alignment on the C/K Extension to Torrance. This project has gone through years of study, comments and feedback to get to this point. The ROW is by far the cheapest available option available, and any other alignment heavily risks a no-build outcome due to budgetary and political reasons, which is simply unacceptable in this case.

The alignment is fully grade-separated on land Metro already owns, and would displace no residents and require no additional acquisition of property. This project is an absolute lynchpin in the future of offering modern rail services to all South Bay residents. This is quite literally a "think of the children" moment—think of the children and grandchildren and beyond which will benefit from this project. My children and grandchildren, and even the children and grandchildren of the opponents of this project, will benefit from it.

Please, *please* vote in favor of the ROW.

Respectfully,

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a patron of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

I would hate for the South Bay to be left behind as other metro areas modernize their public transit. The nature of a transit desert would negatively impact the South Bay's economy as more and more people start moving away from car transport due to greater availability of public transit in other areas.

I urge you to ensure this doesn't happen by voting for Item 11

Hi! I'm an LA resident and Metro commuter writing to voice my strong support of the Hybrid LPA for the South Bay Extension since I cannot attend the Metro meeting on Thursday.

Thank you,
Graham Messadieh

Hello,

I am a 30+ resident and homeowner in Torrance. I work in Torrance as well.

We have been wishing for years for the metro train to connect Torrance to the airport, DTLA, West LA, etc so we don't have to drive, be in traffic and try to find parking when we go to different events, day trips and other fun stuff we like to do all round LA and surrounding cities.

As we get older it will be even more important to have metro train transit as we are able to drive less but still want to enjoy all the fun things to do around Los Angeles.

I support the C Line Extension to Torrance and the Hybrid LPA.

Please certify and approve the Final EIR and advance item 11 for staff recommendation.

It has already been too long.

And I hope to see the day Torrance line connects into downtown Long Beach.

Thank you,

Cindy Annulli

Please do the right thing. The south bay deserves good transit:

I support FEIR Cert and Hybrid LPA

Dear Metro Chair Dutra and Esteemed Members of the Board,

I support Agenda Item 11 and oppose Agenda Item 11.1. Metro owns the Right of Way (ROW) on the Locally Preferred Alternative (LPA) under the Agenda Item 11. The Hawthorne option under Agenda Item 11.1 leads to delays and at least an extra $700 million for the same ridership. I urge the L.A. Metro Board to support the staff recommendation, Agenda Item 11 and oppose Agenda Item 11.1.

I support Agenda Item 10 with changes to Modified Alternative 5 as the Locally Preferred Alternative (LPA). I advocate for a stop on Sherman Way as planned on Alternative 5 and an expansion of the Initial Operating Segment (IOS) to the Expo/Sepulveda E Line stop.

Sincerely,
Kevin Dedicatoria
Culver City
Transit advocate

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,
Adam R

Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,
Karim Sahli

Dear Metro Board:

1) I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

2) I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

3) I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. SB-79 also goes hand-in-hand with Metro's pledge of building 10,000 homes near its transit stops. It simply makes no sense for Metro to ask for an exemption from this transformative housing bill, and doing so further reinforces the desires of LA's political ruling class: to strengthen the status quo and protect wealthy homeowners at the expense of the literal livelihoods and homes of lower-income residents.

Thank you,
David Tran

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBYs, the majority of whom have not read the report. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 11. The LPA is a good compromise between local interests and transit rider interests. It gets us what we need in a not unreasonable amount of time and for significantly lower cost.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. The automated heavy rail technology in this proposal has the potential to cause a modal shift in the region, getting a significant number of people out of their cars and greatly reducing traffic on the 405. We need this project to tie the region together.

I oppose Item 33. I campaigned in support of SB-79. I find it appalling that the metro board has decided to act with cowardice on this issue. Metro claims to be already building housing - plans are for 10,000 units. This is comically low. We need at least 100,000 or 1,000,000 units in Metro's jurisdiction to address the crushing housing affordability crisis we face in LA county. SB-79 empowers state and county officials to make those sweeping, necessary changes. Metro staff are concerned that SB-79 interferes with, or in some cases destroys, local partnerships that Metro builds to get transit projects done. This is a valid concern, but I think Metro board members fail to grasp that new partnerships can be forged; such as with community groups who support transit AND housing.

Instead of looking to the future, board members seem fixated on the past in this case; past community groups and past supporters. In dark times such as these, given the reckless actions of the current presidential administration, courage can be hard to find. But courage is like a muscle; the more you use it, the stronger it gets. This is one such time to exercise courage, courage for a brighter future where LA county does not face a housing affordability crisis, where Metro has increased political will for projects from other community groups like Streets for All, and where we can realize the promise of a brighter future for all Angelinos.

For these reasons, I hope the board decides to reject Item 33 - for a potential brighter future for

all Angelinos.

Thank you,
Nathan Schilling

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,
Luis R Garcia Chavez

Dear Metro Board Members,

My name is Cesar Garcia, and I serve on the United Neighborhoods Neighborhood Council. I live near the Expo/Crenshaw hub—an area with incredible transit access but a frustrating lack of housing investment and pedestrian safety. It is a shame to see such high-quality transit surrounded by so little density.

Because I want to see our transit system succeed, I am urging the Board to take the following actions:

1. Support Item 11 and Reject Item 11.1: Do not allow the C Line Extension to be derailed. Spending $700M more for a "worse" route is fiscally irresponsible and ignores the needs of future riders.

2. Support Item 10: I urge you to follow staff's recommendation for Modified Alternative 5 for the Sepulveda Transit Corridor.

3. Oppose Item 33: Requesting an exemption from SB-79 makes Metro look out of step with state housing goals. As a resident of the 90018 zip code, I know that more housing around our stops is the only way to ensure the long-term viability and safety of the system.

Transit works best when people actually have a place to live near it. Please prioritize ridership and housing over delays and exemptions.

Thank you,

Cesar Garcia

Member of United Neighborhoods Neighborhood Council

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. This is a great project and if there are opportunities to speed this up (and the K-line Northern Extension) we should absolutely pursue them. I also look forward to seeing more automatic trains with world-class runtimes added throughout the Metro system.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. Los Angeles is facing a historic, self-inflicted housing crisis that is particularly affecting young families and homeowners like me. Opposing SB-79 is irresponsible, backwards, and embarrassing. We need more dense housing around transit, and Metro of all organizations should support that goal.

Thank you,
Kiersten Stanley

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,
Brenda Nuyen

I live right by the Expo/Sepulveda Station, so SB-79 would have a huge impact on where I live and I FULLY support the changes it will bring. My life has changed and benefited immensely from living near a Metro station. I want as many people as possible to benefit from all the good living near a Metro station can bring them.

SB-79 makes that possible.

Thank you,

Dear Metro Board,

I support Item 10 - please support Metro staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. As a physician working at UCLA Health in Westwood, this project would have a direct positive impact on my ability to use Metro rail transit to get to work, would provide additional high-speed, high-reliability options to all of UCLA Health's staff, and **most importantly would make our offices and hospital more accessible to patients from downtown (via the D line extension), to the west side, to the valley.**

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I would like to send you an email as a Long Beach resident in support of HYBRID LPA and FEIR certification. Our metropolitan area is light years behind the mobility for citizens compared to other national and global metropolitan areas. Delaying this connection from Long Beach to LAX will only hurt the growth of the region. We have many low income workers that could have a much better life if committing didn't require thousands of dollars a year and many hours of high attention traffic. Please do not let some people inhibit the enrichment of the lives of many. Owning a home does not mean you are a more important member of the community. We all live here.

Hello,
I am writing in support for the hybrid alignment for the South Bay extension. This right of way is already owned by the agency, is best for ridership, and hits an existing transit center. It also is already an existing right of way, so the NIMBY complaints of not wanting to be near an active railway ring hollow, as it is already an active railway. The Hawthorne alignment is much worse for ridership, slower, more expensive, and will delay or cancel the project.
If we want Los Angeles transit to be successful, cannot allow decisions to be made by a loud minority of NIMBYs dedicated to preventing improvement of the city. The hybrid alignment was chosen after extensive study and is by far the best alignment for the South Bay extension.
Please vote for the hybrid alignment

Thank you,
Alexander

Dear Metro Board Members & Holly Mitchell (our representative),

We are writing to express our support for several critical policy and project decisions that will shape the long-term effectiveness, equity, and sustainability of Los Angeles County's transit system. Specifically, we wish to:

1. support extending the C Line along the existing freight railroad right-of-way,
2. express opposition to Metro's current stance opposing SB-79, and
3. strongly support the use of heavy rail for the proposed Sepulveda Transit Corridor.

Item 11 - Support for the C Line Extension via the Freight Right-of-Way

Extending the C Line by utilizing the existing freight railroad right-of-way represents a pragmatic, cost-effective, and community-sensitive approach to expanding high-capacity transit. Reusing an established corridor minimizes displacement, reduces environmental impacts, shortens delivery timelines, and lowers right-of-way acquisition costs. It also makes use of infrastructure that has long been designated for transportation purposes, aligning with best practices in urban rail planning.

While some opposition has been raised by a relatively small number of nearby residents, it is important to recognize that this corridor has been actively used for freight rail operations for decades. Individuals who chose to purchase or rent property adjacent to this right-of-way did so with the knowledge that it was an existing transportation corridor with ongoing rail activity. Adapting such corridors for passenger rail, often with quieter, cleaner, and more predictable operations than freight, represents an incremental and reasonable evolution of land use rather than a fundamentally new intrusion that will displace dozens of businesses and homes.

Allowing a minority opposition to derail or significantly delay projects that rely on long-established transportation corridors risks setting a precedent that undermines the region's ability to deliver critical infrastructure. The broader public benefits of improved mobility, reduced congestion, far more cost savings, enhanced regional connectivity, and lower greenhouse gas emissions should remain the guiding criteria for decision-making, particularly when impacts are mitigated and displacement is avoided.

Opposition to Metro's Opposition of SB-79

We are concerned by Metro's opposition to SB-79, which would promote transit-oriented development near high-quality transit corridors. Aligning land use with transportation investments is essential to achieving Metro's stated goals of increasing ridership, reducing vehicle miles traveled, and meeting climate targets. SB-79 would help ensure that public investments in transit are supported by housing and job density, improving system efficiency and rider convenience while addressing the region's severe housing shortage. Rather than viewing this legislation as a constraint, Metro should see it as a complementary tool that strengthens the long-term return on transit investments and supports more livable, walkable communities.

Item 10 - Support for Modified Alt 5 Heavy Rail on the Sepulveda Transit Corridor

Finally, we strongly support the use of heavy rail for the Sepulveda Transit Corridor, and specifically the Modified Alt 5 alignment. This corridor represents one of the most congested travel paths in the nation and demands a solution that offers true grade separation, high speed, and high passenger capacity. While alternatives (or heaven forbid a no-build) may appear less expensive in the short term, they risk becoming inadequate almost immediately upon opening. Heavy rail provides the reliability, scalability, and long-term value necessary to justify the scale of public investment and to meaningfully compete with automobile travel. Given the corridor's strategic importance, this is a case where building the right solution matters more than building the cheapest one.

Closing

Los Angeles has a rare opportunity to make transformative, forward-looking transit decisions that will shape mobility patterns for generations. We urge the Board to prioritize long-term performance, integration, and public value by supporting the C Line extension via the freight right-of-way, reconsidering its opposition to SB-79, and committing to the modified alt 5 heavy rail for the Sepulveda Transit Corridor.

Thank you for your time, leadership, and continued service to the residents of Los Angeles County.

Respectfully,

Greg & Dr. Megan Johnson

My name is Ty Tala, I live in Carson and I supported the Hawthorne Blvd elevated option and strongly oppose the ROW option. The Hawthorne option will revitalize Lawndale, boost the economy, preserve green space, and increase ridership, among many other benefits. Hawthorne Blvd is already designed for commuter railway track and previously housed the Pacific Electric Red Cars.

The ROW option is opposed by entire communities, as it poses significant physical, financial, environmental, and emotional risks. It will decimate communities that have existed for generations.

Please support the Hawthorne Blvd elevated option.

Thank you,
Ty Tala

I am writing this email to support the Hybrid LPA option for the proposed Green Line extension. This project is badly needed and appears to the most cost effective and realistic option. If you are serious about getting people out of their cars, you need to give them more options. More options like this and tell the NIMBYS to pound sand. We need this extension. We need the Westside - Valley rail. We need the Gondola. The Los Angeles region needs projects like this. Not only for the transit options but also for the economic benefits it will bring to the area. Namely in the form of jobs.

My name is Troy Reed and I support the Hybrid LPA option for the proposed Green Line extension.

To: <boardclerk@meteo.net>

Hello,

Sending this to support the FEIR certification and the hybrid LPA. As a resident of the Southbay this hybrid alignment to the extension is the prudent thing to do as it will provide additional asset to many in the area who maybe without personal transportation. This lays necessary groundwork to expand an already growing metro in the and give access to disadvantage communities within the route giving them shorter commute options which can be more cost effective.

Regards,
Julio Robles

Dear Chair Dutra and members of the board:

The Transit Coalition is a Volunteer Transit Advocacy Group started in 2002.

Agenda item #10 (2025-1062, Sepulveda corridor):

The Coalition supports the staff-recommended Locally Preferred Alternative (Modified 5), unanimously approved by the Planning Committee on 1/14/2026. It is the alternative with the highest benefit-to-cost ratio, and will best serve the future transit needs of Los Angeles.

Agenda item #11 (2025-0818, C line extension):

The Coalition supports approval and FEIR certification of the staff-recommended Locally Preferred Alternative (LPA), which travels along the Metro-owned Right-of-Way (ROW). We commend Metro for measures such as walking paths, landscaping, sound walls, freight improvements, and grade separations for safety, noise reduction and enhancing pedestrian and bicycle mobility.

This is a critical project to enhance mobility in the South Bay, and to allow direct rail transit connectivity in the future between Long Beach, the South Bay and LAX areas. The Hawthorne Option is far costlier and more difficult to construct, for negligible enhanced benefit compared to the LPA.

The Transit Coalition
Bart Reed, Executive Director

Dear Members of the Metro Board,

I've been thinkinig about the past 4 years of advocacy, and there are so many layers to what we've been doing. This is one of them that I kind of forgot about... and I think it's relevent.

A while back, our group sent about 300 to 350 letters to homeowners who live along the Expo and Gold Line asking about their experiences. We received a wide range of responses, but many of them echoed the same concerns. This letter is one of those, and it stood out because it mirrors so closely what our own community is worried about right now.

Reading through it again is part of why I'm NOT confident that cleanup and mitigation will be handled in a way that truly protects people. It raises real questions about how these projects play out on the ground once construction actually begins, and that honestly worries us.

I didn't include the writer's name or contact information on the graphic because, while I shared it with Metro board members, I wasn't sure she would want her email circulating publicly. That said, I can absolutely connect you with her directly if that would be helpful.

Our neighborhood group sent out over 300 letters to homes along various Metro routes, including the Expo and Gold Lines. The letter below is just one of the many responses we received.

I can't speak for everyone, but **it has been a difficult experience, living right next to the Metro Rail track**s. Full disclosure, my husband and I purchased our home next to existing freight line rail tracks. In the early days of living in my home, there were usually 2 trains a day, a.m. and p.m. It was loud, but **2 trains a day is hardly a bother**. With the **Metro Rail it's now over 200 trains a day, at all hours.** The tracks don't rumble and vibrate as much as they did with the freight line, but **don't believe them if they tell you they're quiet. They're not.** They rumble loudly and things shake on countertops in the house.

Construction was nasty. Most construction projects are. **But the contractors were particularly sloppy and I ended up signing on with a class action lawsuit, which we won.** I was paid some money for damages to my yard and property. They didn't backfill dirt after they dug out to lay the new tracks and I ended up with a landslide on the back of my yard, which did some **damage to my home's foundation.**

The train running through South Pasadena has caused some unexpected problems, well, unexpected for me. **Traffic backs up terribly on certain streets,** and there are times when I can't back out of my driveway, as the queue of cars waiting for the train to pass blocks my exit.

My property values have gone up, but I don't think it's because I'm right near train tracks. I know there are many people who wouldn't purchase my home simply because of the train tracks. The property value has gone up because it's in South Pasadena and there is a shortage of available properties.

It's not rampant, it's only occasionally, **but crimes have been committed in what was a very safe neighborhood**. People can jump off the train, commit a crime, and jump back on. It has brought some undesirable people to our neighborhood who probably wouldn't have come here before the train line. **There have also been 3 suicides on the tracks near my house, which is really upsetting.**

I'm not a train rider, as I prefer my car, and there are a lot of scary people riding the trains. For some people, I'm sure they like having the train right in the neighborhood.

I've been negative in most of my comments, because most of the results of the train have been negative for me. **It has not improved my life. It's increased crime, noise, and traffic where I live. I can't escape from it,** because the house I own is a few feet from the tracks, and I can't afford to buy another house in South Pasadena. But humans are adaptable. I've learned to tune out some of the **constant ding-ding-ding noise of the crossing gates coming down** and the rumble of the trains. But I was angry about it for a long time. By now, I've realized I have to make peace with it, and in spite of all the difficulties, I know you will, too. But I'm very sorry to hear that you'll have to go through what I did.

***This could have been written by a Lawndale resident, 10 years in the future.**
It *was* written by an actual LA County resident who lives along a Metro line.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a current resident of Los Angeles and former resident of Hermosa Beach, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear pathway to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

I am writing to express my support for the Locally Preferred Alternative (LPA) for the K Line Extension to Torrance. I am a daily Metro rider, and as someone who does not own a car, I not only ride Metro, but rely on it. The expansion of Metro Rail is essential for me to have access to all of Los Angeles County, including parts of the South Bay, most of which lacks rail service entirely. Please approve this project, specifically the LPA.

The Locally Preferred Alternative is clearly the better option. Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed at least 4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths without displacement. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. Further delays are not progress. I trust 40+ years of study, analysis, and expertise. Bring rail now!

Bobby Garrity

To the LA County Metro Board,

As a resident of Los Angeles County, frequent commuter of SoCal, and advocate of improving public transit, I urge you all to consider the following:

> **Item 11:** As a Los Angeles County resident who relies on and strongly supports the expansion of public transit, I support Item 11 and strongly oppose the last-minute attempt in Item 11.1 to derail the C Line Extension to Torrance by giving in to NIMBY pressure. Metro already owns the right-of-way, and shifting course now would delay this long-needed project for years, add roughly $700 million in costs, and ultimately reduce ridership. Please follow staff's recommendation and vote **no**on Item 11.1.
>
> **Item 10:** I support Item 10 and urge you to approve staff's recommendation for the Modified Alternative 5 route for the Sepulveda Transit Corridor. This project is essential for improving mobility, reducing congestion, and connecting communities across Los Angeles County.
>
> **Item 33:** I oppose Item 33. SB-79 is the law in California, and asking for an exemption for Los Angeles County sends the wrong message at a time when we should be encouraging smart growth around transit. Embracing SB-79 and allowing more housing near Metro stations would strengthen our transit system by increasing ridership and making these investments work better for the people who depend on them.

I sincerely look forward to seeing you all do what is in the best interest of all residents and workers in LA County. Thank you for your consideration.

Very Respectfully,

Tom Rodriguez

Dear Chair Dutra and Members of the Los Angeles County Metropolitan Transportation Authority Board of Directors,

On behalf of Downtown Los Angeles for All (DTLA4A), I submit the attached comment letter in support of the C/K Line Extension to Torrance Project and the proposed certification of the Final Environmental Impact Report (FEIR) and approval of the Hybrid Locally Preferred Alternative (LPA).

DTLA4A supports the Project as a critical investment in the regional transit network that advances Metro's goals related to mobility, sustainability, economic development, and system connectivity. The C/K Line Extension will expand high-capacity rail service into the South Bay, improve access to key regional destinations, and provide a viable alternative to automobile travel. The Project will also support job creation, modernize an existing rail corridor, and enhance connections between Redondo Beach, Torrance, LAX, Inglewood, the Westside, and Downtown Los Angeles, which is home to nearly 100,000 Angelenos.

We appreciate Metro staff's work to advance this Project and respectfully support Board action to certify the FEIR and approve the Hybrid Locally Preferred Alternative.

Sincerely,

Leslie Andrew Ridings

Dear Chair Dutra and LA Metro Board of Directors,

On behalf of the LA New Liberals, we are submitting the attached comment letter in strong support of the C/K Line Extension to Torrance Project and the certification and approval of the Final Environmental Impact Report (EIR) for the Hybrid Locally Preferred Alternative (LPA).

This project represents a once-in-a-generation opportunity to extend light rail further into the South Bay, improving regional connectivity, reducing traffic congestion, and delivering on the promise of Measure M for high-quality, sustainable transit to our communities. The project will generate thousands of local jobs, relieve traffic and housing impacts, modernize the existing rail corridor, and link Redondo Beach and Torrance with direct rides to LAX, Inglewood, the Westside, and Downtown Los Angeles.

Thank you for your leadership and continued partnership in advancing multimodal transportation and sustainability.

Sincerely,

Dear Chair Dutra and Metro Board of Directors,

Please find the attached letter of support for the C/K Line Extension to Torrance on behalf of the South Bay Bicycle Coalition Plus. We strongly support this effort to better connect the South Bay with rapid transit, which enables more convenient and safe multi-modal opportunities to get around without needing a car.

This project compliments the South Bay Bicycle Master Plan and makes bicycle infrastructure more useful as more first/last mile micro-mobility + rail trips can be realized. Thank you and staff for working towards this crucial project that will vastly improve transportation in the South Bay.

At this stage of review of the Final Environmental Impact Report, we ask you to approve and certify the FEIR for the LPA to ensure the project can move forward.

Sincerely,

Liam Walsh
Officer
SBBC+

LA Metro Board Clerk,

"Honorable Chair Dutra and LA Metro Directors,

As a South Bay resident, I urge you to blah blah blah blah…"

I know you are getting dozens of these boilerplate AI slop messages meant to flood out the voices of real residents whose families have lived here for multiple generations.

These astroturf organizations funded by Metro do not represent the interests, concerns or opinions of the many thousands of real community members in the Southbay!

We want the Metro built where the Redline Car used to run: along HAWTHORNE BLVD! The "Redondo Beach Transit Center" is not much more than a set of poorly-used bus bays at this point; it can easily be moved over Hawthorne Blvd!

Sandy Solomon

LA Metro Board Clerk,

For Chair Dutra and Directors of the LA Metro Board,

These are 10 reasons why I, and my friends at El Camino, support the Hawthorne Blvd route with elevated tracks. Was there a survey I missed?

1) Light rail elevated on Hawthorne Blvd, will help to support and revitalize the businesses on that shopping corridor without sacrificing parking, which would also be beneficial to Redondo Beach and Torrance commerce.

2) Hawthorne Elevated contains a stop at the South Bay Galleria, future South Bay Social district that will not only help support the many shops soon to be built there, but will also serve any offices, hotels, or apartment units on Hawthorne Blvd that are part of the Galleria's upcoming redesign.

3) Hawthorne Elevated will be good for the South Bay, by increasing Metro ridership. There could be a stop in front of the Galleria that will better serve commuters in Lawndale, Redondo Beach, and Torrance, making it a destination for shopping, restaurants, entertainment and other businesses.

3) Hawthorne Elevated will be raise with pillars that run down a wide center median which was designed for and previously contained a commuter railway track, the Pacific Electric Red Cars.

4) Most of us live here, or we have friends and family who will be effected. Hawthorne Elevated will NOT DISRUPT RESIDENTS- no vibration damaging foundations, no noise pollution disrupting lives, no toxic dust, no destruction of trees and wildlife habitat!

5) Hawthorne elevated is safer as 200-300 trains per day would NOT be running past children's play yards, side doors, windows, and EVEN FRONT DOORS! The two light rail tracks would NOT share a corridor with a heavy rail train transporting petroleum products, where the concern about over-spillage from the tankers could be ignited by the metro overhead electric cables!

6) It would NOT run along a path where there are multiple important high pressure gas lines including jet fuel. It would NOT share a line where freight trains have had a history of accidents and derailments. It

7) Hawthorne Elevated would allow for longer biking paths, jogging paths, dog-walking, etc. That length simple can't happen on the ROW including in Lawndale.

8) It's not fair to Lawndale. They are an area considered park-poor, and tree-poor by the LA Parks and Wildlife. Metro simply planting a few young replacement trees and adding a cement path for a few blocks is a slap in the face.

9)The ROW is a community green belt with hundreds of mature trees that are irreplaceable! Hawthorne elevated would NOT kill over 220 older trees. Metro claims they are very conscientious about replacing trees or bushes; 2-1, but planting 440 trees is not feasible! Metro would be taking over the largest green space in Lawndale.

10) Since buses already stop at Artesia and Hawthorne, contrary to misleading talking points, connectivity is seamless by directly boarding buses at the Artesia/Hawthorne bus stop with bus bays on the HAWTHORNE side of the mall, where everything else is.

So, to summarize:
Hawthorne elevated is a FORWARD THINKING SOLUTION that would help Hawthorne Boulevard grow and thrive as a commercial zone. This route would serve more populations that cross this street and therefore increase ridership- Metro's main objective.

For all of these reasons, I am begging you, the Metro Board, to choose the HAWTHORNE BLVD ALTERNATIVE as the only pro-environment, pro-community, pro-safety, and pro-business choice!

Jason Barnes

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

We know that if Lawndale was a richer and more influential city, Metro would have simply tunneled or trenched this line. As a city, we feel disrespected and betrayed.

We feel that Metro only cares about low-balling how much the Lawndale ROW option will cost so that the project proceeds, and has been inconsiderate to the hundreds of families who live along the ROW. And now we're getting eminent domain letters!

Metro is trying to literally RAILROAD (pun intended) this project down to Torrance's fancy new transit center as cheaply and quickly as possible to gain political points. Apparently, Torrance is the only city whose voice matters.

Because it clearly doesn't matter that there have been no previous Metro projects demolishing and replacing a toxic freight track and then installing two adjacent electric trains, all within as little as 10 - 20 feet of HUNDREDS of residential homes in some cases.

On the west side of the ROW is a tiny alley – Condon Avenue – that separates some of our front doors from the ROW. What Metro doesn't appreciate is—with all of the issues this project will soon have— it will not be the financially or politically least expensive alternative—or the fastest!

When Torrance asked its citizen which alignment they wanted, they heard this: https://youtu.be/47pZsY8yVkU?si=-bjLdtvuOj02BxzH Notice that there is NO mention that HUNDREDS of families lived extremely close to the ROW, with some having front doors facing the proposed project, and other homes have children's backyards backed up to the east side of the ROW!

They deserve trees and green space too! https://archive.ph/3IcWU

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

It's time to get this project out of consideration, and under construction. I'm a South Bay resident, and I'm writing in strong support of the Hybrid LPA for the K Line extension to Torrance.

Metro consistently prioritizes the Westside and areas closer to Downtown when proposing transit projects, and this project is not being treated like the golden goose it is. If this project were to be greatly delayed, overrun in cost, or cancelled altogether due to lack of support, it's unlikely Metro would ever want to bring us any transit again. And the best way to ensure it does get built, and at a reasonable price, is to immediately select the Hybrid LPA option. It will be the cheaper of the two options on the table, being over $700 million cheaper (which is about 1/3 of the LPA's total cost), and will be completed years quicker due to not having to go through a lengthy process to use Caltrans' right-of-way on Hawthorne. The majority of the cost for the LPA is already funded, a much better starting point than most other transit projects in the region, and the Hawthorne alignment's extra cost would most likely require it to seek federal funding, which means years of NEPA reviews and likely waiting until 2029 when the current, transit-unfriendly administration is out. These immense cost and time savings will have a trivially small impact on ridership numbers, and will actually provide better transit connections, with a station at the Redondo Beach Transit Center instead of the middle of a huge road near the Galleria.

And despite many opponents of the Hybrid LPA claiming otherwise, this alignment will actually improve the already Metro-owned right-of-way, with greatly improved crossings for the freight trains which already run there, not to mention that the Metro tracks will be completely grade separated and won't interfere with any car traffic. The ROW is wide and has no acquisition costs, unlike the Hawthorne alignment's dozen necessary property acquisitions to route tracks awkwardly on the side of the 405. It presents no challenge that hasn't been resolved already: Metro tracks have been routed alongside freight near homes multiple times before, most recently with the A Line extension from Azusa to Pomona, as well as with some of the

previous segment; the jet fuel pipelines have already been taken into account in the environmental review and will be made even safer than they were before; and this is otherwise quite a simple light rail project that won't require very disruptive construction.< /p>

Now let's get to the benefits. Construction will first create thousands of local jobs that will then inject hundreds of millions of dollars into the area's economy. Then, the sheer convenience of the route mirroring the 405's route, combined with park-and-ride facilities at both new stations, will enable thousands of people to forgo a long car commute, reducing traffic congestion across the South Bay and beyond, and preventing thousands of tons of carbon emissions each year. The new route will also give South Bay residents convenient access to jobs they would've never previously considered commuting to, especially when the subsequent northern extension opens later on. Building transit lines and stations is also a driver of development and increased property values, especially with state laws like SB79 that make it easier to build new, walkable, transit-oriented areas. Lastly, by building this extension now, it would be viable to extend the K line even farther south in the distant future, bringing a trove of economic and social benefits even deeper into the South Bay transit desert.

So please, consider the K Line extension to Torrance the valuable project it is, and certify the Hybrid LPA immediately, to give the South Bay a chance at the transit it not just needs, but deserves. Your constituents will thank you in the future more than they realize.

LA Metro Board Clerk,

Honorable LA Metro Directors,

I am very dismayed to hear about the last-minute deal by Supervisor Mitchell. As a resident of LA County and the South Bay, I urge you to certify the Final EIR for the C/K Line Extension to Torrance with the staff-recommended Hybrid LPA. This is the only sensible choice. The other option would cost over a billion more dollars, delay the project, and probably result in it never even be built. It is appalling how the Supervisor has delayed this line despite overwhelming support for it. Anyone who votes for the Hawthorne option is costing taxpayers money.

Arlyce Guerry

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. As a longtime resident of San Pedro, I have become extremely aware of how long it could take to go from here to LAX. I've seen for myself how much of a headache it could be, having to navigate car traffic coming in and out of LAX. I believe that this extension would greatly improve navigating across LA county -- not just from the South Bay to LAX, but navigating across the ENTIRE county.

Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

Alana Duarte

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

Alanna McBirney

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed at least 4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths without displacement. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. Further delays are not progress. I trust 40+ years of study, analysis, and expertise. Bring rail now!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on Measure R and M promises, address community concerns, and bring 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. The project has been studied for decades, refined in the FEIR, with meaningful mitigations for residents. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations and will be completed 2-4 years sooner to serve more people. The Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding to uncertainty and timeline. The Board Report and Final EIR prove the C Line to Torrance Hybrid LPA for countywide and regional mobility.

Honorable Chair Dutra and Directors of the LA Metro Board,

As a South Bay resident of over 20 years, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. Evaluations have taken place for 40 years and evaluation of alternatives have been thorough and comprehensive.

This project would bring a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and needs an alternative to the I-405. The extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruition.

Thank you for advancing high-quality transit to the South Bay,
Jose Mendez, Ph.D.
Harbor City

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As someone who has worked in the South Bay, often go there and frequently use LAX, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project provides a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance—promised in Measure R and Measure M—is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Mitchell Landsberg

LA Metro Board Clerk,

Dear Board Directors,

As an aging resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance, and move another important transit project forward.

The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It will improve regional connections to jobs, housing, education, and communities on the K Line.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

Thank you,

Wesley Reutimann

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I live in Redondo Beach, and I am writing in strong support of the K Line Extension to Torrance along the Hybrid LPA. The metro has done an outstanding job addressing local concerns. I would love to be able to take this train to LAX from the Redondo Beach Transit Center (which is just down Ripley Ave from my house), and have guests do the same. No longer would I need to drive through the dreaded LAX loop! Additionally, having easier access to the metro network would give me excellent connectivity to so much of LA. People like me, who currently drive, would have a real alternative, easing the traffic congestion which is such a problem in the area.

I believe that the Hybrid LPA is the best alternative, and that it is the best chance we have to get rail through the beach cities in a reasonable timeframe and for a reasonable cost. I dream of one day taking the K line all the way to Hollywood, and we can start down that path today.

Thank you for your work in improving our transit,

Devon Hollowood

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

Please certify the Final EIR for the C/K Line Extension to Torrance.

The South Bay has been waiting a long time for this much-needed rail line. We need more alternatives to driving, traffic, and pollution. And I believe that the C/K Line Extension would represent a huge leap forward.

For years, we have lacked decent public transit alternatives in this area. And so South Bay residents have had little choice but to drive. It can be hard to accurately judge interest in transit when the options are limited.

However, I believe that the ridership on this extension will be much higher than the ridership for the existing El Segundo stub of the former Green Line — especially as the new rail line will go more places and include better connections.

For one thing, just the new LAX station and peoplemover will be huge improvements. In addition, the South Bay will benefit from having a direct, one-seat rail connection to Inglewood, the Crenshaw District, and beyond. When the Northern extension of this rail line reaches Wilshire (and hopefully Fairfax and West Hollywood), the potential ridership will be huge.

This project is supported by dozens of community, business, and labor organizations, has secured over 52 percent of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

James Fujita

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

I am resident/homeowner in the city of Torrance. My youngest daughter attends El Camino College, and sometimes I pick her up or drop her off if she's running a little late…

A few years ago, when construction started for the Transit station on Crenshaw, we drove by the site and I proudly stated: "Here is where you will be able to ride the train that will take you everywhere in Los Angeles." She got really excited, like a tween does, and we spoke about subways and trains for a while.

A couple of months ago, she texted me if I could pick her up at El Co. On the way back, I pointed at the Transit Station on Crenshaw and reminded her that the train was coming to Torrance. She said: "You told me that YEARS AGO…"

It's time we bring the train to the South Bay.

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and

advance certification and approval of the C Line to Torrance for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

I am a life long resident of Los Angeles county. I relied on the LA Metro system to take me to school starting in middle school and took me all the way to college at UCLA. I am now employed in the aerospace sector in Torrance. I continue to take Metro whenever possible and I am excited at the progress made in the last 20 years. Why stop now? As any Angelino can tell you, automobile traffic has only gotten worse and will continue to get worse. Not to mention the impact to our air quality, one of the worst in the nation. I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX.

It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

LA Metro was a central part of my journey to where I am today. We have an opportunity to improve the system and provide better connectivity to the region while reducing traffic, noise and pollution.

Thank you,

Juan Carlos Cardoza

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I live in Hawthorne and am less than a mile from the Douglas station, and am writing in strong support of the C/K Line extension.

As a resident of the South Bay, I urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project provides a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. It also increases the existing line's access to Torrance and increases opportunities to work or shop in that area.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance—promised in Measure R and Measure M—is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical project for South Bay and regional mobility.

My children love seeing the metro trains. The Douglas stop is on our running route (which is how I know exactly how far it is), and seeing the trains pass by is the highlight of the run for my kids. The last mile problem is hard to navigate with two kids needing carseats, but I very strongly want a better metro. I genuinely love any excuse to take the metro instead of driving, but it needs to expand its coverage. I want it to be a good transportation option and I'd love to be able to use it instead of the car more often with the expansion.

Thank you for reading and for advancing high-quality transit to the South Bay,

Rose Crowell

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of the South Bay, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. I wish I could be in person at the meeting today, or even call in - but I'm not able to. The Hybrid Locally Preferred Alternative is fantastic. You don't need me to describe it, I'm sure there are many otherletters that do.

What you do need to understand is that I am a long time resident of LA County for over 25 years. My 5 kids were all born and raised in West LA, Santa Monica, and the South Bay. We have called the South Bay our home for the last 12 years. Los Angeles needs to continue building out its public transportation to be part of the modern age. Building wider freeways is not the answer, we all know that. Now is the time to make the move to the South Bay! Please take action!

Given that I live Closer to the 110 freeway, my commute to and from my workplace in El Segundo is closer to an hour each way. I'd love to have the option to take a metro to and from work, not only to alleviate the stress of driving but to hopefully make our city more livable. By giving people more options on how to commute, we create a better community and by extension give ourselves better lives. While trading current prosperity for future prosperity may be difficult, I hope you all come to the right decision. I cannot wait to see what a vibrant place the South Bay becomes as a result of better transit options.

Thank you,

Miguel Ramirez - 10 year resident

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. LA Metro Board Clerk,

I am a resident of Redondo Beach. I strongly support the C/K Line Extension to Torrance and the staff recommended Hybrid Alternative.

My husband and I are retired, so we volunteered as Metro Travel Buddies. This is a great way for older adults to socialize and explore Los Angeles without stressing about traffic and parking. Every month, we send invitations to our 45 club members to travel as a group on public transportation to restaurants, museums, events, and LAX. Many of our members are from the Torrance area. Those who can drive will have to transport others from their home to the K Line Redondo Beach Station to start our excursion. It would be tremendously helpful for this project of connecting to Torrance to be done as soon as possible!

The Hybrid route is a better choice than using Hawthorne Blvd for the following reasons: (1) Metro already owns the land at ROW. Otherwise, Metro would need to negotiate with Caltrans and other agencies to put a light rail through Hawthorne. This will drive cost up and cause more delays. (2) There are major existing underground utilities along Hawthorne, which will be expensive to dig up and relocate. (3) Hawthorne is currently a high-traffic route. Construction on it will greatly impact businesses and commuters alike. (4) The Redondo Beach Bus Depot already has parking, whereas a parking lot for train riders along Hawthorne is not available.

Thank you for your consideration,
Chris Ng

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Loree Pham

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. Since moving to Redondo, I was a student that took the BCT just like most RUHS students did. Originally from Culver City you can imagine the shift in available public transit being limited here. I enjoy the distance between the South Bay to DTLA but driving to the city really adds onto the stress about parking, cost, and duration. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As someone who often visits the South Bay and whose partner's family lives in the neighborhood across the street from the proposed Torrance Metro Station, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. Personally, I would be able to take Metro from home to family home, opening new opportunities of travel and avoiding traffic on the road.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Bhavi Jagatia

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Denisse Cortan

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

As an engineer that works in El Segundo, the rail line could streamline my commute. In addition, I am a LAFC season ticket holder and parking at Expo Park can be prohibitively expensive ($60), however, there is no easy alternative to driving. This would vastly improve my commute and participation in other Angelino events.

Thank you for your time and hope you Approve C Line to Torrance.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a long-time resident of Los Angeles County and daily user of our region's roads and transit, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid Locally Preferred Alternative.

The Hybrid LPA modernizes an aging freight corridor while reducing noise and improving safety for nearby neighborhoods. It will deliver a fast, direct ride, under 19 minutes, from Redondo Beach and Torrance to LAX, strengthening connections to jobs, housing, schools, and the K Line communities. By improving first- and last-mile access and serving equity-focus neighborhoods near the corridor, this project will expand opportunity and mobility for those who need it most.

Please prioritize strong bicycle integration throughout the project: protected bike lanes and safe bike crossings to and along stations, ample secure bicycle parking and long-term storage at every station, and active connections to existing and planned bike routes. Incorporate bike-share and micromobility docks, clear wayfinding for riders, and safe, well-lit station access so bicyclists of all ages and abilities can comfortably combine biking and transit. These measures will reduce car trips, improve local air quality, and make the line accessible to more riders while promoting healthy, low-carbon travel.

This project is ready: the FEIR reflects decades of study and careful refinement with meaningful mitigations for residents. The Hybrid LPA already has over $1.4 billion secured, more than 52% of total costs, putting it well ahead of other Metro projects at FEIR certification and making it competitive for additional state funding despite current cost pressures. Approving this project now will bring roughly 15,000 jobs and an estimated 1.5 million new annual riders to the region while remaining highly cost-effective.

Please certify the FEIR and advance the Hybrid LPA so we can build this essential, equitable, bike-friendly, and fiscally responsible transit improvement for our county.

Sincerely,
Kyle Richardson

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of Torrance, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

Luis Vazquez

LA Metro Board Clerk,

Honorable Chair Dutra and Members of the Metro Board,

As a resident of Los Angeles County, I urge you to certify the Final Environmental Impact Report for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid Locally Preferred Alternative. The Hybrid LPA represents a pragmatic, environmentally sound solution that modernizes an underutilized freight corridor, improves safety and noise conditions, and delivers a direct sub-19-minute rail connection between Redondo Beach, Torrance, and LAX. It strengthens regional access to jobs, housing, and education through seamless integration with the K Line, while meaningfully improving first- and last-mile mobility for communities along the corridor.

This project fulfills the intent of Measures R and M, reflects years of community input, and responds directly to long-standing concerns raised by corridor residents. It brings substantial regional benefits—supporting approximately 15,000 jobs and an estimated 1.5 million new riders—while remaining one of Metro's most cost-effective rail investments. The C/K Line Extension has been studied for decades, with extensive technical refinement reflected in the FEIR and robust mitigation measures incorporated to address local impacts. The planning process has been thorough, transparent, and evidence-driven, and it is time to move from study to delivery.

The Hybrid LPA already has more than $1.4 billion secured—over 52% of total project costs—placing it well ahead of other Metro rail projects at the FEIR stage. By comparison, projects such as the Eastside Transit Corridor and the Southeast Gateway Line advanced with roughly 33% and 20% of funding in place, respectively. The Hybrid LPA also delivers stronger equity outcomes by serving transit-dependent communities near the corridor with accessible, high-quality stations and can be delivered sooner to serve more riders. The C/K Line Extension is well positioned to compete for additional state funding and to remain resilient amid construction cost inflation and tariffs.

For countywide and regional mobility, now is the moment to certify the FEIR and advance approval of the C Line Extension to Torrance Hybrid LPA.

Respectfully,
Nicholas Tatonetti, PhD

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I am writing this as someone who not only lives in the area surrounding this extension, but as an avid supporter of making LA and the South Bay a great place to live, I want to personally express how much of an improvement to the region this line extension would be. The C/K line extension is not only an expansion of transportation, but it is literally a bridge that will bring the people of this community together. Everyone should have the right to be able to get where they need to go, and this line will help unlock the amazing potential of the existing public transportation options in the South Bay. I hope to grow old and be able to safely get around the South Bay without the fear of dying in a car crash.

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,
Dean Ripley

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of LA County, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

Nathan Adair

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

Nothing would excite me more than robust public transportation options, especially those that connect us down in the South Bay. The future is not in cars or car infrastructure. We need public transit that can improve out environment, connect communities and offer transit to those who cannot or choose not to drive. It should be glaringly obvious that a car-centric city is not the answer or the future. I cant wait to see more projects like this approved so we can catch up to the rest of the world in public transportation.

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

I may live in a different city and am not represented by you, but choosing the Hybrid Alignment will be the best for improving connectivity and the lives of low income communities the C/K Hybrid LPA will serve, not to mention the reuse of an existing right of way will allow these communities to be served by rapid transit sooner and cheaper. I understand homeowners along the Hybrid LPA alignment have their issues, but they chose to live along an active rail line, and adding this alignment will serve to increase home values for them. Coming from Seattle, that happened to those living close to our light rail lines. Will the construction cause short term headaches? Yes. Yes it will. But the benefits far outweigh the costs, with the

connectivity allowing lower income communities much better connections, allowing for far greater economic mobility and equity, while the homeowners next to the alignment will see their property values go up, which with a cost of a few years of construction, I see as absolutely worth it.

Even though I come from outside LA, please consider my input. Your constituents are counting on it.

Wilson Bailey

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I am a resident of Torrance — in fact, I was born and raised here — and I strongly urge you to support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay!

Enhanced public transportation in the South Bay is critical to making our cities livable. Having a metro line extend to Torrance would make it significantly easier for me to get around LA, reduce traffic, and create a modern city with a higher quality of life. It is shameful that in 2026 our public transportation options are so limited, essentially cutting us off from the rest of LA.

The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Eden Pang

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a constituent in Supervisor Holly J. Mitchell's district, I am writing in strong support of the C K Line Extension to Torrance and urging you to certify the Final EIR and advance the staff recommended Hybrid LPA. The Hybrid LPA uses the existing rail corridor with grade separations and mitigations to improve safety, reduce noise, and expand green space with stronger connections to bus centers as well as bike and pedestrian paths. With the new K Line and LAX Metro station, this project would create a reliable 19 minute trip from Torrance to LAX and provide direct rail access to key destinations across LA County. The South Bay urgently needs a long overdue rail alternative to I 405 congestion, and the Hybrid LPA avoids the higher costs, added disruption, and delays associated with other options.

Please certify the Final EIR and advance this critical project for the region.

Miguel Angel Martínez Jr

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

Jacob Martin

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. I live in Gardena, but grew up in North Redondo Beach where my mom still lives. I walked to Washington Elementary School and Adams Middle School and could hear the freight train horns, and spend many an unlucky few minutes stuck on 182nd St while waiting for them to pass by. The railroad tracks were a fun place where my school friends and I would go catch lizards (I grew up in the 80s -- I do not let my own kids play on the railroad tracks!), but we all knew that those trains wouldn't take us anywhere except in our own imagination.

When I got my first "real" job after college, I didn't have a car yet, so I had my mom drop me off at what was then the Green Line station in the middle of nowhere in North Redondo. It would take me over an hour and a half to get to Little Tokyo with multiple transfers. Coming home was worse because it'd be dark and waiting at the Green Line station to get picked up was kinda scary. My protective mom hated it. After a couple of weeks, I started trying bus options instead (Torrance Transit, Metro, Gardena). I eventually saved up money to buy a car and join the masses on LA's freeways, but I really wished that we had a public transit system like the ones I get to use when visiting family in Japan.

Los Angeles and the South Bay deserve a world class public transit system. My kids and I visit my mom regularly and I still see myself as part of that North Redondo community. The South Bay is interconnected and all of us would benefit from the seeing the C/K Line completed as soon as possible with the Hybrid Locally Preferred Alternative, not just for the convenience, but because it seems like it would improve the current noise and safety conditions of the existing freight rail route.

The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable

19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay. I can't wait to escort my mom to LAX by rail rather than on the freeway for a future trip to Japan. And I hope we can finally brag to our relatives that LA's system is just as good as anything else in the world (and hopefully better)!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

THe Hybrid C/K light rail will be a tremendous asset for the South Bay community. It will reduce traffic and bring more to South Bay businesses. Additionally I am looking forward to easier access to LAX.

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

On a personal note, not only am I a long time resident of the South Bay, I am also a graduate of UCLA's masters program in Urban Planning and a long time follower of the late Donald Shoup. Public transit in Los Angeles has also been a keen interest of mine. I request that you all approve this project now!

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

Sarah Geam

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of Torrance, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

As a homeowner and new father, I'm investing in this community for the long term. This extension will provide critical connectivity that our family and neighbors need—whether it's accessing healthcare appointments, visiting family across the region, or simply having reliable transportation options as our child grows. The South Bay has been underserved by rail transit for too long, and this project represents essential infrastructure for our community's future. Better transit means less traffic congestion on our local streets, cleaner air for our kids, and increased property values as Torrance becomes more connected to the broader LA region.

Thank you for advancing high-quality transit to the South Bay,

Ryan Lowry

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

Please please please approve this extension! I live in San Pedro, I am part of city council district 15 and I am always complaining about how our district is neglected. We who live in Harbor City, Harbor Gateway, Wilmington, San Pedro, Watts are also part of LA and deserve a train. Thus, the extension to Torrance is the least you can give us, and would be super helpful in supporting our commutes to the city.

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

David Coe

LA Metro Board Clerk,

I'll be short. We urgently need other modes of transport other than cars for our aging residents. Good transit also enables higher density residential buildings where not every adult needs a car and a parking spot for themselves. It also improve foot traffic and promote an ecosystem of more street stores and local businesses. Thanks

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

Help put the South Bay and Palos Verdes areas of LA County into the modern transport era:

I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. From my understanding, this Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It will deliver on Measure R and M promises, address community concerns, and bring thousands of jobs while remaining fiscally-sound.

It's time we get this built.

Gary Mancuso

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of [the South Bay], I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project provides a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance—promised in Measure R and Measure M—is long overdue. The Hybrid LPA avoids added cost and approvals for the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and disrupt roads and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical project for South Bay and regional mobility.

I have been waiting for this to happen for over 45 years. I live in Torrance. I use Metro buses to go to college at Cal State LA in 1978. I started working at Hughes Aircraft Company in El Segundo at 1980. I was hoping I can use it to go to work. Now I am retire, I use the rails and buses to get around Los Angeles with friends and Metro Buddies. I love

the freedom of seeing the cities and not just the road when I am driving. I go to Santa Monica, Long Beach, Pasadena, downtown LA, Chinatown, Little Tokyo, Olveria Street.historical museums, art museums, and special events. I save a lot of parking and gas costs to visit these places. I enjoy seeing young people , babies and pets on the rails and buses. I see Waymo driving around and delivery robot carts going down the street of LA. Nice to get out to see things that I will never see in my neighborhood. I live close to Pacific Coast highway and Crenshaw. I can get on the Metro bus to get to Torrance Transit Center. Once i get on the Metro Rail C line, I can spread my wings to go in any direction of the city. The ride is smooth and quiet and fast. Please make it happen. I can't wait any longer because I am getting old. My husband died 7 years ago and he was waiting for it to happen too.

Thank you for advancing high-quality transit to the South Bay,
Lily Wong

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

This project needs to be approved with the hybrid LPA for the betterment of the South Bay both short and long term.

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear pathway to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

Patrick Lahey

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

Mark Schwartz

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of Redondo Beach, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

I am looking forward to the time when Metro Transit is a viable option to connect me and my family to the rest of the LA Basin. I am very disappointed in Supervisor Holly Mitchell for objecting to this project and putting the interests of a few hundred homeowners above the millions of other residents that she represents. Her "Not in my Backyard" stance has provoked my anger to the point that I will actively use my influence to discourage all of my friends from supporting her in her next election.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed at least 4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths without displacement. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. Further delays are not progress. I trust 40+ years of study, analysis, and expertise. Bring rail now!

LA Metro Board Clerk,

Dear LA Metro Directors and Chair Dutra,

I live and work on the westside (Mar Vista, 90066), and my grandfather lives in an assisted living community in Torrance. I am his nearest relative and I try to visit him when I can. When visiting him I get stuck in horrible 405 traffic, sometimes in both directions. My family shares 1 car, and when that car is needed by someone else it takes me nearly 2 hours to reach him by transit. My situation is in no way unique. In fact many people face far more significant burdens as a result of the lack of robust public transportation in the South Bay. Building more lanes for cars will never solve this problem and does not serve people with limited or no access to a personal vehicle. We need to invest in rapid and dignified alternatives to driving in the South Bay.

With that in mind, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The South Bay has been inundated with increasing amounts of traffic, and having meaningful public transport would add to our quality of life while cutting down on pollution! I'm especially optimistic about it connecting to LAX and providing access to more jobs across the region.

The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

I am writing to express my enthusiastic support for the proposed rail line extension. Having moved to the United States as an adult in 2010, I have never driven a car; instead, I grew up in an environment where robust public transportation was the backbone of daily life. From experience, I can attest that rail travel is far more efficient and sustainable than our current reliance on personal vehicles. As a resident of Torrance, my family would immensely benefit from a direct, reliable connection to LAX and the stadiums in Inglewood. Removing the stress of traffic and parking for these major hubs would significantly improve our quality of life and better integrate our community with the rest of the region.
While I understand this extension is just one step, I view it as a vital catalyst for our city's future. My hope is that this project creates a "flywheel effect"—where the success of this initial line builds the momentum and public trust necessary to expand into a comprehensive network of routes. By investing in this infrastructure now, we are choosing a more accessible, environmentally friendly, and connected Torrance. I urge the Council to move forward with this project to ensure our city remains a forward-thinking place to live for all residents, regardless of whether they own a vehicle.

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced

from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Angela Stark

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

Best,
Renee Krieger

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of DTLA who needs to use public transit to get around, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the greater LA County region,

Alan Vazquez

LA Metro Board Clerk,

Dear Metro Board,
I want to urge you to vote to approve the C/K line extension into Torrance. As someone who supported Measure M, and who supports transit for environmental and quality of life reasons, I want to be able to actually use transit to navigate around our city. However, too often, the need to reach transit in order to use it gets in the way. Having access to light rail from the Torrance Transit station will go a long way toward making it possible for thousands of people in the South Bay to use the growing Metro system to reach destinations without polluting the air, and clogging our freeways. Your vote is a vote for our future. Please vote to go forward.
Thank you,

Mike Albert

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed at least 4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths without displacement. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. Further delays are not progress. I trust 40+ years of study, analysis, and expertise. Bring rail now!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

As someone who spends nearly 4 hours daily commuting from Torrance to Culver City and back, this extension would greatly cut down on my trip time and save me and countless others hours of commuting time a day.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed at least 4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths without displacement. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. Further delays are not progress. I trust 40+ years of study, analysis, and expertise. Bring rail now!

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear pathway to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of Los Angeles, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

Nicholas Franco

LA Metro Board Clerk,

Hello Chair Dutra and Directors of the LA Metro Board,

There is no alternative to more public transportation in the South Bay and Southern California. We cannot drive our way out of bad traffic, the financial burden of car ownership, the financial burden on the city of car infrastructure, and the deaths and injuries that result from crashes. As a former driver of 10+ years who lost two cars in two separate hit and runs in LA and now who relies on transit to get around, I see that it was the work of people decades before me that made it possible for me to rely on metro. Now future generations are relying on us. On you.

I'm writing in support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,
Angelo Mike

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a parent with two small children who live near the 405 and breathe its exhaust, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR to advance the project without delay. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,
Sheana

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Subject: Vote for Hybrid LPA: The fiscally responsible choice for the C/K Line

Honorable Chair Dutra and LA Metro Directors,

As a taxpayer and resident of LA County, I am urging the Board to certify the Final EIR and move forward with the Hybrid LPA for the C/K Line Extension.

This is not just about transit; it is about fiscal responsibility and effective project delivery. The Hybrid LPA already has over $1.4 billion in secured funding—covering more than 52% of the total cost—and is positioned to be completed 2–4 years sooner than the Hawthorne alternative.

Choosing the Hawthorne option now would introduce significant risk by requiring new federal NEPA reviews and unsecured federal funding. We should not gamble with the project's timeline or budget when a viable, fully state-funded solution is already on the table.

Furthermore, the Hybrid LPA modernizes an existing freight corridor, solving safety and noise issues that have plagued the community for years, while delivering on the promises made in Measure R and M. Please respect the studies, the funding realities, and the timeline: certify the Hybrid LPA so we can get this built.

Sincerely,
Joshua Simenhoff

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of Los Angeles County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. While I live in Montebello, this project is personally important to me. I have close friends and family in the South Bay who face long commutes and limited transit options, and I want them to benefit from the same mobility, safety, and economic opportunities that reliable public transit brings. I also used Metro frequently during my college years—including the C Line—and it played a major role in my ability to reach school, work, and internships affordably. I still use Metro today, and I strongly believe in expanding transit access across the county, not just in our own neighborhoods.

My support for the Hybrid LPA is also tied to my broader values: I'm a strong advocate for housing, transit-oriented communities, and improving quality of life through cleaner, more connected mobility options. Los Angeles County can't meet its housing, environmental, or equity goals without investing in projects like this one.

The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M commitments, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region. With over $1.4 billion already secured—more than 52% of total project costs—the Hybrid LPA is farther along and more financially ready than many other Metro rail projects at this phase. It will serve transit riders better with neighborhood-accessible stations rather than a station along an eight-lane highway, and importantly, it can be completed at least four years sooner than the Hawthorne Option. The plan includes mobility paths, safety upgrades, and construction mitigation without displacing residents. The Hybrid LPA can also move forward immediately with available state funding, while the Hawthorne Option would trigger NEPA review, pursue federal funding, and cause significant delays and uncertainty.

Further delays are not progress. After more than 40 years of study, community input, and

expert analysis, the data and regional needs overwhelmingly support the Hybrid LPA. For the sake of the South Bay, the region, and the countywide transit network that so many of us rely on, I strongly urge you to certify the Final EIR and move this project forward now.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA.

Since welcoming my child, the way I think about transportation has changed. Reliable, safe, and accessible transit isn't just a convenience—it's about time, health, and quality of life. Time not spent sitting in traffic is time families can spend together. Reduced congestion and cleaner air directly affect the world our children are growing up in.

The South Bay is home to thousands of families who juggle work, childcare, medical appointments, and daily responsibilities while navigating some of the most congested roads in the region. Extending the C/K Line would ease that burden, give families more dependable options, and make our communities more connected and livable.

Approving this extension is an investment in families, in equity, and in a future where raising children in the South Bay is a little less stressful and a lot more sustainable. I hope you will move this important project forward.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I lived in the South Bay for 36 years; I recently moved to Indio in retirement, partially for affordability reasons. As a past resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. This extension would have made a significant difference in the quality of my life when I was living in the South Bay. It brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. This project is long overdue. Please certify the Final EIR and bring this critical rail project to fruition.

Thank you for advancing high-quality transit to the South Bay,

Gail Robillard

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As the grandparent of two girls residing in the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a Metro user and resident of LA County, I am asking that you follow the needs and desires of the majority of stakeholders, and certify the final EIR for the C/K Line Extension to Torrance, specifically the "Hybrid alignment" as recommended by Metro staff.

This project was promised in Measure M, an initiative that I voted for. Hybrid LPA is 52% funded and will run on a right of way that Metro already owns, and which already has an existing freight rail line. It is not right that a relative handful of homeowners should be able to hijack this plan with the aim of rerouting it or killing it outright.

Given the fact that Hybrid LPA includes improvements to the existing freight corridor, improves safety & noise, and is environmentally sound, there seems to be no valid reason for local homeowners to oppose it. This suggests that the opposition is based on non-valid criteria, and therefore Metro should dismiss such a blatantly cynical movement outright.

Completion of the C line to Torrance and Hybrid LPA would result in enormous benefits for residents of the South Bay, including Torrance and Long Beach. This would positively affect a vast number of riders in the South Bay and beyond -- far more people than those who oppose the plan.

I urge you all to reject the cynical gamesmanship of the opposition, and see this already half-funded project to completion, for the people of LA County and the South Bay.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

I write to you as a resident of Redondo Beach who wants to see the C/K line extension completed. Please approve and certify the FEIR for the Hybrid LPA. I do not know why my city has invested in our new transit center while also arguing that the train should not connect to it. A station on Hawthorne Blvd would be dangerous for riders to cross, and make bus connections much more difficult. The Redondo Beach transit center is on the other side of the same Galleria complex, and also adjacent to the empty parking lot where the city just approved mixed-use residential and commercial development. It has ten newly constructed bus bays that serve a host of municipal lines. This is a great location for a train station.

I've read the Final EIR and responses to concerns that have been raised. They all appear appropriately addressed or will be sorted during further engineering. I understand the city can have its preference, but we cannot keep moving goalposts after every improvement, delay and added cost is included. Sound walls, grade separations, and freight safety improvements are all reasonable betterments that have been added based on community feedback. We can't afford to keep deliberating or choosing a much costlier and longer option.

I also want to stress that most of the future riders who will benefit from the project are likely unable to attend this board meeting because they have to work. Please consider not only the needs and wants of those with time to attend these meetings, but also the needs of the broader community that this project will serve. Your surveys showed that most people preferred the LPA.

The high cost and environmental impact of our current transportation system requires leadership and commitment to fix. After decades of planing this extension, let's actually get it underway and deliver the promise made to voters from measures R and M. Please approve and certify the FEIR for the hybrid LPA. Thank you.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

Thank you in advance for your consideration.

Best,
Alison Pion

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

P.S. it's already gonna be right next to a live train line. There's no real reason to not have it. It's nonsense that we have to think about this.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition. The project has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project t o fruition.

Thank you for advancing high-quality transit to the South Bay,

Thomas Peterschmidt

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of Hermosa Beach, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA.

I am a frequent transit user in the South Bay who laments the lack of transit viability in the area. The Beach Cities don't have easy access to the K line and thus to the rest of the LA Metro subway system- for example, bus connectivity from my door comes infrequently (as low as once an hour on weekends) and doubles the time it takes to get to LA City center. This presents a hardship that is unavoidable for transit users and prevents others from considering public transit as a viable means of transportation at all. The lack of convenient, reliable public transportation cuts both ways; people who want to visit our beaches are forced to do so by car. The increased car traffic causes noise and air pollution that undermines our efforts to be stewards of the land and protectors of nature.

The Hybrid LPA option will make an easy transfer from the Beach Cities to the Redondo Beach Bus Center (RBBC) Station- the transfer by bus would only be 15 minutes. The area around the RBBC is ready for development; the Hybrid LPA option extending through here would decrease the housing burden in the area without adding to the traffic burden, as folks will have non-car based accessibility to the region. This is only increased by having the MAT bike path built as part of the Hybrid LPA. The potential as a region-transforming project is due to the 40+ years of study, analysis, and expertise that went into developing this option.

My travels on public transit and by foot sometimes take me down Hawthorne Blvd- and those times are unpleasant at best and dangerous at worst. Hawthorne Blvd is an 8 lane road with cars that speed up to 50mph and come to screeching halts at stoplights. The crosswalks have very limited time limits, almost impossible to cross if there is any delay or if one has any injuries. The noise level is deafening, and there are few walking paths to stores- almost all routes risk the danger of being hit in a parking lot. It is no wonder that the Hawthorne Blvd alignment is only expected to have a small increase in ridership per the FEIR compared to the Hybrid LPA, as the area is hostile to non-car users. If the Hawthorne Option is selected, to

cross this road and wait up to an hour for bus transfers next to the highway is cruelty- if the project is even able to be finished at all due to the increased funding needed, NEPA assessments needed, and increased timeline compared to the Hybrid LPA.

I believe we have a duty to future generations to do what we can to make the world a better place for them. The Hybrid LPA is the work of many generations over 40+ years to do just that. Our children already will have to reckon with the worst effects of climate change, their cursed inheritance- they will have enough to fight without having to work on making the C/K Line Extension happen. I want them to work on future projects like the K Line extension North and ultimately the K Line extension to Long Beach. I want them to work on projects that we haven't even imagined yet. But this will only be the case if we move forward with the C/K Line Extension and choose the Hybrid LPA now.

As someone who is as of now unable to drive, public transit has been and still is the best way for me to travel the city, to get where I need to go and do what I need to do. I use it almost every day. And when I ride, I see many others on there, others who also need this service. I am sure that this is true for many, many more people than you would think. If this project goes through, we will be able to go even further, travel to places we need to go more easily. It will be a massive boon to us, and to the entire community.

I know that there are those who do not want this project to happen. I respect their words, but cannot agree with them. Their beliefs that it will pollute the environment are quite baseless (public transit of all kinds produce far fewer emissions per passenger than cars, which I a

know plenty of them use) and I sincerity doubt it will cause more noise than they seem to think. You cannot let the words of a handful of misinformed (and lets be honest, selfish) individuals get in the way of a project that will benefit so many people.

For the people who cannot drive, for those who want a quick way to go further, and to those who want to be more green, I must ask of you: let this project go through!

I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of Playa Del Rey, my closest and most used line is the K line. I grew up in Redondo beach, and voted yes on measure M with the explicit reason to bring rail to the South Bay along the metro owned harbor subdivision right of way. The Locally Preferred Alternative with hybrid alignment selected running along the right of way is the right choice for the South Bay. It makes safety and noise improvements to the aging freight track, and provides a fast and frequent connection from the South Bay to LAX, playa del Rey, and soon mid-city and West Hollywood. The improvements to the green space in Lawndale will provide the local population with parks and green space for the community.

I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured, over 50% of the total project cost. Switching to a Hawthorne alignment would increase this number over $700 million for only 300 more projected riders, and a slower ride. Additionally, selecting the LPA will avoid complicated coordination with CalTrans and avoid placing trains in the middle of a busy highway along Hawthorne boulevard. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition. The project has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project t o fruition.

Thank you for advancing high-quality transit to the South Bay,

Laura Ortiz

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

Additionally, Id like to add that as a Born and raised Angelino of 35 years, I've seen the quality of life in this city and region drop precipitously year over year. A lot of it is because of bad transportation and housing policies. Yet for some reason the members of this board seem hell bent on stopping housing and public transit construction and continuing the same failed policies. ENOUGH!!!!! Just build the damn line as its planned. If you Don't then Ill encourage my friends, family and social network to elected people who will. In essence build the C/K extension, and make it easier to build housing, or you will all loose your jobs.... as you should.... WHAT A DISGRACE. You all should be highly ashamed. My high rent and time wasted in traffic, fall directly on your inept hands.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The Hybrid LPA is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility. We need to do something about traffic and congestion!

LA Metro Board Clerk,

Hello Chair Dutra and LA Metro Directors,

I was a driver for over ten years, spanning my time living in my home state of Virginia to moving here to LA for my film dreams. It was here that I lost a car to an overnight hit and run, then a second car to an overnight hit and run, and have since been car free for over four years. I rely on metro and biking to get around, which means I see laid bare just how inadequate our transit infrastructure is. We cannot drive our way out of mobility problems and bad traffic; one private vehicle usually carries around little over one person at great expense to person and to the city to sustain infrastructure for it, as well as to everyone else who breathes in its pollution and loses living space for car infrastructure. But one bus or one metro train can carry dozens or hundreds of people.

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

Thanks,
Angelo Mike

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

I'm always hanging out in Torrance and LA, and the drive between both is awful. By riding the train, my friends and I could cut down on emissions, save money, and have an alternative to the freeway.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA.

This has been studied long enough to know Caltrans will not approve a ROW encroachment for the Hawthorne alignment. Even if it did, the cost difference vs the hybrid makes it a non-starter.

Do you want to know why people consider most politicians useless? It's partly because of this endless cycle of 1) study; 2) decide; 3) someone somewhere objects for some reason (or no reason); 4) return to #1. Meanwhile, every delay makes it more expensive and pushes the completion date out for years.

Make it simple: Follow the result of all the studies done so far. Follow the result of staff research, economic projections and feasibility analyses: approve the hybrid alignment!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

Below is the form copy from South Bay Forward -- all of which I agree with. This paragraph is my own thoughts. I'm a parent and resident of LA for 15 years. I love our city but the transportation architecture is heavily skewed in favor of cars, which makes quality of life in the city far worse than it could be with some basic changes to transport, including rail. Like many of my friends, I'm a single issue voter (improved transport in LA) and will urge all my connections in Holly Mitchell's district to vote against her for trying to subvert and stall the extended rail network.

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

Hi, I'm Mark Li, and I'm a Torrance resident of over 25 years, and nearby resident of the planned extension route. I support the C Line Extension to Torrance and the Hybrid LPA.

I lived next to the E Line station in Palms for four years. It was amazing using the train to commute to work and get around LA without worrying about traffic or parking. The train was also much quieter than the car filled roads and freeways nearby.

The hybrid LPA is our best option to get high capacity rail to the South Bay. Please certify and approve the Final EIR and advance the project.

Mark Li

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of Torrance, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR is already thought out and clearly the best choice. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. The Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for making the right choice,

Milan Matsumoto

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA review adding uncertainty and timeline. Further delays are not progress. I trust the 40+ years of study, analysis, and expertise. Bring rail now!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. Improving the quality of life for residents of the South Bay not only increases the productivity of the region, but also the entire county with the frequent access to reliable and quiet transit.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from the Eastside Transit Corridor (33%) to the Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County District 5 who uses public transit as a main mode of transportation, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. If Los Angeles has any hope of entering the 21st century and hosting the 2028 Olympics, we will need an increasingly robust transit network, particularly in and out of LAX.

It is far past time for Los Angeles to provide equitable public transit throughout the county. The South Bay and West LA are lacking in accessible rail, and this project would modernize a corridor that is already owned by Metro and isn't currently being utilized for public good. The Hybrid Locally Preferred Alternative delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. The Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway, and it will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding, while the Hawthorne Option will require further delays with federal funds and NEPA review adding uncertainty and timeline.

Further delays are not progress. Los Angeles embarrasses itself with an inability to build transportation and infrastructure in a timely manner. We need rail now, not endless chatter about rail.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County and transit-dependent Metro rider, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed at least 4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths without displacement. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. I am concerned that if the Hawthorne Option is chosen, realistically this extension is facing between 5-10 years of delays, if it gets built at all.

Choosing The Hawthorne Option is not equitable, because the significant delay will make it harder for transit riders to be able to access the South Bay for years. While I sympathize with the concerns of the neighbors of the freight corridor, the FEIR includes adequate mitigations to ensure health, safety, and equity.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

I am a resident of LA County, and I strongly support certification of the staff-recommended Hybrid LPA for the C/K Line Extension to Torrance, which is fully studied and has a higher % of it's funding secured than other Metro Projects at this stage of development.

In contrast, the Hawthorne Alternative is underfunded and would depend on things like Federal funding that is clearly not available in our current climate. Switching to the Hawthorne Alternative at this stage would delay this already long delayed project for years and risk it's outright cancelation, which in turn risks future downstream impact on the this line's eventual extensions further to the southeast.

The Hybrid Locally Preferred Alternative utilizes a corridor Metro already owns to deliver on promises made in Measurse R and M, and brings 15,000 jobs and 1.5 million new riders to the region.

Please trust the expertise of the Metro Staff and pass the Hybrid LPA.

Thanks,
Richard Rapp

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As an IBEW 11 member who frequents Torrance, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR with the staff-recommended Hybrid LPA.

The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It also offers many job opportunities for various trades such as my own. It is the most comprehensive option with the most community benefits and best pathway to construction. We've been evaluating this for over 40 years with thorough and comprehensive review.

I personally had the luxury to work on the extension of the Metro D line. It was challenging but rewarding work, knowing my hard work will soon help many people move around LA in a faster, safer, and affordable way. Not only that, I frequent Torrance, shopping often at the Del Amo mall, Mitsuwa, Tokyo Central, and more. A new extension that connects with the Torrance Transit Center could be a game changer in allowing new options for folks like me to spend my money in Torrance..

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative delays delivery, costs nearly $1 billion more, and generates impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition. The project has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Proceed with the long-studied staff-recommended Hybrid LPA.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

Ten years ago, I made the south bay my home and if I had to pick one thing that benefited my standard of living, it would be the LA metro system. Every extension and station opening has added more to my life. I now visit lamert park after the k line opened, and I am able to take the metro home after a long flight after the lax station opened. I drive less, live a happier life, and am able to feel more connected with my neighbors, work, and leasure. More rail means more happy stories like mine. I can't wait to be able to visit friends, family, work, and the rest via rail.

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on Measure R and M promises, address community concerns, and bring 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. The project has been studied for decades, refined in the FEIR, with meaningful mitigations for residents. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations and will be completed 2-4 years sooner to serve more people. The Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding to uncertainty and timeline. The Board Report and Final EIR prove the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I deleted the form letter because I feel that a heart felt and unique letter is more impactful. Born, raised, and currently reside in Redondo Beach, near the galleria and proposed C/K line extension. I am strongly in favor of the LPA because it will bring transit closer to people who will use it. Efficient and effective public transit is the only solution to reducing traffic and congestion in SoCal. I use Metro light rail to get all over Los Angeles. I work as an airline captain at LAX and WILL use this transit line to get to my job. I do not want the line to run down Hawthorne Blvd, I do not want to delay construction any longer, and I do not want to spend an additional $700m of taxpayer funds to accomplish this goal.

Thank you for your consideration and thank you for advancing high-quality transit to the South Bay.

Sincerely,

Mark Cole

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I'm a resident of North Redondo Beach and, I write to you in strong support of the C/K Line Extension to Torrance and the Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear pathway to construction.

I personally struggle to utilize the K line right now as the current stop is a 1 hour walk from my home. The extension would dramatically decrease this walk to 30 minutes and I know that this extension would increase access to the line in the first place. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of Orange County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I am someone who may live outside of LA County, but the benefits will have life changing effects for all of us. This could be what convinces Orange County to build transit connections to LA County and integrate our region as a whole. This is also would could make the Olympic experience better in 2028.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. The Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Diane Cole

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on Measure R and M promises, address community concerns, and bring 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. The project has been studied for decades, refined in the FEIR, with meaningful mitigations for residents. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations and will be completed 2-4 years sooner to serve more people. The Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding to uncertainty and timeline. The Board Report and Final EIR prove the C Line to Torrance Hybrid LPA for countywide and regional mobility.

Let's get this done right. FOr current and future generations.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of Torrance, I write in strong support of the C/K Line Extension to Torrance. Specifically, I support the staff-recommended Hybrid LPA on Metro's ROW. It was selected by the Board in 2024, and refined in the Final EIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction. Unfortunately, an anti-ROW disinformation campaign has misled locals into believing Metro is destroying a park space. Please remember: Lawndale homeowners do not own the ROW, Metro does.

Is choosing Hawthorne even worth foregoing a seamless bus/rail connection at a brand new transit facility? I've been to the Redondo Beach Transit Center, and as someone who struggles with noise sensitivity it is much quieter and more peaceful to wait at. I honestly do not believe for a second that anyone would prefer a bus to K Line connection at the noisy, highly trafficked Hawthorne/Artesia intersection. Personally, I must cross Pacific Coast Highway every morning to access the Metro 232 bus to work. Drivers speed past red lights in the early morning/late night all the time, and it is always a game of life or death. A new Metro station in the South Bay doesn't belong at an arterial; it belongs at the convenient, consolidated bus plaza at Redondo Beach TC with safe, seamless bus/rail connections for transit riders.

The South Bay is a transit desert, and we urgently need our rail extension here in Torrance. Choosing to build within Metro's ROW means saving over $700 million, a stronger bus/rail connection, safer station access for transit riders, and faster project delivery by years. I do not have a driver's license, so please take this from me as a transit-dependent South Bay resident and worker who'd benefit most from the ROW route: A motion against staff recommendation after decades of study and outreach should be evaluated critically. Please stick to the original Locally Preferred Option; let's go with the ROW.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a lifelong resident and property owner in Redondo Beach, I strongly support the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. I live off 190th and this transit would be within the last mile to my house!! It would be outstanding!!
I work for the County and commute to Long Beach and sometimes East LA. We need the South Bay to connect to LA and Long Beach transit. I would use it as a commuter and recreationally on my days off.
There are lots of laborers that work in the wealthy areas of the South Bay in restaurants, construction and house cleaning, and childcare. Please give them an efficient way to commute and reduce parking and traffic problems.

The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the EXISTING EXISTING EXISTING freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. The Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Christopher Maloney

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County AND the city of Torrance, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA.

I moved to Torrance three years ago from South LA on Exposition Blvd where I enjoyed the benefits of having Metro services nearby. The train made it more likely for my family and I to visit Downtown LA where we would patron many restaurants and businesses. We also took the train to the Rose Bowl, Union Station, Santa Monica, and even Long Beach. The recent addition to LAX makes it even MORE imperative for Torrance to be better connected to the LA Metro system. If we pass this once in a generation opportunity, Torrance will FALL BEHIND other LA networks in their ability to grow financially. Please do not let the voices of the privileged few derail the future of Torrance. I wish I could make it to the board meeting person, but I, like many others are working. I am a public school teacher in LAUSD so the best I can do to make my voice heard is to write this letter.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations and will be completed 2-4 years sooner to serve more people. The Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding to uncertainty and timeline. The Board Report and Final EIR prove the C Line to Torrance Hybrid LPA for countywide and regional mobility.

Sincerely,
Darlene Tieu

We need more rail to connect LA county to reduce the amount of burden that our roads face today. Increased populations around the area have meant more cars on the roads. If we can extend the lines such that the metro system no longer relies on a central node, it will make it easier to get around and increase ridership. I believe that this is a great step towards this goal. I would benefit from riding this train to get from Torrance to the airport as well as further connections into LA city without having to make a pit stop at downtown LA. I'm a firm believer that there are many more people like me that will benefit as I would.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits and best pathway to construction. We've been evaluating this for over 40 years with thorough and comprehensive review.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative delays delivery, costs nearly $1 billion more, and generates impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition. The project has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Proceed with the long-studied staff-recommended Hybrid LPA.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As an LA County resident and frequent user of LA metro transit, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It's also the option that will extend the benefits of transit access to local residents on the quickest and most certain timeline.

The Hybrid LPA option will bring a desperately needed alternative to the congested I-405 to South Bay residents, which will benefit car commuters as well by reducing traffic volume. Additionally, this option will directly create 15,000 construction jobs while supporting potentially tens of thousands more jobs by connecting local residents to employment all across LA County. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. Please support economic opportunity in Torrance and the wider County by choosing the extensively studied and scoped Hybrid LPA route for the C/K Line Extension.

Sincerely,
Michael Canavan
Chapter Chair, Abundant Housing Pasadena

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the Long Beach, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA.
I urge this for a couple reasons one as a recent Long Beach resident I look forward to the future where we can have a one seat ride to LAX. If this project gets delayed or gets with a less than ideal alignment, that future for the entire city of Long Beach and greater LA region is in danger. Projects like these are great at highlighting the impact that one transit line can have across an entire region. Additionally, the connectivity and mobility, as we also plan out the K line northern extension will be massive and it's impact cannot be Understated.

2. The Hybrid Locally Preferred Alternative selected by the Board in 2024 and refined in the FEIR delivers a thoughtful and comprehensive solution. It upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and generate risks to drivers, businesses, and transit riders. The Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project for South Bay and regional mobility.

Thank you for advancing high-quality transit to the South Bay,

Irvin Samuel

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits and best pathway to construction. We've been evaluating this for over 40 years with thorough and comprehensive review.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative delays delivery, costs nearly $1 billion more, and generates impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition. The project has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Proceed with the long-studied staff-recommended Hybrid LPA.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA review adding uncertainty and timeline. Further delays are not progress. I trust the 40+ years of study, analysis, and expertise. Bring rail now!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,
As a resident of Long Beach, I write in strong support of the C/K Line Extension to Torrance and urge you to support the Certification of the Final EIR to advance the project without delay.

As a resident of Long Beach with family in the Torrance area, this project is a necessary step to eventually directly connect Long Beach to Torrance by rail line as an alternative to the often congested drive down PCH

The Hybrid Locally Preferred Alternative selected by the Board in 2024 upgrades the existing freight corridor to be safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths.

The South Bay urgently needs a transit alternative to the congested I-405 and currently lacks rapid transit. While Metro has expanded rail across the County, the Extension to Torrance—promised in Measure R and Measure M—is long overdue. The Hybrid LPA avoids added cost and approvals for the Hawthorne alternative, which could delay delivery by 2-4 years, cost nearly $1 billion more, and disrupt roads and transit riders. This project is supported by dozens of community, business, and labor organizations, has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders.

Thank you for advancing high-quality transit,
Nathanael Roy

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

Please stop spending our tax dollars on meetings about building this train and instead spend our tax dollars on breaking ground on the project by selecting the Hybrid LPA option which will be able to begin soonest.

Both options are grade-separated and serve the same people with the same stops. It's a waste of time to keep discussing it and we need to break ground. The longer you wait the more of our money goes to waste.

I want to hear drills in my backyard,

Rani Hanna

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the Westside, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project.

Thank you for advancing high-quality transit to the South Bay,

Santiago Vitturi

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid Locally Preferred Alternative. The Hybrid LPA modernizes a freight corridor Metro already owns, improves safety and noise conditions, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and Measure M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

I have lived in Los Angeles my entire life and have never driven. For people like me, reliable transit is not a preference, it is access. When entire parts of our region remain disconnected, it sends a message about who the system is designed for. Approving the C/K Line Extension to Torrance is a meaningful step toward a more connected and equitable LA County, and after more than 40 years of study, it is time to move forward.

The Hybrid LPA has over $1.4 billion already secured, more than 52% of total project costs, putting it ahead of other Metro rail projects at the Final EIR stage. It will better serve transit riders with neighborhood-accessible stations, rather than a station along an eight-lane highway, and it will be completed at least four years sooner than the Hawthorne Option. The plan includes construction mitigation and mobility paths without displacement. The Hybrid LPA can move forward with state funding, while the Hawthorne Option would require additional delays tied to federal funding and NEPA review, adding uncertainty and time. Further delays are not progress. I trust over 40 years of study, analysis, and professional expertise. Bring rail now!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project.

Thank you for advancing high-quality transit to the South Bay,

Jordan Igow

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a longtime South Bay resident, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA.

This project matters deeply to me. Not only because I live and work in the South Bay, but because I've seen firsthand how the lack of reliable transit limits opportunities for residents, workers, and students here. The 405 is gridlocked almost every day, yet there's still no practical rail option connecting Torrance and nearby communities to the rest of Los Angeles. I care about sustainability, public health, and making our region more accessible without forcing people to rely solely on cars.

The Hybrid LPA, using the existing rail corridor with grade separations and mitigations, transforms that space into something safer, quieter, and more connected. It also creates green space, bike paths, and pedestrian access; amenities that would dramatically improve the quality of life while aligning with the South Bay's environmental values.

With the new K Line and LAX Metro station, this project delivers a reliable 19-minute trip from Torrance to LAX and direct access to major destinations like Inglewood, Culver City, Santa Monica, and Downtown LA. The South Bay urgently needs this link. The funding is already promised under Measures R and M. We need to catch up with the rest of the county's investments in rail. After decades of study and discussion, the Hybrid LPA offers the most balanced and community-supported way forward.

As someone who loves this region and wants a cleaner, more connected future for our families, I urge you to certify the Final EIR and move this project ahead without further delay. Please champion the K Line Extension to Torrance and help deliver the high-quality transit the South Bay has waited too long for.

Thank you for your leadership and commitment to a more connected Los Angeles.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, specifically of the North Hollywood area, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA! The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. I trust the process and studies and it's time we get this built. As someone who chooses not to drive, but volunteers and does event planning all over the County, I have loved to see all of the lines being built and expanded upon! These have already saved me time and added accessibility to go much further east than Pasadena like it used to be, but I miss out on regularly going to the South Bay events.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of the South Bay, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. This alignment would work to improve safety and noise as well as providing a potentially faster route from Torrance and Redondo Beach to LAX than driving. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region. On top of the immediate benefits, this project is also crucial in getting Metro Rail in the South Bay, improving connectivity across the system. Doing so also provides a foundation for which we can later build on for an even more transit-accessible version of Los Angeles.

Compared to the other alternative, the Hybrid LPA has the benefit of over $1.4 billion in funding already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. The plan includes neighborhood-accessible transit stations that will serve the community better than the Hawthorne alignment would while also doing so at least 4 years quicker and while avoiding displacements. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. Further delays are not progress. I trust 40+ years of study, analysis, and expertise. Bring rail now!

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the Harbor Area, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and the Harbor Area, even more so. Bringing this line to Torrance is closer to the Harbor Area which also urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attrac ts 1.5 million new riders. Please certify the Final EIR and champion this critical rail project.

Thank you for advancing high-quality transit to the South Bay,

Toni O'Donnell

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of the South Bay from 1972 to 1992 and my parents living within 1 mile of the Redondo Beach C Line station, I fully support the ROW option.

Please do not make a fatal mistake and send the extension down Hawthorne Blvd.! Please?

The ROW option is $730 million less expensive!!!!!
The South Bay Galleria station has so much potential to serve so many current residents and future residents if the Galleria property is re-developed into a mixed use development.
Torrance and Harbor Gateway's density continues to INCREASE i.e. Del Amo Mall parking lot turning into a massive apartment complex.

It is so difficult to drive to Torrance Memorial and Providence (Little Co. of Mary) Hospitals currently due to traffic.
Please help the South Bay have the BEST transit options = ROW alignment.

Thank you,
David Jund

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Having lived in the other largest cities in the US, being New York City and Chicago specifically, I understand how walkable cities via rail has made my life much healthier, cheaper, and more social. As I have now returned to my childhood home in North Redondo Beach, I will not pass up an offer to improve its public transportation. Especially with the connections to the new LAX station, Galleria, and (near) Del Amo, we can make the K line so much more useful and accessible than it is now.

Thank you for advancing high-quality transit to the South Bay,

Ansar Fatani

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically. Please go with the common sense option and help the city of Torrance connect with the rest of the county and metro network. The access to simple commuting options and car free transport to the airport would be an amazing benefit to the people living here.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. I have lived in Los Angeles for 10 years without a car. Relying on metro to get around, I've never been able to quickly and directly get to Torrance or the many wonderful communities on this proposed route. This extension would provide important accessibility across the basin. Please do what you can to move this project forward!

Thank you,
Danita Bayer

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative modernizes a freight corridor Metro already owns, improves safety and noise, and provides an under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed at least 4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths without displacement. Hybrid LPA can move forward with state funding while the Hawthorne Option will require further delays with federal funds and NEPA adding uncertainty and timeline. Further delays are not progress. I trust 40+ years of study, analysis, and expertise. Bring rail now!

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

Kevin Hernandez

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

Honorable Chair Dutra and Directors of the LA Metro Board,

I strongly support the C/K line extension to Torrance and wish you to finally get it done. I am over 50 years old and for more than 40 of them I have lived in Torrance (South High class of 1990), and for most of that time I have wished that I could easily hop on a train to get to other parts of Los Angeles County. I remember this possibility being discussed in newspapers in the 1980s. Running the K Line extension to the new Torrance Transit Center, over forty years later, has taken longer than I would have thought, and I really hope the board will seize a moment of clarity and vote to certify the Final EIR and approve the staff-recommended Hybrid LPA alignment.

Your own staff and the people in favor who are able to get off work and show up to this meeting will have already explained to you why this is the best choice: improved safety and quiet over the freight line – which has existed there for longer than any of the people complaining about it – and less disruptive and cheaper than the alternative Hawthorne Blvd alignment. I want to be able to catch the K line at the Torrance Transit Center and ride the LA Metro. It will help people everywhere in the South Bay; the support that this Hybrid LPA has among the people represented by the city and other supporting organizations shows this.

Please certify the Final EIR and bring this critical rail project to fruition.

Please.

Thank you for advancing high-quality transit to the South Bay,

Carrie Trimmer

* Adding the line will decrease traffic and and lower air pollution, with more people being transported in fewer cars/vehicles, and so that we can breathe cleaner air. It will also help with feeling connected to the amazing people and businesses of Greater LA. The Torrance station is huge, and there's a lot of potential to build a train linkage up to LAX!

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR and advance the project with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

Chaewon Winter

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining highly cost-effective. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents. I trust the process and the studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). Hybrid LPA will better serve equity-focus groups near the rail corridor with accessible transit stations and will be built sooner to serve more people. The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance Hybrid LPA for countywide and regional mobility.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

I have been a transit rider since I attended high school in Harbor City, and my passion for public service and transportation led me to pursue a Master's of Urban Planning at USC. It is essential that we can build affordable, realistic, and effective alternatives to continued car dependency. I urge the Metro team to approve the Hybrid LPA, which will put trains to Torrance sooner, and vastly increase our ability to approve new housing and reduce congestion in LA County starting now!

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. Let's get this train going!

Very respectfully,
Joyous Barva

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Option is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and Directors of the LA Metro Board,

Having available transportation is so important. As a resident of the South Bay, I write in strong support of the C/K Line Extension to Torrance and urge you to certify the Final EIR with the staff-recommended Hybrid LPA. The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear pathway to construction.

The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hawthorne Alternative is far costlier with uncertain approvals and timelines. Hybrid LPA/ROW is supported by the City of Torrance, and dozens of local community, business, and labor organizations. A motion against staff recommendation after decades of study and outreach should be evaluated critically.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance and advance the staff-recommended Hybrid LPA. The Hybrid Locally Preferred Alternative is an environmentally-sound solution that modernizes a freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. This project delivers on Measure R and M promises, addresses community concerns, and brings 15,000 jobs and 1.5 million new riders to the region while remaining fiscally-sound. I trust the process and studies and it's time we get this built.

Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Hybrid LPA will better serve transit riders with neighborhood-accessible transit stations versus a station on an 8-lane highway and will be completed 2-4 years sooner than Hawthorne to serve more people. The plan includes construction mitigation and mobility paths. Hybrid LPA can move forward with state funding while the Hawthorne Option will require federal funds and NEPA review adding uncertainty and timeline. Let's connect the South Bay with light rail!

In addition, as someone who has driven lots around the South Bay, I know for a fact that Hawthorne Boulevard would be stuck with YEARS of traffic and congestion, and us residents would never forgive you for it.

The Hybrid LPA selected by the Board in 2024 and refined in the FEIR uses the existing rail corridor with grade separations and mitigations to make the existing freight corridor both safer and quieter, connects directly to new bus centers, and improves green space with bike and pedestrian paths. It is the most comprehensive option with the most community benefits. We've been evaluating this for over 40 years. Evaluation of alternatives have been thorough and comprehensive.

With the new K Line and LAX Metro station, this project brings a reliable 19-minute trip from Torrance to LAX and direct rail access to Inglewood, Gateway Cities, Culver City, Santa Monica, and Downtown LA. The South Bay is a transit desert and urgently needs an alternative to the congested I-405 for rapid transit. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA avoids added cost, approvals, and disruption in the Hawthorne alternative, which could delay delivery further, cost nearly $1 billion more, and generate impacts to businesses, residents, commuters, and transit riders. Hybrid LPA/ROW is supported by the City of Torrance, dozens of community, business, and labor organizations in the South Bay On Board Coalition and has secured over 52% of funding, creates 15,000 jobs, and attracts 1.5 million new riders. Please certify the Final EIR and bring this critical rail project to fruitio n.

Thank you for advancing high-quality transit to the South Bay,

k s

We need the Metro line extended to the South Bay to ease congestion, reduce commute times, and connect our coastal communities to the broader economic and cultural hubs of Los Angeles. This investment would lower emissions, support local businesses, and finally give South Bay residents equitable access to reliable public transit.

LA Metro Board Clerk,

Honorable Chair Dutra and LA Metro Directors,

As a resident of LA County, I urge you to certify the Final EIR for the C/K Line Extension to Torrance. The Hybrid Locally Preferred Alternative is a thoughtful and fully grade-separated solution that modernizes an aging freight corridor, improves safety and noise, and provides a direct under-19-minute ride from Redondo Beach and Torrance to LAX. It strengthens regional connections to jobs, housing, education, and communities on the K Line while improving first-last mile mobility. This project delivers on a Measure R and M promise, addresses community concerns, and brings 15,000 jobs. The project has been studied for decades, with extensive refinement in the FEIR, and meaningful mitigations for residents.

The Hybrid LPA has over $1.4 billion already secured—over 52% of total costs—putting it ahead of other Metro rail projects at FEIR certification. Other Metro projects have advanced from FEIR with far less funding in place, from Eastside Transit Corridor (33%) to Southeast Gateway Line (20%). The C/K Line Extension is well-positioned to receive additional state funding and remain competitive amid tariffs and inflation. Now is the time to champion and advance certification and approval of the C Line to Torrance for countywide and regional mobility.

Dear Metro Board of Directors and Staff,

Metro keeps telling you that there are "no residential property acquisitions" if you were to choose the ROW for the C/K Line Extension to Torrance. If that is true, why did my nextdoor neighbor receive this notice from Metro talking about acquiring his property??? And why is he also getting letters from Eminent Domain lawyers??? I am attaching the two letters for you to read.

At the very least, Metro has done a piss poor job of communicating with our neighborhood. On one hand, we are getting this property on acquisition letters. On the other hand, Metro tells you there aren't any property acquistions on the ROW. So who am I supposed to believe? Where has the outreach been to affected property owners? Nobody has every knocked on my door. The best we get is a little postcard rubberbanded to our fence.

This neighborhood is living in constant fear of what is going to happen with this light rail extension. You have the chance to put this community's minds at east on Thursday if you vote PUT IT ON HAWTHORNE BOULEVARD and not on the ROW.

Thank You,

Jorge Jimenez

RE: Notice of Availability (NOA) of Final Environmental Impact Report (EIR) for the C (Green) Line Extension to Torrance Project

Dear Property Owner:

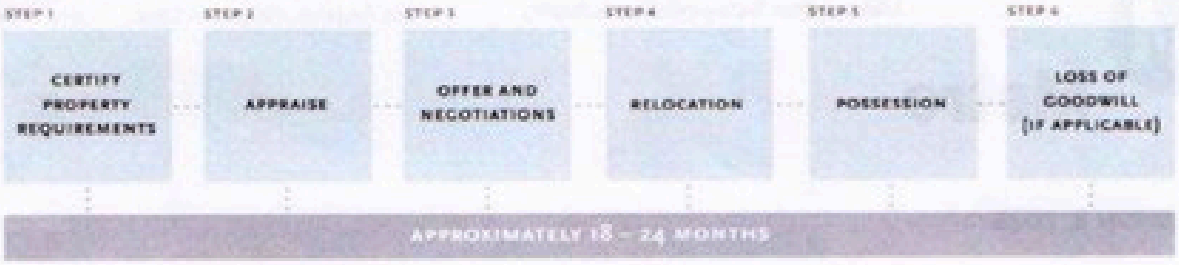
The Los Angeles County Metropolitan Transportation Authority (Metro) has published the Notice of Availability (NOA) for the Final Environmental Impact Report (EIR) for the C (Green) Line Extension to Torrance Project (Project) pursuant to the California Environmental Quality Act (CEQA). This Final EIR responds to all comments received on the Draft EIR during the public comment period and incorporates revisions and clarifications where appropriate. The complete EIR will consist of the Draft EIR and the Final EIR, including responses to comments. The document is available on the Project website at metro.net/clineext.

Metro is the lead agency for the Project, a proposed light rail transit line that would extend approximately 4.5 miles from the end of the existing Redondo Beach (Marine) Station southeast to Torrance traveling along portions of the Metro-owned Harbor Subdivision freight railroad right-of-way (Metro ROW). The proposed light rail line would operate as part of the Metro K Line with connections to Los Angeles International Airport (LAX) and the Metro C (Green) Line and E (Exposition) Lines. On May 23, 2024, the Metro Board of Directors (Metro Board) selected the Hybrid Alternative, evaluated in the Draft EIR as the 170th & 182nd Street Grade Separated Light Rail Alternative, as the Locally Preferred Alternative (LPA). The LPA travels along the Metro ROW with two new stations (Redondo Beach Transit Center and Torrance Transit Center), see Attachment A.

The purpose of this letter is to notify you that the LPA described in the Final EIR *may* affect your property and, if the Metro Board of Directors certifies the Final EIR and approves the Project, the Project may require acquisition of, or an easement on, your property. Please refer to Appendix B of the Final EIR, Advanced Conceptual Engineering (ACE) Plans for the LPA, which identifies all properties that may be affected by the Project, either *temporarily* during construction or *permanently* for the operation of the project.

In addition to the Final EIR, Metro staff has prepared the 2025 Real Estate Acquisition Report, which provides a summary of potentially affected properties, which is available on the Project website at metro.net/clineext. The standard property acquisition process is shown below. More information about Metro's property acquisition process is available at: https://www.metro.net/about/property-acquisition.

Acquisitions and Negotiation Process



Relocation Process

The Final EIR is available for review at the website, metro.net/clineext, and at the following locations:

- Lawndale Library (14615 Burin Ave, Lawndale, CA 90260)
- Redondo Beach North Library (2000 Artesia Blvd, Redondo Beach, CA 90278)
- North Torrance Library (3604 Artesia Blvd, Torrance, CA 90504)
- Katy Geissert Civic Center Library (3301 Torrance Blvd, Torrance, CA 90503)
- Metro Headquarters Library (One Gateway Plaza, Los Angeles, CA 90012) by appointment only. Please email library@metro.net to schedule an appointment.

The Metro Board is anticipated to consider certifying the Final EIR and approving the Project in Fall 2025, at one of the Board's regularly scheduled monthly Board meetings. The Metro Board's meeting agendas are publicly posted in advance of each meeting. The Metro Board meetings are typically scheduled to start at 9:00 am in the Metro Board Conference Room, One Gateway Plaza, 3rd Floor, adjacent to Union Station in Downtown Los Angeles. Information regarding a specific Board meeting's time and agenda can be found at: https://boardagendas.metro.net.

If the Board approves the Project and certifies the Final EIR, Metro will file a Notice of Determination (NOD) with the County Clerk and State Clearinghouse to complete the CEQA process.

Sincerely,

RE: Notice of Availability (NOA) of Final Environmental Impact Report (EIR) for the C (Green) Line Extension to Torrance Project

Dear Property Owner:

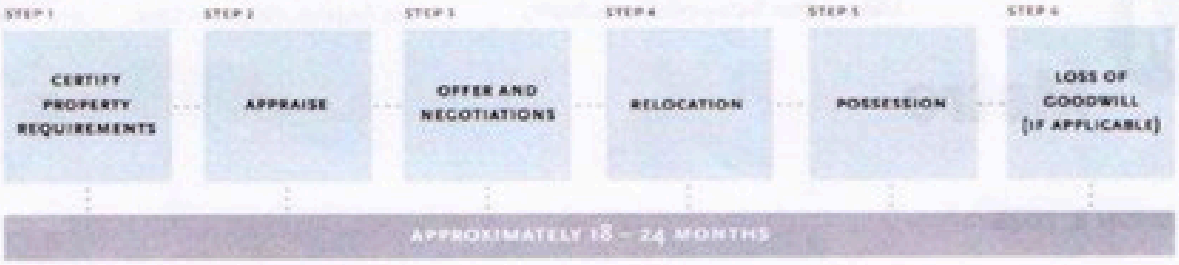
The Los Angeles County Metropolitan Transportation Authority (Metro) has published the Notice of Availability (NOA) for the Final Environmental Impact Report (EIR) for the C (Green) Line Extension to Torrance Project (Project) pursuant to the California Environmental Quality Act (CEQA). This Final EIR responds to all comments received on the Draft EIR during the public comment period and incorporates revisions and clarifications where appropriate. The complete EIR will consist of the Draft EIR and the Final EIR, including responses to comments. The document is available on the Project website at metro.net/clineext.

Metro is the lead agency for the Project, a proposed light rail transit line that would extend approximately 4.5 miles from the end of the existing Redondo Beach (Marine) Station southeast to Torrance traveling along portions of the Metro-owned Harbor Subdivision freight railroad right-of-way (Metro ROW). The proposed light rail line would operate as part of the Metro K Line with connections to Los Angeles International Airport (LAX) and the Metro C (Green) Line and E (Exposition) Lines. On May 23, 2024, the Metro Board of Directors (Metro Board) selected the Hybrid Alternative, evaluated in the Draft EIR as the 170th & 182nd Street Grade Separated Light Rail Alternative, as the Locally Preferred Alternative (LPA). The LPA travels along the Metro ROW with two new stations (Redondo Beach Transit Center and Torrance Transit Center), see Attachment A.

The purpose of this letter is to notify you that the LPA described in the Final EIR *may* affect your property and, if the Metro Board of Directors certifies the Final EIR and approves the Project, the Project may require acquisition of, or an easement on, your property. Please refer to Appendix B of the Final EIR, Advanced Conceptual Engineering (ACE) Plans for the LPA, which identifies all properties that may be affected by the Project, either *temporarily* during construction or *permanently* for the operation of the project.

In addition to the Final EIR, Metro staff has prepared the 2025 Real Estate Acquisition Report, which provides a summary of potentially affected properties, which is available on the Project website at metro.net/clineext. The standard property acquisition process is shown below. More information about Metro's property acquisition process is available at: https://www.metro.net/about/property-acquisition.

Acquisitions and Negotiation Process



Relocation Process

The Final EIR is available for review at the website, metro.net/clineext, and at the following locations:

- Lawndale Library (14615 Burin Ave, Lawndale, CA 90260)
- Redondo Beach North Library (2000 Artesia Blvd, Redondo Beach, CA 90278)
- North Torrance Library (3604 Artesia Blvd, Torrance, CA 90504)
- Katy Geissert Civic Center Library (3301 Torrance Blvd, Torrance, CA 90503)
- Metro Headquarters Library (One Gateway Plaza, Los Angeles, CA 90012) by appointment only. Please email library@metro.net to schedule an appointment.

The Metro Board is anticipated to consider certifying the Final EIR and approving the Project in Fall 2025, at one of the Board's regularly scheduled monthly Board meetings. The Metro Board's meeting agendas are publicly posted in advance of each meeting. The Metro Board meetings are typically scheduled to start at 9:00 am in the Metro Board Conference Room, One Gateway Plaza, 3rd Floor, adjacent to Union Station in Downtown Los Angeles. Information regarding a specific Board meeting's time and agenda can be found at: https://boardagendas.metro.net.

If the Board approves the Project and certifies the Final EIR, Metro will file a Notice of Determination (NOD) with the County Clerk and State Clearinghouse to complete the CEQA process.

Re: Proposed Acquisition of Property for the
C Line Extension to Torrance Project
by the Los Angeles County Metropolitan
Transportation Authority (LACMTA)
APN(s): 4080-003-019

[redacted]

As you may know, a final Environmental Impact Report (EIR) was released to the public on September 12, 2025 by the Los Angeles County Metropolitan Transportation Authority (LACMTA) for the proposed C Line Extension to Torrance Project. As a result, you may be entitled to certain compensation and benefits under California's Eminent Domain Law and Relocation Assistance Act. You have certain rights, remedies, and claims if your property (or a portion thereof) is acquired. Any documents you sign may affect those rights, remedies, and claims. In addition, there may be actions you should take now to preserve your rights and enhance your claims for just compensation.

Our law firm has concentrated in the areas of eminent domain and relocation in California for over 65 years. During that time, we have handled well over a thousand matters for property and business owners seeking greater compensation for their real estate interests, improvements, fixtures and equipment, loss of business goodwill, and other claims. We have also handled many eminent domain matters involving multi-family residential parcels including apartments, condominiums, townhouses, mixed-use and planned unit developments. We are very experienced with the unique valuation issues that are involved with these types of properties.

Our firm routinely handles these matters on a contingent fee basis based on a percentage of the amount received in excess of the agency's initial offer. The amount of the percentage is negotiable and we are willing to discuss a mutually acceptable arrangement. At your request, we can meet with you to discuss your potential claims and the benefit of competent legal representation. There is no charge or obligation for an initial conference. If you are currently represented by counsel, please disregard this letter.

If you are interested in discussing this matter further, please give me a call at the number listed above or toll free at (800) 717-4990. If I am not available, please ask for my partner Charles Cummings.

Very truly yours,

[redacted]

Hi,

Please don't kill the South Bay extension! I live by the K line.

This is some of the least disruptive construction in an urban environment ever, not just compared to other rail. It's going where rail already is.

Dear Metro Board Members,

I am writing in strong opposition to the Board once again entertaining the Hawthorne Blvd. alignment for the South Bay C Line extension.

I grew up in Redondo Beach. I live with the consequences of decades of "study," delay, and capitulation to a small but loud group of NIMBY opponents who oppose transit on principle, not facts. It is infuriating to watch Metro consider throwing away years of planning and public money to appease people who will oppose any alignment, anywhere.

Revisiting the Hawthorne alignment risks delaying this project for years and could easily kill it altogether. Everyone involved understands this. Any option that is slower, more expensive, and less build-ready directly undermines Metro's credibility and commitment to delivering real transit, not just endless process.

Metro staff have already done the work. The Hybrid alignment is cheaper, faster to construct, and ready to move forward. Ignoring your own professional staff in favor of political pressure sets a dangerous precedent and sends a clear message that the loudest complainers — **not the public interest** — run this agency.

Opponents of the Hybrid alignment are not protecting the community. They are protecting their own narrow interests at the expense of mobility, climate goals, and future generations. And if the Board believes only one side can be loud, I can assure you that supporters of real transit can be loud too — and we vote.

Stop delaying. Stop rewarding obstruction. Adopt the Hybrid alignment and get shovels in the ground.

Sincerely,
Ben McLaughlin

boardclerk@metro.net
Directors of the LA Metro Board,

As long time residents of the South Bay my family and I write in absolute opposition to the proposed rail line through the neighborhood corridor known as " The Row".
1. It offers no access to businesses, jobs or services. It would leave riders in the middle of a suburban neighborhood with blocks to walk for any access.
2. It would destroy the livability of an established community
3. It would be dangerous and disruptive.
4. It is a useless location for transit.
5. There is no reason someone would take public transportation along this route rather than the 405 as there destinations do not coincide.
IN CONTRAST: HAWTHORNE BLVD is the central artery for access to commercial sites, medical offices, hospitals, service businesses and JOBS. It IS where people NEED to be.
ASK the people where they need to go! Ask the people what they need and do not destroy a community on an ill conceived plan of transit to nowhere. It isn't saving money to build a system that serves no constituents.

Most Sincerely,
William and Marianne Hunter

Dear Metro Board Members and Project Staff,

I regret that I am unable to attend the upcoming Metro meeting on Thursday due to a scheduling conflict, but I want to ensure my concerns regarding the proposed Hawthorne Blvd. alignment are formally submitted for the record.

My concern is not opposition to transit expansion, but the long-term viability of the Hawthorne Blvd. option as it is currently being advanced. Increasingly, it appears to function as a Not-In-My-Backyard workaround rather than a realistic regional solution. By shifting the alignment away from an existing right-of-way and into a major arterial that crosses multiple jurisdictions, the project risks becoming mired in prolonged litigation, overlapping community processes, and repeated Metro Board deliberations. Those risks are largely avoidable if Metro makes full use of the existing right-of-way already designed for rail operations.

History suggests that alignments dependent on multiple cities' consent—particularly when they introduce new surface-level impacts—face significant delays. In practical terms, this approach could stall Metro's expansion into the Redondo Beach vicinity not because of engineering constraints, but because of procedural and political friction.

There is also a broader regional consequence. If this alignment leads to extended delays, Redondo Beach risks missing meaningful participation in the upcoming Olympic transit network. That would affect not only visitors, but residents and workers who would otherwise rely on reliable rail access during a period of unprecedented regional demand.

Finally, I am troubled by the inconsistency in how local land-use and impact concerns are being handled. Voters in Redondo Beach were recently asked to set aside similar concerns in the name of local autonomy and regional necessity. Reintroducing those same arguments now —through third-party advocacy rather than direct public accountability—raises questions about process transparency and long-term trust.

I urge Metro to carefully consider whether the Hawthorne Blvd. option genuinely advances regional connectivity, schedule certainty, and rider safety, or whether it introduces avoidable risks that could delay service to the South Bay for years.

Thank you for your time and for your consideration of these comments.

Sincerely,

Pat Healy

Hello,

I would like to voice my support for the Hybrid LPA for the South Bay extension project. I believe the detractors for this project are acting in BAD faith, and do not want any line at all. The hawthorne option will cost more and take longer to build, it does not make sense. Use metro's hybrid right of way please!!!

I also do not support any restriction ot watering down of SB79. The city is in a housing crisis, with a clear lack of housing supply. I know many young talented bright individuals in this city who cannot afford a home. Do not destroy their American Dream!!!

Thank you,

Skye Higa

To whom this may concern,

My name is Luka Peharda, and I am a resident of the City of Los Angeles on the Westside. My comments for Board Agenda items at the Regular Board Meeting scheduled on 1/22/26 at 10am are as follows:

Agenda Item 10
I am writing in strong and utmost support of the modified version of Alternative 5 for the Sepulveda Corridor Project. It is critical to establish this missing link in the Metro network and provide an alternative to the 405. The time savings, cost effectiveness, and reduced likelihood of having to combat litigation from homeowners/residents in the areas affected by the overall project make this the best option, and the technology implemented may have the benefit of being used as a model for future Metro projects. As a resident of the area, I urge the board to choose the option that will make the largest impact and help develop a critically underserved throughway with respect to transit service.

Agenda Item 11
I am writing to urge the board to approve the selected and Metro-staff-reccomended Locally Preferred Alternative for the South Bay C/K line extension. This will utilize the existing Metro ROW and serve the newly built Redondo Beach Transit Center, serving numerous core and critical bus lines. Utilizing the existing ROW will ensure the project can be built within a reasonable time frame, support the most ridership, and help develop the surrounding area for desperately needed housing.

Agenda Item 11.1
I am writing in strong opposition to this last minute motion by board members Mitchell, Sandoval, and Dupont-Walker, which would go against the staff recommendations for this project, the South Bay C/K line rail extension. This motion disregards the selected Locally Preferred Alternative, and would reduce ridership, cost efficacy, and require additional CalTrans involvement that will push this project beyond any reasonable timeline for completion. The environmental and developmental costs are not worth any benefit this option could bring. Metro is supposed to represent the interests of the people it serves, as it receives publicly funded money for the vast majority of its operations and projects. This last-minute maneuver undermines that integrity, and will connect to fewer transit services in the area. The project area, likely to become part of the K line upon completion, will be part of a critical light-rail line defining north-south connectivity on the Westside and Mid-city, and we can't afford to stop short of a truly beneficial solution that enriches lives and makes transit more accessible and effective. Pursuing the Hawthorne option may also require partial closures of

key freeways in the area, a move likely to upset commuters while the project is being built, and as it stands, Metro doesn't have a great reputation for effectively communicating road closures and detours, as well as the impacts of its construction projects. Please pursue the Locally Preferred Alternative to ensure this project reaches its utmost potential.

Agenda Item 22
I am writing in staunch opposition to the pursuit of debt as funding for the $1.7 billion needed for the ExpressLanes project on the I-105 freeway. Pursuing debt for a project that will only encourage induced demand and increase traffic emissions and congestion is a shortsighted move, especially considering there are a number of emissions-reductions related projects Metro could be pursuing with borrowed funds instead. The continuation of ExpressLanes will result in more cars on the road, which is in stark contrast to Metro's mandated goal of reducing VMT, or Vehicle Miles Traveled. I urge Metro to pursue alternate means of improving congestion and reducing emissions, such as improving the frequency (and thus reliability) of surrounding local bus lines and the Metro C line, as well as a zero-emissions bus fleet. Prioritizing C line improvements, such as platform extensions to accommodate 3-car trains, and the already-in-progress overhead wire replacement will produce a much better outcome when measured in terms of people moved per hour in a given segment, and when measured in terms of VMT and emissions reductions.

Agenda Item 33, Action B
I am writing to oppose the Metro-staff-reccomended opposition to SB 677. This bill would enhance the effectiveness of SB79, which was approved by legislators, and is broadly supported by the greater Los Angeles area community. Though not the same topic, broad support of measure HLA in the city of Los Angeles should be a harbinger for overall public support of SB79 because they both encourage the development of transit-related improvements and plot a more sustainable path for LA County's future. Opposing this measure would undermine public trust in the Metro Board even further than it already is, and trying to exempt LA County from SB79 would be an unprecedented move that would cost Angelenos decades of future sustainable development in our County. Los Angeles faces some of the highest housing costs in the nation, and as people leave the LA area and California, they will look back and see these policy failures as representative of the current government, and when it comes to public transit, the Metro Board is the governing authority for LA County.

Agenda Item 45 and related General Public Comment
I understand the following comment is long in duration but I request board members read it through as it addresses perhaps the most difficult operational challenge currently being undertaken by Metro bus operations. I know Board Member Hahn in particular has been vocal about how long the canceled bus procurement has been dragging on and following J line electrification so I hope she in particular will read the following, while hoping the entire board does as well.

I am writing to urge the Metro Board to approve Agenda Item 45, a contract for the acquisition of, and service-level-agreement for, up to 73 on-route chargers for battery-electric buses. Metro lags far behind on zero-emissions bus deployments in LA county, and this item will help close that gap and ensure battery-electric buses can complete longer service blocks.

Summary of the following additional comments: Bus electrification challenges are unique to Metro and Metro staff incompetencies, as evidenced by electrification progress observed by other agencies with market-available technologies that could meet Metro's needs, but staff have been pursuing poor options for bus procurements. Recommendations for a future board

or Operations Committee motion are in the last sub-section of commentary.

Background and Metro's history with zero-emissions buses

In a similar fashion, I am extremely concerned about the competency of Metro staff when it comes to implementing the board-mandated 2035 transition deadline, as well as the CARB-mandated 2040 deadline. So far, Metro staff have spent multiple years on a bus procurement for zero-emissions buses, just to cancel it at the last minute. That time isn't just wasted time, but rather it's multiple years' worth of salaries for multiple staff members, funded by our taxpayer dollars. This latest procurement attempt has yielded nothing so far. The J line BYD K9MD buses have been pulled from service entirely (with the exception of 3x 2021 models), while the Metro G line continues to operate with largely electric buses. This should highlight the need to investigate and compare the failures and successes and compare the operations of those two lines, but Metro has failed to do so. The Metro G Line has operated battery-electric buses almost consistently (with the exception of Summer 2024) supported by on-route charging since its 2021 electrification date, which was the original goal for the J line. The J line electrification is now more than 5 years behind schedule with no update from Metro staff on issues or timelines other than a failed goal of "Early December" as stated in the last ZEB Program update back in November/December. The J line is equipped with the necessary on-route chargers, yet its buses (and Division 2's local BYD buses) remain out of service, conceivably due to mechanical issues which the manufacturer, BYD, does not have a reliable reputation of fixing. The G line has operated successfully with New Flyer BEBs for all this time. New Flyer offered a proposal for buses for the J line, but Metro staff recommended against it despite New Flyer's proposal being the most highly ranked in terms of technical capability and past experience, and awarded it to BYD on the basis of jobs creation. The public's taxpayer dollars have been wasted on buses that don't work and aren't meeting Metro commitments to electrification, *despite* the fact that Metro has had a history of issues with BYD since 2015 and the first demonstrator units operated out of Division 1, which were then returned to BYD due to issues preventing them from being used in regular revenue service.

The unique nature of these problems to Metro and not other agencies

This issue is largely unique to Metro and incompetencies specific with staff working on this project. In comparison, other regional transit operators have had much more success with fleet electrification, and remaining closer to on-time with their initial schedules. Santa Monica's Big Blue Bus now operates 34 battery electric buses out of its 195-bus fleet, with nearly every zero-emissions bus operating every weekday, despite the fact that BBB has deployed zero on-route charging infrastructure, and only has 20 chargers to charge all 34 BEBs currently in its fleet. They have not experienced anywhere near the amount of mechanical issues, breakdowns, and reliability problems as Metro has experienced with its bus fleet. Their staff have written that Gillig has provided "excellent parts and service support" for the fleet (read more here). Their latest battery-electric 35-footer can complete 250 miles of driving per day, meeting all of their service needs. Those same buses, available in 40-foot capacity, can be equipped with on-route charging to suit Metro's needs of extended service ranges. However, that manufacturer, Gillig, doesn't want to do business with Metro because Metro has alienated the entire bus industry by demanding customizations and specifications not to industry standard norms. They recently won an award for up to 500 40-foot electric buses for King County Metro, which will utilize on-route charging, and their extended range batteries. They are also in the process of another 500-bus delivery for the Dallas Area Rapid Transit agency, which despite being a CNG bus procurement, demonstrates their ability and willingness to work with large order quantities. Sources for these claims of Metro alienating the bus industry

can be found in the questions and answers documents for the now-canceled regional bus procurement Metro solicited in April 2024.

Separately, the city of Gardena's Gtrans and Norwalk Transit have found the same 40-foot Gillig bus suitable to their operations, while not alienating manufacturers by requesting unreasonable levels of customization. Furthermore, Antelope Valley Transit Authority has managed to successfully fully electrify their local and commuter bus fleets using BYD and Motor Coach Industries buses despite the issues associated with the former manufacturer in that list. They completed the local bus electrification 7 years ago now, supported by on-route charging at multiple locations, and cultivated a relationship with BYD. LADOT has experienced issues with their BYD buses, but nevertheless has deployed the largest fleet of electric buses regularly in service in all of LA County. According to their Q&A for a contracted transit services RFP, they are eyeing Gillig and MCI (Motor Coach Industries) to replace the remainder of their local and commuter fleet, respectively (given the reliability issues with BYD and restrictions on federal funding). They are also likely to use the state contract bus delivery approach. Furthermore, Long Beach Transit is currently completing an order of 30 40-foot New Flyer XE40 buses, serving all of their service blocks without requiring on-route charging. These buses have been delivered without sitting unused for months before entering revenue service, unlike the BYD buses Metro has procured.

Metro staff have let timelines slip, and each year, introduce revised program timeline estimates that squash deadlines together to unrealistic turnaround times. Metro's predecessor, SCRTD, and LA Metro itself have a history of operations staff opposing the move to cleaner bus technologies because they like what they know and what is proven at the time. It took twenty years for diesel buses to be replaced in favor of CNG buses, which is significantly longer than the time we have left before being out of compliance with the state CARB mandate. Operations' "comfort" cannot come at the expense of air quality, the environment, and the future for Angelenos. Other agencies have proven that progress is doable and realistic.

The state of Metro's current bus fleet and risks of service impacts during critical events such as Olympics

Metro staff have said in their most recent ZEB Program Update that the oldest buses in the fleet have CNG storage tanks that will begin to expire in September 2028 and that those buses will need to be replaced by then. That is less than two years away, despite average lead times for new buses being 18-24 months. Additionally, poor maintenance of articulated buses have resulted in capacity issues on high passenger volume lines such as the 720, 761, 4, 204, and 754 when 40-foot buses are run to replace service blocks that would normally be filled by 60-foot articulated buses. This directly harms the overall passenger experience, and will decrease rider satisfaction and disincentivize people to ride transit if riding transit means they'll be packed like sardines in buses with insufficient capacity. Additionally, most of the articulated fleet makes up the oldest group of Metro buses. On top of that, 45-foot models also sit at the closest end of the bus replacement necessity timeline, and Metro's newest CNG buses delivered in 2022 comprise less than 400 of the total 2100-strong bus fleet.

The vast majority of the bus fleet currently in operation were delivered by 2018, which means by the Summer 2028 Olympics when Metro will need as many buses as we can get, the vast majority of buses will be at least 10 years old, out of their designed 12-year lifespan. That means that only ~800 buses of the current fleet (assuming the rest of the BYD buses on order enter service by then) will be less than 12 years old by the Olympics. That means that 62% of Metro buses will have passed their useful design life by the 2028 Olympics, while Metro is

depending on these buses to build a critical, high-capacity bus network to transport attendees and officials for the 28 Olympics. Metro has invested so much time and money on other Olympics-ready efforts, that this would be a massive gaping hole. That 62% of the bus fleet being beyond its design lifespan means the likelihood of breakdowns and other service interruptions will increase drastically for those buses, while we are putting them through their paces and depending on them the most. We will likely see some buses running 20-hour days due to the fact that Metro has only secured 650 bus lease commitments for the supplemental bus fleet as of July 2025. This number is nowhere near the Metro-required 2700 buses that would be utilized to more than double the existing fleet. Metro staff have repeatedly said that the average age of the bus fleet is increasing, and we've had no replacements coming in for years, with the exception of the BYDs which are, practically speaking, useless.

Environmental implications
Delaying the transition to a zero-emissions bus fleet places air quality improvements at risk. Los Angeles consistently has some of the worst air quality in the nation, and while Metro bus emissions comprise a small amount of LA County transportation emissions, it all adds up. If everyone took the philosophy of their impact being insignificant, then no one would make any change or any progress. Many climate scientists are already of the opinion that we have eclipsed the 2ºc warming threshold, a point of no return, and that limiting our heating to 1.5ºc is no longer realistic. This is all the more reason to make an impact, and set an example for other agencies across the country. As the largest transit fleet in California, we have the ability to demonstrate that it is possible. And as a transit agency in California, we have access to resources and technology that do enable this transition and numerous agencies across the state and even the larger LA area have demonstrated that substantial progress is possible, as noted above.

Solutions and Recommendations, plus considerations for a future Motion
Metro staff attributed the cancellation of the latest 2024 bus procurement due to three main issues, namely safety, cost, and timeline concerns. Two of those three issues can be addressed by continually pursuing the Washington state purchase agreement for transit buses, and the other can be addressed by utilizing local and in-house resources.

As a matter of safety and the need for operator barriers, the issue excessive customization, while ideal in a perfect world, likely bars Metro from being able to incorporate a dedicated operator compartment or emergency exit window. However, Metro staff have so far been very vocal about the success of the current operator barrier retrofit program, which reduced violent assaults by 100%. Less extensive customization is more likely to appeal to transit bus manufacturers, and if they are unable to provide the full barriers Metro has installed in its existing fleet, Metro can leverage in-house and local external manufacturing as it did for the retrofit project, to ensure these buses are equipped with full barriers before delivery, even if a fully separated compartment is unrealistic. Metro has a history of utilizing local resources for everything from paint, to seat materials, to these retrofit kits, that it is likely to be a realistic and proven approach to closing critical gaps between important Metro specifications and what transit bus manufacturers are willing to offer. Since each bus is delivered through CMF before its assigned division anyway, it would not be too much of a hardship to implement those retrofits at CMF, especially if the rate of bus deliveries on an overall daily basis remains low.\

Regarding the issues of cost and timelines, a way to ensure bus replacements continue, and consistently so, would be to pass a board-sponsored Motion directing *staff to stick to a consistent and steady timeline of bus deliveries on a monthly basis between now and 2035*

(and because buses take time to manufacture and deliver, Metro cannot assume they will just be available when needed, or all at once). The solution is to include in this motion, a board-mandated timeline for bus deliveries to start in 2027 over the next 8 years with (as an example) at least 20 buses per month, every month, through 2035, with the stipulation that if staff are unable to pursue the RFP avenue to meet each delivery number goal for a given number of months at a time or unable to negotiate affordable prices, they must continue utilizing the available state contracts to purchase buses for every month going forward until they can seamlessly transition to a custom bus order via an RFP (or other procurement avenue such as pilot) at a certain future month. This process would correspond to the electrification schedule of bus divisions, and ensure that divisions are electrified with capacity as bus deliveries begin. It would take 13 months starting in 2027 to receive enough buses to completely electrify Division 9's bus complement, and the NoHo to Pasadena BRT and North SFV bus improvements project, which will have adequate infrastructure by then. Following that, Divisions 18 and 7 will be largely completed, allowing for the next buses to be split between them as certain chargers begin to come online. This process can be continued as bus divisions complete the construction of their charging infrastructure throughout the rest of the project timeline and into 2035. Metro additionally has restrictions on the rate of bus deliveries allowed on a weekly basis at CMF, so increasing this restriction to allow for more buses per week would be an effective way to combat the issue. Metro needs to replace approximately 2000 buses over the next 9.5 years, and any bus purchase conducted immediately may have 18 or more months of lead time, due to the state of the bus industry.

There are solutions to these issues, and the Metro board has the ability to influence operating protocols to make these achievements material, instead of just planned.

Hello,

I'd like to write in support of the following items for the board meeting this week:

1. The Hybrid alignment for the K Line south extension will provide fantastic transit access to the South Bay at a reasonable cost. Killing this project or burdening it with extra costs would be a disaster for the region. Please keep this project moving forward!

2. The hybrid Alt 5 routing for the Sepulveda line looks great, please move this project forward!

3. SB79 provides much-needed housing for the region, please end your opposition to this fantastic bill.

Thank you very much for your consideration,
Daniel

Dear Chair Dutra and members of the board,

I am writing to express my support for expanding non-automobile-centered transit infrastructure in the greater Los Angeles area:

Agenda item #10 (2025-1062, Sepulveda corridor):

I support the staff-recommended Locally Preferred Alternative (Modified 5), unanimously approved by the Planning Committee on 1/14/2026. It is the alternative with the highest benefit-to-cost ratio, and will best serve the future transit needs of Los Angeles.

Agenda item #11 (2025-0818, C line extension):

I support approval and FEIR certification of the staff-recommended Locally Preferred Alternative (LPA), which travels along the Metro-owned Right-of-Way (ROW). We commend Metro for measures such as walking paths, landscaping, sound walls, freight improvements, and grade separations for safety, noise reduction and enhancing pedestrian and bicycle mobility. This is a critical project to enhance mobility in the South Bay, and to allow direct rail transit connectivity in the future between Long Beach, the South Bay and LAX areas. The Hawthorne Option is far costlier and more difficult to construct, for negligible enhanced benefit compared to the LPA.

Thank you for your consideration.

Sincerely,

Emily Lindsey

Dear Metro Board Clerk and Members of the Board,

My name is Meher Baghoomian and I'm a loyal Metro LA user. I am writing to express my strong support for the C Line Extension to Torrance and Metro's selection of the Hybrid Locally Preferred Alternative (LPA).

While I am unable to attend the upcoming hearing in person, I wanted to submit a public comment in favor of this project because of its regional importance and long-term benefits. Expanding high-quality rail transit in the South Bay is essential for improving mobility, reducing congestion, and providing more equitable access to jobs, education, and essential services.

I understand that some concerns have been raised about the alignment; however, it is important to note that the proposed route largely follows an existing freight rail corridor. This corridor has long been part of the area's transportation infrastructure, and utilizing it for modern passenger rail is a logical and efficient use of an already-established right-of-way. In that context, the extension does not introduce a new disruption, but rather repurposes existing infrastructure to serve the public more broadly.

As a frequent Metro rider and someone who relies on the regional transit network, I strongly believe projects like this strengthen the system as a whole. Even riders who may not live directly along the extension benefit from improved connectivity, better reliability, and a more complete rail network across Los Angeles County.

I appreciate Metro's continued investment in transit expansion and urge the Board to move forward confidently with the C Line Extension using the Hybrid LPA. Thank you for your time, leadership, and commitment to building a more connected and sustainable region.

Kinds regards,

Meher Baghoomian

To Whom it May Concern,

I am a lifelong and current Redondo Beach resident, and live in close proximity (<1mi) to the LPA right of way for the C/K line extension.

I am strongly in favor of the LPA. I work as an airline captain out of LAX and will use this line to get to work. I want the line closer to residents' houses who will use it, I don't want to spend an additional $700+ million dollars to move the line farther from where I live, cause years of construction delays, and make Hawthorne Blvd more or less unusable for the next decade.

Thank you for your consideration and for helping make the South Bay more accessible to transit riders.

Sincerely,

--

My name is Christian Llamas and I am submitting a comment for the meeting that will occur on Thursday at 10 AM in the Metro boardroom. I am in strong support of the hybrid alignment for the South Bay extension. I grew up in the area and this would be a key extension for allowing movement in the South Bay and to the airport.

The ACT-LA coalition strongly supports the Metro Board to approve the C Line Extension to Torrance. This project is much needed to connect the South Bay with Metro's existing rail system, and the rest of LA County.

This project has been in the works for years now, with two approvals from voters. We ask the board to move forward this project and begin development of the C Line Extension.

Dear LA Metro Board,

I am a lifelong resident of Gardena and a weekly LA Metro rider writing **in support of the hybrid LPA for the C/K Line extension to Torrance**. I currently use the C and K Lines specifically to go between the LAX airport and Gardena to catch flights for work or personal travel. Currently, getting between LAX and the South Bay takes over an hour via public transportation or requires a fairly expensive Uber ride. Extending the C/K Line to Torrance would make the trip back home from LAX faster, easier, and cheaper for me and many other South Bay residents. The hybrid LPA is the best and fastest option to connect the South Bay to the greater LA County via rail.

I will also note that, as a registered voter in Supervisor Holly Mitchell's district, I am disappointed that Supervisor Mitchell has submitted a motion to change the extension alignment to the Hawthorne Boulevard Option. The Hawthorne Option is hundreds of millions of dollars more expensive and will delay the project even further for several years. Instead, I hope Supervisor Mitchell and the rest of the board vote in favor of the hybrid LPA so Metro can provide more public transit options to my fellow South Bay residents as soon as possible.

Thank you for your consideration,
Stephen

Hello,
My name is Victoria Dye, I am a resident of north Redondo Beach and have lived here for 4 years. I am writing to express my strong support for the selected Locally Preferred Alternative for the Metro extension to Torrance. I already very much appreciate the accessibility provided by the K Line's Redondo Beach station to the rest of the Los Angeles area, and have personally had good experiences as a rider and look forward to improved access to areas to the south as well. Additionally, as someone that frequently takes walks for both recreation and reaching businesses in the area of the extension, I am excited to see the dedicated pedestrian path and its connection to existing paths as part of the proposal.
I would also like to note that I strongly oppose, and am frankly disappointed to see, the relentless efforts by residents and elected officials of my town to delay and obstruct this project, most recently by pushing aggressively for the much more expensive, disruptive, time-consuming, and risky Hawthorne Blvd route. I hope that the Metro board rejects reintroduction of this this already-discarded proposal in favor of the selected hybrid ROW that results in lower costs, construction time, noise, and logistical challenges (CalTrans coordination, removal of existing businesses on Hawthorne Blvd) as well as introducing new amenities for the South Bay community & beyond.
Thank you for your consideration and I look forward to the approval of the project,
Victoria Dye

to the board clerk et al:
We are Phil & Sandy Ives and we live immediately adjacent to the ROW in Redondo beach as we have for decades. We beg you to oppose building the C-Line extension down the ROW and disrupting our home life for the rest of our lives. Please carefully consider the lives of truly local citizens over that of the professional transportation advocates who don't have to live through the pain of greatly increased noise, 5-10 years of construction (and problems therewith), a vibrating house every 5 minutes, and all the other unavoidable problems that come with this project. Building the extension down Hawthorne Blvd would relieve most of these problems for local residents, but of course not building the extension would save billions of taxpayer dollars and eliminate all the problems.
Thank you in advance for considering the locals,
Phil & Sandy Ives

Dear Board Clerk,

Please accept and count my written comment in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.
My name is Craig St John , President of Westwood Building Materials a ROW stakeholder at 15708 Inglewood Ave in Lawndale.

Our business is on the corner of Inglewood Ave, and Manhattan Beach Blvd. While I appreciate Metro's willingness to minimize the impact of our business from the C-Line extension, I have serious concerns about using the ROW option.

The ROW Hybrid option would cause drastic disruption to not only our business but to ALL commuters coming and going from the beach cities during construction. Inglewood Ave is a major artery and having it torn up and lanes blocked will send ripples all throughout the entire So Bay for the entire construction period.

I also have major concerns with the numerous fuel lines that run at the back of our property along the ROW. Some of these lines deliver fuel directly to the LAX airport. What is going to be the impact to traveling out of LAX when you have disruptions to fuel delivery from years of construction?

Metro claims that they will move these fuel line seems like disaster in waiting. Many of these lines have been underground for over forty years and it will not take much for one to break and cause a huge environmental disaster.

I'm in support for the Hawthorne Blvd route. I feel with the numerous amounts of new housing complexes that are planned along Hawthorne Blvd the residence of these proposed new projects would be better served by stations along Hawthorne. This would also help revive the business climate along

Hawthorne by bringing in some new business. I can see more ridership if there were a stops for Del Amo Mall, Old Town Center and the So Bay Galleria.

Thank you for your attention to this matter.

Hello,

My name is Julia Fallon, and I wanted to send a message related to the forthcoming conversations about the C-line extension.

I commuted to work via Metro trains for 3.5 years (before the pandemic) and still regularly ride public transportation.

I live 100 feet from Hawthorne Boulevard and frequently drive on this rode and shop at businesses along the route the C-line would run. I also ride the 40 bus at times and have ridden it from downtown to the Southbay.

I strongly support the Hawthorne Boulevard alignment for this extension project. Since seeing the diagrams for this alignment at a community information meeting at Lawndale High School, this alignment has stood out as making the most sense for riders, local schools, and businesses.

If this alignment is selected, I would be one of many community members and Metro riders who would advocate for support of this project in others arenas. I would also continue to support businesses on Hawthorne Boulevard during the construction process.

I am opposed to the ROW alignment for many reasons. I do not personally live adjacent to the ROW but feel extremely concerned about the environmental and safety hazards that would be created by construction and additional trains in this corridor.

I appreciate the diligence and effort your team(s) have put into evaluating this project and for taking community feedback into account during the planning process.

Thank you again for your dedication and service.

Best regards,

Julia Fallon

1/18/2026
Metro Board of Directors

Colleen Villegas, Right-Of-Way stakeholder.Thank you for adding motion 11.1 supporting the Hawthorne Blvd. alignment.. After reviewing the hybrid ROW proposal, it's clear that it brings far too many serious safety, environmental, and community impacts to justify moving forward.

Some of these include:

- Running two light rail trains directly next to a freight line carrying liquid petroleum, dangerously close to homes.

- The loss of one of the areas only remaining green spaces.
- The significant number of property acquisitions and displacements, which have been consistently downplayed but would have major consequences for families and homeowners along the corridor.

These are only a few of the risks associated with the ROW. When you compare them to the Hawthorne Boulevard alignment — which avoids these hazards entirely — the better choice for the South Bay becomes clear.

Thank you for your support of the Hawthorne Blvd. alignment.

Colleen Villegas

Dear Ms. Sheridan,

Attached you will find the City of Torrance's latest letter in response to Item # 11 on the agenda for the board meeting scheduled for January 22, 2026.

The City of Torrance expresses our strong support for Item 11, Metro staff's recommended Locally Preferred Alternative (LPA) also known as the Right-of-Way (ROW) Hybrid Option for the C/K Line Extension to Torrance, and we strongly oppose Item 11.1, the counter-motion introduced by Directors Mitchell, Sandoval, and Dupont-Walker that would select the Hawthorne Boulevard Alternative.

Thank you.

Hello,

The City of Torrance expresses our strong support for Item 11 and the Metro staff's recommended Locally Preferred Alternative (LPA) also known as the Right-of-Way (ROW) Hybrid Option for the C/K Line Extension to Torrance. The City also vehemently opposes Board Motion 11.1 utilizing the Hawthorne Alternative.

Attached you will find all of the City's previous letters demonstrating our continued support for the Metro C-Line Project and for the light rail to come down using the Right-of-Way. The attachments also include support signatures from our residents and businesses to ensure that the project comes to Torrance using the Metro-owned Right-of-Way.

Thank you.

Hi, this is Manar Totonji, an LA resident.

I am commenting in support of the FEIR Certification and the Hybrid LPA. This plan displaces no residents and would be built on an existing fright line. It is beyond obvious that South Bay needs metro rail connect and this is the time to approve it.

Thank you so much!

Board Members,

Please follow the staff recommendation for Item 11, the Hybrid LPA and against. 11.1 the Hawthorne Alternative, giving us the best route into the South Bay for attendance as well as cost savings.

Torrance to LAX in 19 minutes by light rail, saving 13.7 vehicle miles in transit, with safer crossing and walking and biking paths is worth it.

Thank you.

Hello Metro Board Clerk,

I am writing to you in regards to the proposed C Line Extension to Torrance.

I am a resident of Gardena and work as an electrical engineer in Redondo Beach. When I was in graduate school I used the Metro almost every day, but currently my commute is by car and crosses the Harbor Subdivision at Manhattan Beach Blvd.

I am in full support of the LPA Hybrid ROW alignment as described in the Final EIR. It should be built.

In addition to making public transit more accessible to the south bay, it would directly make my commute safer by improving the freight grade crossings. One morning, I saw a car in front of me almost get hit by a train because it was confused and stopped on the wrong side of the guardrail. The train missed hitting the vehicle by inches. Metro, and particularly the Cities of Lawndale and Redondo Beach, have an opportunity to increase street safety by approving the ROW alignment.

Furthermore, studies continue to show that green space like parks and walking trails improve both health and happiness, and can be clearly shown here in the south bay by contrasting the wealthier beach cities with their neighbors further inland. Metro, and particularly the Cities of Lawndale and Redondo Beach, have an opportunity with the Hybrid ROW alignment to grow its green spaces with the Multi-Use Paths.

The South Bay needs to start becoming less reliant on cars. Our population is getting older, and with that, there are natural challenges to driving a vehicle. Similarly, fewer young people are getting their driver's license (In 1983, 80% of 18-year old Americans had a license while in 2021, only 60% did so). If the South Bay wants to continue being accessible to all its residents, as well as continue to attract sharp young talent to fuel its industries, it must smartly invest in its public transit. I am specifically using the phrase "smartly invest". The Hybrid ROW alignment smartly connects regional transit hubs directly to the wider Metro rail network and acts as a central backbone from which local bus transit can fan out into the rest of the city. Intuitively, it may make sense to try to route the line along Hawthorne and add an additional stop, however that would slow the line down while gaining few additional riders, in fact it could even be a net negative all while costing significantly more. With the hybrid ROW alignment and a good BRT (or even the existing GTrans line) down Redondo Beach Blvd, I could get rid of my car and still get to work in a reasonable time.

Finally, I want to speak to some of the critics of the LPA Hybrid ROW. Construction is often quoted as a concern, and yes I do anticipate me and my little commute to be affected. That said, construction is temporary, and investment in one's community requires a little sacrifice now for great benefits later. I am unafraid of adjusting my commute accordingly. Similarly, there is a concern about trains running near homes as a source of noise. My own home is near an at-grade train line on Vermont Ave, and when I bought it it was very clearly disclosed several times across lots of documents provided to us by pretty much everyone involved. It's actually not that bad, but I would love to have a plan in place to have quiet-zone ready grade crossings and noise retaining walls installed in my own neighborhood, as described in the Final EIR for the Harbor Subdivision. Some people are proposing the line be moved off the ROW to run down Hawthorne, but that has already been shown to be more expensive (I don't know where these people think they can just acquire an additional billion dollars). I really like how the Hybrid ROW alignment leverages existing rail infrastructure to save tax dollars. It's a neat idea and I wish it would spread as an example to cost-effectively expand transit across the country.

Thank you for considering my comments. There appears to be a very loud minority of residents fighting to kill this project outright, to the detriment of all of us here in the South Bay. I would love to attend the Metro Board Meeting on Jan 22, but it is in the middle of the work week and I have to work.

Hello Metro Board,

As a Redondo Beach resident, I'd like to voice my support for the EIR certification and the Hybrid LPA. It makes sense to use the Metro ROW to save on costs while also connecting through the existing Redondo Beach Transit Center. I am excited by the prospect of having a nearby option to connect to the greater Metro system so that I can have options other than driving and an easy way to also take advantage of the upcoming people mover/Metro options to get to LAX. This would be a momentous step for all of the South Bay, so please certify the project.

Thank you,
George

Dear Board,

I am submitting a comment for the Board of Directors - Regular Board Meeting taking place on Thursday, January 22, 2026, in regards of item 11A.

I have lived in the Torrance area for most of my life, and have worked in Torrance for my entire adult life. I commute to work daily currently and have done so for many years.

I know first hand how needed increased and more frequent public transportation are for this area. Buses come once an hour but many times a bus driver will pass by you or the scheduled bus never arrives, so you need to wait yet another hour for the next bus on the schedule to arrive.

I once had a commute of 2-2.5 hours by bus one way for what is a 25 minute drive, for a round trip of 4-5 hours every day all within the South Bay.

I was also fortunate enough be able to drive a car for a couple of years and know how congested traffic is, both North-South and West-East. It makes a drive over a short distance that makes people late for work, doctor's appointments, and miss bus connections when driving to a park and ride.

With the K Line North Extension, as a former Bruin, I lite with enjoyment and enjoy for the future students who could the train to UCLA without having to go east to downtown and then west.

I support the LPA. Although Hawthorne option would be might be more utilized, looking at the current political situation, we have learned that we cannot depend on federal funding to close any funding gaps. The Hawthorne option would also be subject to CalTrans approval. These two factors alone make it very likely this whole extension does not go through at all, which would be devastating.

Please approve the LPA so the South Bay and thousands of working people and students get the public transportation they deserve.

Thank you,
Marisa Kimura

To the Metro Board

The following comments were sent to the Board on May 22, 2024:

I am a retired Architect with diverse exposure to many things METRO. I worked in Korea Town and in Culver City, adjacent to the Red and Expo Lines while under construction and for a time after completion; I commuted for 3 years on the Red Line; I participated in or was privy to the design of 3 METRO stations; and I currently live in Lawndale between Hawthorne Blvd and the R.O.W.

Mass transit in Southern California has been built / abandoned over and over, while special interests have made the automobile the de facto means of transport. Only if we change our attitudes on personal freedoms vs the common good, blanket Southern California with trains, and rewrite zoning codes for hundreds of communities, will your ultimate goal be attainable. We have many beautiful stations serving too few people and too few destinations.

Public comments gathered by METRO, though heartfelt, have been predictable and often irrational, but mostly trivial or self-serving. Straw polls would have been more productive. With only the public's lay understanding of priorities as a limitation, METRO is placating us with a walking path here (next to a train at speed every few minutes), a tree there (replacing several mature trees), and a quiet zone (still noisy, just less so), while proceeding unabated towards the cheapest solution.

Designs have come more from entrenched systems solutions and less from regarding local conditions and opportunities. "Last mile" designs meant to link stations to local amenities and transport have been narrow in scope because the only contributor is METRO. Seemingly, there has not been sufficient engagement with knowledgeable professionals or organizations or institutions or municipalities to resolve the larger issues we face. When will the welfare of the

people and the quality of our environment take first priority? THE HYBRID ALTERNATIVE MUST BE RECONSIDERED.

THE HAWTHORNE BLVD ALTERNATIVE IS ALSO A BAD IDEA:

- Major disruptions of traffic flow for years
- Ugly flying masses of concrete looming overhead for miles
- Loss of all the trees and much of the median parking
- No benefits whatsoever to the small businesses lining Hawthorne Blvd
- Ineffective access to a diffused shopping complex
- Preferential access to a possible future housing development
- Difficult crossing to the Redondo Beach Transit Center

The Hybrid and Hawthorne Blvd Alternatives each have problems. If we still wish to build, the least harmful, most effective solution is to LOCATE THE K LINE UNDERGROUND ALONG THE R.O.W.:

- Travelling southwest from Redondo Beach (Marine) Station, go underground west of Inglewood Ave, daylight south of Grant Ave for a grade level Station at the Redondo Beach Transit Center, go underground north of 182ND ST and daylight south of 190TH ST.
- While digging / tunnelling, add underground piping to carry the petroleum products currently hauled by tanker cars, or just reroute the 2 trains per day. Remove the tracks from west of Inglewood Ave to south of 190TH ST. as well as the bridge over 190TH ST and Hawthorne Blvd.
- Transform the R.O.W. into a linear park, accessible at cross streets and cul-de-sacs (not backyards), with basketball / handball courts, skateboard / dog parks, and protected areas for young kids to play. The park should be continuous for biking, running and walking from Manhattan Beach Blvd, passing over refurbished bridges at Artesia Blvd and Grant Ave, encountering vehicular cross-traffic only at 162ND ST and 170TH ST (stop signs), and accessing the Redondo Beach Transit Center and El Nido Park (remove the huge berm), to Hawthorne Blvd, with a short walk to Columbia Park.

All noise, safety and visual concerns would be eliminated. All freight crossings would be eliminated. Existing roadways would be unaffected. We would have access to regional mass transit. Property values for nearby residents would increase, not decrease. Existing vegetation would be preserved and enhanced. We would have a very popular 2-mile-long public amenity within walking distance of thousands of residents, serving as open space for physical activities as well as an alternative travel corridor.

Costs and responsibilities must be commensurate with mandates and benefits, shared by

METRO, the freight railway, all affected municipalities, and the South Bay Galleria and Marketplace. Planning and design may be managed by METRO, but should be executed by a neutral planning and design firm with a proven track record. Multi-agency / Stakeholder teamwork is essential when undertaking a large development project. Without opportunities being identified, appropriate resources being harnessed, and the common good being paramount, we are just wasting money and time.

Good afternoon,
I have been to just about every public Metro meeting taking place for the C Line extension in Lawndale, Torrance, Redondo Beach, and downtown.

The option chosen should be the "No Project Alternative". If Metro feels they must spend money to do something, they should choose the "High Frequency Busing Alternative".

I have spoken at many meetings, and neither of these alternatives were spoken about until I read right out of the Draft EIR that the "No Project Alternative" was the best environmental option.

Respectfully,
Ted Hofmann

Hello,
I am commenting in strong support of the Hybrid LPA alignment for the C (now K) Line Extension to Torrance, and in opposition to any attempt to switch to the Hawthorne alignment.

As Metro staff clearly indicate, adding $730 million to the cost for Hawthorne, 2-4 years for a NEPA review, and possibly even *more* time to find new financing sources, during which time the cost will inevitably rise, requiring *more* financing, is utterly nonsensical, and is emblematic of the problems of this agency and its governance shooting itself in the foot.

All this would be done to appease a handful of homeowners along the *Metro-owned* ROW, one that will be getting significant safety upgrades with the Hybrid alignment, and which is the reason for this whole project's existence in the first place. Meanwhile, transit riders are remarkably unified in pushing for the ROW option, which connects directly to a bus transit center instead of a dying mall, and which can be built far more quickly due to the relative ease of its financing.

Metro Board members have a disturbing trend of elevating the complaints of those who consider our transportation network to be a nuisance over those of the actual *riders* of the transportation network that these Board members are meant to be serving... largely because the Metro Board members fall into the former category themselves, taking virtually no steps to truly understand the experience or needs of riders, or become users of the system themselves. The riders are taken for granted, their demands waved away, their needs falling on deaf ears.

If the Metro Board is so eager to abandon its riders, we have absolutely no choice than to unify under a major push for governance reform that changes who make up the Metro Board. Riders have been left in the dust one too many times, and a vote for Hawthorne - for completely unnecessary delay, and for the burning of $730 million extra dollars that will deprive other necessary projects of funds, all for NIMBY appeasement - would be the last straw.

Board members have a choice before them to side with their riders and choose the Hybrid LPA, or to abandon them for Hawthorne. It must be the Hybrid LPA.

Dear Metro Board of Supervisors,

Breakwater Village is a Senior condominium community with over 300 resident's . Here are our concerns to the Metro proposal operating along the (ROW) including all Neighboring properties located in Redondo Beach, Lawndale and Hawthorne to Torrance. Objections to the ROW:

1. Loss of Quiet Enjoyment of our Property per California Real Estate Law, Civil Code 1927 The "Convenient of Quiet Enjoyment", but not limited to: Excessive Sound Noise Nuisance, Vibrations, Air Pollution, Diesel fuel Fumes from construction, trash, Transients, possible Homeless encampments, Graffiti and bright Lighting and electrical EMF.
2) Ignoring City Of Redondo Beach Noise Laws, Title 4, Public Welfare Chapter 24 Noise regulations: prohibit noise or and Nuisance noise prior to 7:00Am and after 10:00 Pmsubject to all other sound previsions per the Regulations Law.
3. Presents a clear Determent to the Health, Mental Health, Welfare and Safety of all Residents including Children around surrounding schools and their Quality of Life should all be considered.
4. Loss of Property Values and Loss of Use.
5. Danger of Damage to Building Foundation and other structures due to increased weight and ground pressure located in close proximity of Residential Property.
6. Inadequate surrounding infrastructures of surface roads hindering Emergency vehicle response times.

Our Senior community is very concerned that the Metro proposed location along the (ROW) will be detrimental to our health and quality of life. The proposed shocking length of Construction, Traffic jams, and the scheduled frequency of electric Train traffic at 0400am to 0:100 hours of operation approximately every 15 minutes unacceptable.

Please Reject the FEIR and carefully consider the warnings of the refineries petroleum gas and jet fuel lines beneath the ground surface along the ROW and running parallel to our property that should Not be disturbed.

Suffice to say, our tax dollars will be best spent by reason of forethought in design and highest and best use by voting on the Hawthorne alternative. This location will benefit the Retail and Commercial districts for ease of access, safety, thriving commerce and to the betterment of all future development. Hawthorne boulevard will best provide transportation to and from residential, businesses and shopping. Thank you.

Respectfully,

David Zappacosta- HOA President and Resident owner at [redacted]
Breakwater Village Senior Community.

Hello,

this weekend (1/17 and 1/18) I walked to all the retail and restaurant businesses (that I could) within walking distance of the planned stop at the intersection of Hawthorne and Artesia. I went into the businesses to :

- find out if the management and employees at the stores and restaurants were aware that a light rail passenger train was planned to connect the Torrance Metro station to LAX (K line)
- to find out if they would prefer having a station at Hawthorne and Artesia (Hawthorne option) or if they would prefer having a station next to the Metro bus station behind Target (ROW).

My findings were that none of the management or staff were aware that Metro had a station planned so close to their stores. I was the first person in every case (location) to bring them the news that there could be a train station so close within close walking distance of their respective businesses and all were excited of this possibility. They were glad to be aware that a vote to decide which location would get the train station has not yet taken place and that they still have the opportunity to voice their support of the Hawthorne option either onsite at Metro Headquarters or by phone on Thursday 1/22.

I wanted the Metro Board of Directors to be aware that there are many businesses close near Hawthorne and Artesia and they ALL support having a train station at the Hawthorne and Artesia intersection. They support the Hawthorne Option for the added foot traffic that their businesses could have and many had employees who would welcome having the option of taking the train to their jobs.

These businesses that support the Hawthorne option include:

- Sizzlers
- Big 5
- DSW
- Autozone
- Harbor Freight
- Daves Hot Chicken
- Turners Sporting Goods
- Round Table Pizza
- PetSmart
- Collector Legion
- Hawaiian BBQ
- Wonder of Dinosaurs
- and the many boutique shops in between the larger businesses

Dear Members of the Metro Board,
Please certify the FEIR and approve the Hybrid Locally Preferred Alternative (LPA) for the Crenshaw Line South Bay Extension. The Hybrid LPA is the option that delivers transit now, uses public assets responsibly, and serves the region as a whole.

I am a transit rider. For four years I lived in LA County without a car and relied on Metro for work, healthcare, and daily life. **I cannot attend today's meeting because I'm working all day in a warehouse, alongside others who depend on transit and lack the flexibility to testify.** Our absence reflects the reality of who needs this project most.

The Hybrid LPA makes smart use of an existing asset. Metro already owns the freight corridor, and that investment was made to preserve and *use* flexibility for transit. **The Hybrid option exercises that flexibility to deliver safe, grade-separated service now.** Public agencies exist to provide mobility, not to hold corridors in reserve while riders wait.

The Hybrid LPA is also the fiscally responsible choice. It delivers meaningful regional benefits at a significantly lower cost—approximately $730 million less than other alternatives. With federal transit funding constrained, choosing the Hybrid LPA protects Metro's ability to expand service and improve reliability across the system.

Just as importantly, the Hybrid LPA aligns with adopted plans, completed environmental review, and staff recommendations. That alignment minimizes legal risk, avoids delay, and respects the integrity of Metro's planning process. **After years of study and community engagement, the Hybrid LPA is ready to move forward.**

Transit expansion is economic and racial justice. Physical mobility creates access to jobs, education, and opportunity. The Metro Board represents the entire region, and the **Hybrid LPA best serves our regional interest.**

Certify the FEIR. Approve the Hybrid LPA. Move forward now and deliver transit that works.

Padric Gleason

Hello Metro Board,

I cannot attend the meeting on 1/22 so I am writing in support of the Hybrid LPA for the South Bay Extension of the K Line to Torrance.

Please do not delay this project further by switching to the Hawthorne alignment at the last moment. The work on the EIR has already been complete, having to redo the EIR for the Hawthorne alignment will cause this project to be delayed which is unacceptable.

This project does not currently cover the city of Long Beach, but as a resident of Long Beach I hope that extending the k line closer to our city will improve our access to the south bay and LAX, eventually making an extension to our city.

Thank you,
John Jacobsen

Hello Metro Board,

As a resident of Long Beach who uses cycling and public transportation as my primary mode of transportation, I support the Hybrid Alternative LPA to bring the C Line to Torrance. This project would be greatly beneficial for access to the South Bay and approving this now will help make this connection a reality sooner.

Please prevent further delays and mounting costs.

Honorable Chair Dutra and Directors of the LA Metro Board,

I am writing in support of the C/K Line Extension to Torrance and would like you to finalize with the Hybrid LPA position. This rail will be beneficial for many residents and workers like me who live in the city of Torrance without viable alternatives to sitting in 405 congestion to work at LAX. In my opinion, this project needs to move forward as soon as possible to the benefit of our communities.

Sincerely,

Alan A. Carlos

LA Metro Board Clerk,

I am a resident of LA County. I ride public transit, I use my bike to get around, AND I do not own a car. I am writing to urge you to certify the Final EIR for the C/K Line Extension to Torrance and to move forward with the staff recommendation for the Hybrid LPA.

Rail in the South Bay is essential for real connectivity. For people like me who depend on transit and biking this project is about basic access to jobs, school, healthcare (and most importantly for me being able to visit my partner without worrying about being stranded due to unreliable and disconnected transit service). The Hybrid LPA uses a corridor Metro already owns and improves safety + reduces noise

The Hybrid LPA will serve riders better with stations located in neighborhoods instead of along an eight-lane highway and it can be delivered years sooner. It already has more than half of its funding secured and can move forward now. The Hawthorne option is the wrong choice. It would delay the project and complicate funding and hurt service delivery for the communities that need this connection most. (Not to mention the opposition group is co-opting environmental justice language in bad faith and using AI generated responses and content to mislead the conversation around real progress for mobility justice)

Please certify the Final EIR and advance the Hybrid LPA!

Briana Villaverde

AGAINST / ITEM NEEDS MORE CONSIDERATION

Dear Members of the Metro Board,

I am writing to request that you reconsider the proposed C Line extension to Torrance as an end-of-line station.

While I support an extension through Torrance, I am concerned about the current proposal where the line concludes in our city. At this time, the City of Torrance does not have the necessary infrastructure to handle the challenges associated with an end-of-line station, specifically regarding the impact of the homeless population. I would, however, support an extension through Torrance if the line continued further and did not terminate here.

Thank you for your time and for considering my feedback on this project.

Best regards,

Edward Apodaca

Hello Metro Board,

I urge you to vote in favor of the Sepulveda Modified Alt 5 and Torrance Hybrid ROW options as the LPA for either project. I have friends in the Valley and the Sepulveda line would be transformative in being able to connect two previously hard-to-reach areas (without a car). I also hope that the current hybrid alignment for the K Line to Torrance will be approved. Having the South Bay connected to the rest of LA's rail network (AS SOON AS POSSIBLE) would be such a no-brainer economic boon and allow people more options on where to work and live. Accepting the plan along Hawthorne would be much more expensive for little benefit, and is something I would not want to see my tax dollars spent towards (for more studies, EQAs, and loads of mitigations). Unlike other projects, there is funding and a concrete plan for the Hybrid ROW to Torrance, and I urge the Metro Board to capitalize on this.

Lastly, I hope you reconsider the measure to oppose SB 79. There is already an acute housing shortage in LA and any attempt to water down housing density provisions would only exacerbate this issue. I grew up in LA and love this city, and I want to keep living in this city, but the cost of housing and living make it difficult to be able to stay; I know I am not alone in this sentiment. With local governments historically doing little in the way of building enough housing units, let alone affordable ones, I think reverting back from state to local control over zoning is a massive mistake that would only serve to hinder your objectives of expanding your ridership base and providing high quality transit services for everyone in the Greater LA area by driving people away from your service area.

In conclusion, I want to remind the Metro Board of who you serve. Los Angeles is the second largest city in the US, not some quaint suburb that some people try to vocally say otherwise. In terms of public transit infrastructure and ridership, LA embarrassingly falls behind other "global" American cities, such as New York, Chicago, San Francisco, and D.C.. Building as much transit infrastructure as possible, and getting people to use that infrastructure, should be your main goals if you are to provide world class transit. Therefore, by advancing the current plans for our rail expansions and retaining the commitment to upzoning transit corridors is of utmost priority in my opinion to be able to achieve those goals.

Thanks,
Aaron

Dear LA Metro Board,

I work in Los Angeles County and take LA Metro buses and rail multiple times a week. I urge you to support items 10 and 11 on the agenda, and to withhold support from agenda item 11.1.

I Support Agenda item 10 - Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor
The Metro staff-recommended Locally Preferred Alternative (Modified Alt 5) is preferable for its:
- fastest end-to-end time
- largest reduction in vehicle miles traveled (VMT) and therefore air pollution from cars
- cheaper than the original Alternative 5
- UCLA on-campus dedicated stop

I Support Agenda item 11 - Approve the Locally Preferred Alternative for the extension of the C Line to Torrance and certify and approve the Final EIR.
This hybrid LPA would create thousands of jobs and attract 1.5 million new riders, on right-of-way (ROW) owned by LA Metro. The Hybrid LPA has already gone through the EIR process, and it is the best use of my taxpayer dollars.

I am AGAINST Agenda Item 11.1.
Agenda Item 11.1 would require re-doing a Final EIR for the Hawthorne alignment, leading to a 2-4 year delay, which will inevitably lead to rising costs. I do not support my taxpayer money funding a higher-cost, longer-term project.

Thank you for advancing high-quality transit in the region.

Sincerely,
Christopher Yeh

Dear Metro Planning and Programming Committee,

I ask that you support the following recommendations before you, **with some modifications:**

- Agenda item 10 - while this heavy rail option with a dedicated UCLA stop is an undeniable upgrade for the entire county, I strongly recommend looking into having a connection at **Expo/Bundy rather than Expo/Sepulveda.** The 405 is a significant barrier that severely impacts access to and from the project, while a Bundy alignment would help connect the project to hubs such as Santa Monica College, the future of the Santa Monica Airport, the Santa Monica business park that is about to go through a major redevelopment,…
A second phase along Bundy would also allow a connection to LAX that goes through more hubs such as Venice High, Mar Vista, LMU,…

If we truly care to have a positive impact on the region's various communities, to lower VMTs, to create safe and efficient first and last mile options,… a connection at Bundy seems like a no brainer.

- Agenda item 11 - Approve the Locally Preferred Alternative for the extension of the C Line to Torrance and certify and approve the Final EIR!

Thank you for advancing high-quality transit in the region.

Dear Metro Planning and Programming Committee,

I ask that you support the following recommendations before you:

- Agenda item 10 - Approve the Locally Preferred Alternative (Modified Alt 5) for the Sepulveda Transit Corridor - this heavy rail option with a dedicated UCLA stop is exactly what the Sepulveda corridor needs!

- Agenda item 11 - Approve the Locally Preferred Alternative for the extension of the C Line to Torrance and certify and approve the Final EIR!

Thank you for advancing high-quality transit in the region.

Correction: It's now the **Metro K Line Southern Extension** to both the Redondo Beach/Galleria Transit Center and the Mary K. Giordano Transit Center in the city of Torrance hopefully when it's completely on or after Early 2034. By the way, for the proposed and upcoming **Metro C Line Eastern Extension**, will there be 3 brand-new stop locations at: Imperial/Pioneer, the Norwalk Civic Center Station, and the Norwalk/Santa Fe Springs Metrolink Station in which they will open after the year 2034? Please let me know, and I thank you all so very much for your cooperation and for your generosity.

Yours Sincerely,

To Whom It May Concern,

As a homeowner in El Segundo, I'm reaching out to share my strong support for the Locally Preferred Alternatives (LPA) for the C Line Extension to Torrance and the Sepulveda Transit Corridor Project. I strongly request that the Metro Board approves the LPA alternative for these two projects and certifies the Final Environmental Impact Report for the C Line Extension to Torrance.

The LPA for the C Line Extension to Torrance is a common sense route that utilizes existing Metro-owned right of way (ROW) to connect multiple transit centers in a cost effective way. There are major issues with the Hawthorne Alternative that is now being proposed. The Hawthorne option is $730 million higher which greatly jeopardizes the project. The Hawthorne alignment also requires a lot of collaboration with multiple different agencies including Caltrans and Southern California Edison, who would need to relocate major utilities such as high-voltage overhead wires. Also, a major storm drain underneath Hawthorne Blvd will need to be excavated and moved, land acquisitions will be needed, and an additional NEPA review will need to be conducted, which will add 2-4 years and additional costs to the project. These issues add up, and jeopardize the project being completed at all.

This was originally designed to make use of the Metro-owned ROW, a unique opportunity for rail expansion where major costs of land acquisitions are not necessary. Choosing any other option except the LPA was would be a waste of a key opportunity to expand the rail into the South Bay.

Please certify the FEIR and approve of the LPA for C Line Extension to Torrance.

What's more, the Sepulveda Transit Corridor is one of the most important projects in the region, providing a critical North-South rail line to connect several different transit lines. The LPA of the Modified Alternative 5 is the preferred route that provides significant ridership with a travel time that will revolutionize public transit in Los Angeles. Please approve the LPA for the Sepulveda Transit Corridor Project.

Lastly, I ask that you do NOT oppose the SB 677 (Wiener) Housing development: transit-oriented development bill. As a homeowner, I recognize that the Los Angeles region is in a critical housing shortage and really needs to increase the quantity of housing to make housing affordable. Building housing around transit stations is an easy decision that will increase ridership (and Metro revenue) significantly and ensure density can be built by relying less on the need for cars.

In summary:

- C Line Extension to Torrance: Approve the FEIR and approve the staff recommended LPA, do NOT approve the Hawthorne option.

- Sepulveda Transit Corridor: Approve the staff recommended LPA, Modified Alternative 5.
- SB 677 (Wiener) Housing development: transit-oriented development bill: Support the bill and do NOT oppose it.

Thank you,
Lauren Weil

Subject: Item 11.1
Support for Hawthorne Blvd
For C/K Line Ext. to Torrance

Dear members of the Los Angeles Metro director board,

My name is Izhaac Kim. I am a 9 year old living with my family along the ROW, in Lawndale. I am writing this letter on behalf of my brother, my sister and myself. As children, I feel like we don't have much say in the adult decision making, but I want you to hear our voice.
A little background about myself. Like I mentioned, I am 9 and in 5th grade. I excel in mathematics and also enjoy reading a lot. My siblings and I are able to perform really well at school because of our parents loving support and our quiet environment.

If Metro were to build trains behind our beautiful house, it will have a very Big Negative impact on our lives and on our health, physically and emotionally. I heard that ~~contru~~ constructions will take 8 years! And it will create a lot of noises and dust!
Then, when completed, there will be more than 200 trains a day, traveling only 5 feet from

my home! This will be a NIGHTMARE! How are we, as kids, supposed to live a normal life? Our academic performances will suffer for sure. We want to live in our home in peace and safely.

On the other hand, we believe that Hawthorne Blvd would be perfect! Every year, we travel to Europe and we love riding the metro, trams and even the high speed train. There, I noticed that trains are placed near restaurants, bakeries, grocery stores and offices... Sometimes when riding the metro, it was so packed that we were squeezed like sardines. It would be great to have the same thing on Hawthorne Blvd.

So I know we are only kids, but I beg you to hear us! Our lives matter too! We want to be safe and live peacefully in our home like many kids in Lawndale! Please choose Hawthorne!

Thank you very much.

Izhaac Kim

RE: **Item 11.1: C Line Extension to Torrance Project Final EIR Certification**
Redondo Beach's Support for Director Mitchell, Sandoval and Dupont-Walker's motion selecting the Hawthorne Alignment

Dear Board Chair Dutra and Honorable Board Members:

On behalf of the City of Redondo Beach, please accept this letter as Mayor Light and the City Council's unanimous (4-0-1) support for the motion by Directors Mitchell, Sandoval and Dupont-Walker selecting the Hawthorne alignment. We write to express how we envision working with Metro, Caltrans and our neighbors to advance the Project on Hawthorne Blvd. and we request that the Board approve the motion.

As a preliminary matter, Redondo Beach has consistently supported the C-Line Extension on Hawthorne, as it achieves the Project objectives, including but not limited to improving mobility, providing alternative modes of transit, and providing more equitable access to regional destinations, displacing the greatest amount of VMT and resulting in the greatest number of annual project trips.

The Hawthorne alignment increases commercial visibility instead of impacting and dividing a residential neighborhood. Some of the significant issues associated with the LPA option would be resolved with the Board's selection of the Hawthorne alignment. The Hawthorne Alternative, studied in depth in the draft and final EIR, resolves potential issues associated with selection of the LPA. In particular, the Hawthorne Alternative avoids relocation of utilities and high-risk construction activities associated with the LPA option. For these reasons among others, the Hawthorne Alternative provides the greatest return on regional investment.

If and when the Board certifies the FEIR and approves the Hawthorne Alternative, Redondo Beach is ready to:

- Expedite any necessary local approvals and permits to enable timely Project construction and reduce the risk of schedule delays;
- Expediently work through the Caltrans relinquishment process for Hawthorne Blvd. (SR 107) to enable local control of permitting and approvals;
- Collaborate with neighboring jurisdictions to centralize permitting for the Hawthorne option;
- Further advocate for funding for this Project at the South Bay Cities COG, specifically during the Measure M Decennial Review process commencing this year;
- Support expansion of the Business Interruption Fund to cover businesses impacted by Project construction along Hawthorne Blvd. to ensure their continued success;
- Pursue funds for first/last mile improvements for the South Bay Galleria station, and plan for our 3% local match contribution to the Project;

The City is also uniquely positioned to ensure traffic in Redondo Beach along Hawthorne Blvd. is managed efficiently with minimal disruption during construction. In that regard, the City also appreciates the Board's stated commitment to helping small businesses remain viable during and after construction.

The Hawthorne Alternative is the only Project alternative that meets the Project objectives, fulfills the Board's CEQA requirements, and delivers high ridership. Redondo Beach looks forward to working in partnership with Metro, Caltrans, the South Bay Cities Council of Governments and our neighbors to deliver high quality transit to the region.

Thank you in advance for your consideration of our comments.

Sincerely,

Subject: Support Item 11 reaffirming Hybrid Local Alternative Route on Existing ROW; Oppose Item 11.1

Dear Chair Dutra and LA County Metro Board members,

On behalf of Abundant Housing LA, I write in strong support of the staff-recommended Hybrid LPA for the C/K Line Extension to Torrance. Our organization is deeply concerned about a last-minute push to reject the Locally Preferred Alternative that the Metro Board selected a year and a half ago, in favor of a much more expensive route.

If the Metro board were to adopt the new motion, Metro would reopen the environmental review process, setting the project back years, if not killing it altogether. Worse, the ballooning cost would come at the expense of other important projects across the region. The equity implications of this new motion are profound, as a change in direction at this juncture would sacrifice a billion dollars in investments badly needed elsewhere.

By contrast, the Hybrid LPA, selected by the Board in 2024 and refined in the FEIR, uses the existing rail corridor with grade separations and mitigations to make the corridor both safer and quieter. It connects to new bus centers, and improves green space with bike and pedestrian paths. It is a comprehensive option with strong community benefits and a clear path to construction. While Metro has expanded rail across the County, the Extension to Torrance, promised in Measure R and Measure M, is long overdue. The Hybrid LPA has support by the City of Torrance, and dozens of local community, business, and labor organizations, in addition to mobility and housing organizations, like Abundant Housing LA.

The Hybrid LPA will allow Los Angeles to move forward, and we respectfully urge your support of Item 11 and ask for your opposition to Item 11.1.

Sincerely,

RE: Metro C Line (Green Line)/ K Line Extension to Torrance Project
January 22, 2026 Metro Agenda

Item 11 #2025-0818 – OPPOSE (the Board selected Locally Preferred Alternative – LPA)

Item 11.1 #2026-0037 – SUPPORT (Approve the Hawthorne Option)

Dear Chair Dutra and Honorable Board of Directors:

I am writing to affirm my support for the **Hawthorne Boulevard Alignment route option**, which I believe represents a safer and more viable route for commuters to and from the South Bay region of Los Angeles County.

Metro's Locally Preferred Alternative would result in hundreds of trains operating daily, at grade, through narrow residential neighborhoods and in close proximity to homes and schools within Lawndale and Redondo Beach. This approach would produce increased noise, air pollution, and safety risks, while eliminating valued green space that residents rely upon and enjoy. In contrast, the Hawthorne Boulevard route better advances regional transportation objectives by providing alternative travel options, improving connectivity between local and regional transit systems, and supporting greenhouse gas emission reduction initiatives.

In addition, I respectfully request that Metro establish a Business Interruption Fund for the Project and expand construction mitigation programs to support and assist businesses located along Hawthorne Boulevard during and after construction. These measures will be essential in preserving economic vitality and reducing construction related impacts on locally owned businesses along the corridor.

I submit this letter as my official position and support for the Hawthorne Boulevard Alignment route option. I affirm my commitment to work collaboratively with my Council colleagues, city staff, Metro, and project partners to expedite approval processes, advocate for additional funding, and support the successful implementation of the Hawthorne Boulevard Alignment route option for the good of City residents and businesses.

Sincerely,

[redacted]

Dear Board Clerk,

Please accept and count my written comment in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.

My name is Margie Fay Alexander. I am a Redondo Beach ROW stakeholder and an owner of Unit 245 at Breakwater Village. My home is approximately 50 yards from the ROW, and that proximity to means that the ROW Hybrid option would pose a serious risk to me and to the lives of all of us senior citizens living at Breakwater Village.

The C/K-Line should stay elevated down Hawthorne Blvd, not consume green space in Lawndale and wreak havoc to hundreds of Redondo residents, including 300 seniors at Breakwater Village by being constructed on the Metro ROW, where seven fuel and gas pipelines exist many of which will have to be relocated. By their own admission, Metro staff describes moving these pipes as "high risk construction".

I support the Hawthorne route to improve and revitalize the business district. I support the elevated Hawthorne Blvd option that would place the rail line safely down the center of a wide commercial corridor, where the old Red Car streetcars once ran. The

Hawthorne Blvd option would protect green space and preserve the character of the neighborhood yet still deliver the transit connection Metro has promised us. Please protect our vulnerable senior citizens and all others living near the ROW and choose the common-sense solution that is already backed by the city councils of Lawndale, Redondo Beach, and Hawthorne. I urge you to choose the sensible solution, the safest route; in short, I urge you to choose the Hawthorne Blvd option.

Thank you for your attention to this matter.

Sincerely yours,

Margie Fay Alexander

From:	Jacklyn Ma
To:	Board Clerk
Subject:	(EXTERNAL) Writing to strongly oppose item 11.1, support item 11, support item 10, and very strongly oppose item 33
Date:	Tuesday, January 20, 2026 6:35:23 PM

CAUTION: This email originated from outside of the organization. Help Metro protect against cyber threats. Verify the sender's email address carefully. Dear Metro Board:

My name is Jacklyn Ma and I am a 15 year resident of LA, a physician, and I am very concerned about the health affects of climate change, traffic and unsafe streets in LA. So I am writing to enthusiastically support Item 11 and strongly oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system, less car dependency, and ultimately improved quality of life for everyone.

Thank you,
Jacklyn Ma

Dear Chair Dutra and LA County Metro Board members,

Please see the attached letter from Abundant Housing LA regarding our continued support for the Hybrid LPA for C/K Line extension to Torrance.

Specifically, at tomorrow's Metro Board meeting, we urge you to approve the staff recommendation for Item 11 and reject item 11.1. We are deeply troubled by the last-minute effort to change the route of this light rail extension. A change of this magnitude and at this juncture would significantly delay the extension, add millions of dollars in delay and threatens to derail the entire project.

Thank you,

Dear Board Clerk,
I am writing in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.
I'm a commuter, or I travel to the South Bay, Or I live in Gardena/Torrance/Palos Verdes/Santa Monica/Westside/Hollywood or wherever.

The elevated Hawthorne Bl option makes the most sense and I would love to use it and visit the business district/see a movie/shop/eat at one of the restaurants, work there, make it a better destination, or we would definitely use or however you want to put it.

Thank you.

Dear Board Clerk,

Please accept and count my written comment in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.

My name is Maricela Guillermo, a Redondo Beach resident.

Safety must be treated as non-negotiable. The ROW Hybrid option would place a constrained public corridor adjacent to active rail operations carrying high-pressure fuel, directly impacting approximately 1,100 nearby homes, while severely limiting emergency response and evacuation capabilities and posing an unacceptable threat to public safety. The existing corridor, currently used as a public park, further underscores the need for sufficient width and separation. The Hawthorne alignment provides the necessary buffer to safely accommodate multi-use access, emergency and maintenance vehicles, and ongoing bidirectional rail operations.

I also recognize that the multi-use facility carries an estimated **$800 million additional cost**. Rather than compromising safety, **Metro, together with the cities of Redondo Beach, Lawndale, Hawthorne, and others**, could explore **voluntary partnership contributions** from large landowners and major employers in the corridor, such **Space X, Tesla, Amazon, and Northrop Grumman,** who would directly benefit from improved public access, workforce mobility, and property value. Many stakeholders may be willing to contribute if asked.

Passing the Hawthorne Blvd motion prioritizes public safety, ensures long-term operational viability, and allows Metro to explore creative funding partnerships **without advancing to an alternative motion**. This alignment responsibly reflects both the safety and transportation needs of the corridor for decades to come.

Thank you for your leadership and careful consideration of this critical matter.

Respectfully,

Maricela Guillermo

My name is Craig Arima my home is 808 Firmona ave , Redondo Beach 99278
My home backs up to the 20' berm - bringing the freight line 12' from my home ..
I want to Strongly Object to the use of the existing track behind my house ..
Please Accept and count my Written Comment in Support of Motion 11.1 approving HAWTHORNE BLVD ALIGNMENT
as the Project for the C-Line extension ..
if the current line behind my house is expanded and used for commuter traffic the disruption inflicted would be unbearable ..
The constant shaking of the ground from the constant train traffic will potentially undermine the integrity of my back fence and possibly the integrity of my house foundation… the devaluation of my house value would be unacceptable.. the amount of money I would have to spent to maintain let alone increase the peace and tranquility I currently have would be tremendous..
The noise alone will Require my family and myself to install (at the cost of tens of thousands of dollars) all new double pain glass windows and doors .. the noise from passing trains will be unbearable- our bedrooms are on the second floor of the house and is level with the top of the Berm where the trains tracks are used .
Currently every time a train passes the Television signal is disrupted and cuts the programming… if the train is used as a commuter line my television signal will be constantly interrupted..
if the Extention is going down Hawthorne blvd I would be very likely to use the train to shop and travel a few time a week rather than drive to certain malls and shopping centers ..
thank you …
Sincerely , CRAIG K ARIMA

Hello, my name is Ann Chorbi and I live next to the railroad tracks in Breakwater Village, Redondo Beach and I am greatly in support of the motion to put the
CK Line Extension to Torrance on Hawthorne Blvd.
My reasons are common sense ones:
1 No on ROW: . I didn't sign up for 8-10 years of dirty, dusty, noisy construction filled with contamination AND that will make the value of my home go down.
2. Yes on Hawthorne Blvd.: I support this access because more workers could get to work easier and more shoppers would be able to shop better and easier.
It would definitely generate more customers using the light rail safely and easily.. I see it as a WIN-WIN solution.
And it would be safer and faster to construct.

Those are my main reasons, but there are plenty more

Thank you for listening,
Ann Chorbi

In addition the increased potential for Fire from sparks from the rail line is tremendous. The berm behind my house is filled with 3' tall dry grasses and weeds .. all along the berm ..
There are no sources of water to combat any fires that may be started due to sparks .. years ago a fire started from the sparks and the neighbors had to use garden hoses and buckets to put out the flames … lucky the neighbors were home and helped to put out the flames before the fire spread to the surrounding houses and yards … the increase in fire insurance cost would be unacceptable ..
The constant stress of fire possibility would be both Financially and mentally overwhelming..

Subject: Item 11:1 - C Line Extension to Torrance Project - Support for Hawthorne Boulevard Alignment

Honorable Chair Dutra

Metro Board Members

Los Angeles County Metropolitan Transportation Authority

One Gateway Plaza

Los Angeles, CA 90012

Via Electronic Mail: BoardClerk@metro.net

Re: C Line Extension to Torrance Project – Support for the Hawthorne Boulevard Alignment

Dear Chair Dutra and Honorable Board Members,

On behalf of the North Redondo Beach Business Association, we respectfully submit this letter in support of the **Hawthorne Boulevard alignment** for the C Line Extension to Torrance Project.

NRBBA represents local businesses and neighborhood stakeholders throughout North Redondo Beach. After reviewing the alternatives evaluated in the Final EIR, a majority of the NRBBA Board supports the Hawthorne Boulevard option as the most business and resident-friendly alignment while still advancing regional transit goals.

The Hawthorne Boulevard alignment concentrates transit infrastructure along an established commercial corridor, preserving residential neighborhood cohesion and minimizing direct impacts to homes. This approach enhances transit visibility and accessibility, supports local economic activity, and allows for more effective coordination of traffic management, construction mitigation, and business-support strategies during implementation.

NRBBA aligns with the City of Redondo Beach and County Supervisor Holly J. Mitchell in supporting the Hawthorne Boulevard alignment as the option that best balances mobility, equity, economic vitality, and community quality of life.

While recognizing that large infrastructure projects involve tradeoffs and that our Board's position reflects a majority rather than unanimous view, we believe the Hawthorne Boulevard alignment represents the most practical and community-compatible path forward.

Thank you for your consideration and continued engagement with South Bay communities.

Sincerely,

North Redondo Beach Business Association

By the NRBBA Board of Directors

As for Item 33, I want to add that SB 79 will generate revenue badly needed by Metro. If we don't want to end up like other transit agencies around the nation that are facing fiscal cliffs, we need new revenue and ridership drivers. SB 79-enabled housing will greatly boost Metro's position.

> Dear Metro Board:
>
> I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to a vocal few. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support the majority of South Bay people, and the staff's recommendation, and vote no on 11.1. As I said before, as someone who works in aerospace, this project will be crucial to connecting job centers for such an important industry of LA to the rest of LA, enabling opportunities for people who work in aerospace and live around LA, who want to work in the South Bay's important aerospace industry. It is of national importance that this project gets going ASAP, due to these jobs in the area.
>
> I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.
>
> I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. I recognize that there are concerns about voices opposed to housing that will now be opposed to transit, but I guarantee you, the same people against housing are already basically the same people opposed to transit projects.

Dear Holly Mitchell,

Current generations deserve better. But especially future ones.

Paris, New York, Tokyo, Copenhagen, etc Any world class city, like LA is attempting to become.

Might have been hard (change is hard, loud vocal nimby minority backlash is always there - often caused by cars btw, ie. Sprawl) but has any political leader ever not ultimately done right by their «constituents» by prioritizing and building world class public transit?

Disregard noise, - do the right thing for future generations.

Dear Metro Board Members,

My name is Matt Monson, and I'm a West Side resident. I'm writing to urge that the Locally-Preferred Alternative to use the existing Metro right of way for the K Line Extension to Torrance be approved, and that the motion to abandon this plan for the much-worse option along Hawthorne Boulevard be rejected. There are many reasons why the Hawthorne option would be a change for the worse -- including a huge cost increase, years of delays, extra property takings, worse service, and the list goes on -- but on top of all that, it would continue the self-destructive pattern of torpedoing vital regional-scale improvements to mollify the few.

You can never make a choice that will be perfect for everyone. Nevertheless, there is a clear sensible answer here, and I implore you to proceed with it.

Thank you,
Matt Monson

Dear Honorable Metro Board,

I live in North Redondo Beach. Very close to the proposed C/K Line Extension. I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

As a local resident, I am deeply concerned about the proposed Right-of-Way (ROW) alignment. Metro's own analysis indicates that over 1,100 homes would face "significant and unavoidable" impacts, including my home. North Redondo and Lawndale are working-class communities, and it is unfair to burden a neighborhood already identified as "disadvantaged" with 10 years of toxic dust and construction trenching. Furthermore, our neighborhood is one of the most park-poor areas in the South Bay; we simply cannot afford to lose the mature trees and green space that the ROW would destroy.

In contrast, the Hawthorne Boulevard alignment makes sense for the future of our region:

Transit belongs on commercial corridors: By running along Hawthorne, the line will support over 350 businesses and 170 commercial properties, strengthening our local economy without disrupting quiet residential streets.

I urge you to listen to the residents and the cities of Lawndale and North Redondo Beach by choosing the Hawthorne Boulevard alignment. It is the safer, more connected, and more equitable choice for our community.

Michael Shetty

Dear Board Members,

As an almost lifelong County resident who has waited too long for frequent, reliable, and convenient public transit in our region, I urge you to:

1. **Please support Item 11** and **oppose Item 11.1**. Metro owns the right-of-way for this project. Anyone who purchased a home adjacent to a rail corridor did so knowing that was a historical and ongoing use.
2. **Please support Item 10**, the Modified Alternative 5 route for the Sepulveda Transit Corridor which will best serve UCLA and other key destinations with frequent, high-quality service.
3. **Please oppose Item 33** - California needs to plan for smart, sustainable growth. Legalizing housing in close proximity to transit is common sense policy that cities around the world have embraced over the past 50+ years. Metro would do well to utilize SB-79 to facilitate more TOD housing around Metro stops.

Hello Metro Board,

For item # 2025-1062, though I was and still am in favor of Alt 4, if that is not an option I am For the proposal in order to support high quality, high capacity transit between the valley and the Westside.

For item # 2025-0818, I am For it as well in order to further expand transit to the South Bay and set the stage to expand the line to Long Beach.

For item # 2026-0037, I am Against it, as the Hawthorne option will likely come with so many construction difficulties that it will potentially jeopardize the project.

For item # 2025-0985, I am For it, in order to further support the financing of Measure M programs.

For item # 2026-0035 I am For this proposal as well, as reforming the LA Metro Board to better reflect the Counties overall transit needs as opposed to the concerns of a few NIMBY's is a must.

For item # 2025-1028, I am For this proposal as well, in order to ensure Phase 2B2 of the A Line Extension to Montclair is achieved.

For item # 2025-1081, I am For this proposal as it will expand access and public participation in transit governance in critical and necessary ways.

For item # 2025-1033, I am For the proposal in order to ensure a diversity high quality transit information and travel systems for the benefit of riders.

For item # 2025-1053, I am Against the measure, as the measure is a futile attempt at avoiding necessary housing improvement the City's and County desperately need.

Thank you so much,
Oliver Mather

Honorable Board Clerk,
Please find a letter related to January 22, 2026 Board Agenda item 11.1, Board Report 2025-0818. The attached letter comes from the Redondo Beach Mayor and City Council members voting on the issue, opposing the LPA Hybrid ROW option in favor of the Motion submitted by Mitchell, Sandoval, and Dupont-Walker, in File #: 2026-0037 moving that the Board direct the Chief Executive Officer to:
APPROVE the Hawthorne Option, a 4.5-mile light rail line with two (2) stations that extends from the existing Redondo Beach (Marine) Station at its northern terminus along Hawthorne Boulevard before rejoining the Metro Right of Way south of 190th Street to its southern terminus station at the Torrance Transit Center, as the Project (Project);
Please submit and file the letter for the Meeting Record.
If there are any additional steps required, please let me know.
Thank you.

Luke Smude
Assistant to the City Manager

Good morning:

My name is Holly Osborne. I am a retired Engineer, and live in Redondo Beach. I do not live adjacent to the ROW, but I am very near the ROW in Lawndale.

I first became aware of the Metro plans in 2018, and walked over to the ROW. I later made measurements with a yard stick. . I realized that there were a lot of mistakes in Metro's diagrams. Then I looked at where the Metro was planning to go: To a **cemetery**, on the ROW route, or to a **Mall** on the Hawthorne route. It was obvious to me that the Hawthorne route would have more passengers!

Choose the Hawthorne route!

.

Good morning

Holly Osborne, Redondo Beach, retired engineer

First, thank you, thank you to the three directors, Mitchell, Dupont-Walker and Sandoval for putting the Hawthorne Option on the Agenda. To me, it is significant that two of you have actually seen the ROW! I think more directors would unequivocally be "No on ROW", and **for** the Hawthorne Blvd option if they had seen the ROW. *(See picture, below.*)

The FEIR (*page 5,5-16*) states the "existing visual quality is rated low." Metro is blind. They are also denigrating the ROW community.

Please choose the Hawthorne Option for the LRT.

Future generations will thank you.

ROW in Lawndale

Dear Metro Board Members,

I am writing in advance of the Board's Thursday, January 22 consideration of Items 11 and 11.1.

If this Board certifies the Hybrid ROW alignment, it places itself, starting today and well into the future, in a position of deep public distrust, heightened regulatory scrutiny, and escalating legal, operational, and financial exposure. These risks are not theoretical. They flow directly from choosing a higher-impact alignment when a demonstrably safer, lower-risk, and publicly supported alternative exists.

At least three municipalities and their residents have formally urged selection of the Hawthorne Boulevard alignment. A fourth now joins that majority, based on clear, documented safety, environmental, operational, and community reasons. All of these positions were developed without the use of privately funded public relations campaigns or paid messaging. They reflect genuine community analysis and public-interest judgment, not manufactured outreach.

Importantly, the Mitchell-Sandoval-Dupont Walker motion recognizes the practical advantages of the Hawthorne Boulevard alignment, including stronger access to existing businesses, retail corridors, and regional destinations, as well as compatibility with planned growth such as the more than 600 housing units proposed within the South Bay Galleria improvement plans. These are concrete land use and mobility benefits that support ridership, economic vitality, and long-term system value.

The human dimension of this decision cannot be minimized. The fear and housing insecurity associated with displacing even a single residential family matters, especially in today's severe housing shortage. For many residents, relocation does not mean simply finding another equivalent home. It often means losing an affordable, stable sanctuary that cannot realistically be replaced in the current market, even with assistance. The resulting long-term health consequences, loss of stability, erosion of community ties, and degradation of overall quality of life carry lasting social and human costs.

At the first re-established C-Line community meeting, following a period in which the project had been effectively dormant, a resident suffered a medical emergency. That moment underscored the real and immediate stress this process has placed on people's health and well-being.

Many individuals continue to live with ongoing fear related to displacement, safety, and long-term stability, while also confronting the significant and unavoidable impacts identified in the environmental reports. Importantly, these impacts are in fact avoidable through selection of a lower-risk alignment. These impacts are not abstract. They are already occurring.

While acquisition of commercial or industrial properties may be mitigated through established business relocation and startup assistance programs, residential displacement is fundamentally different. Homes are not interchangeable assets. Families do not simply relocate a sanctuary, social fabric, affordability, and stability in the same way a business relocates operations. Treating these impacts as comparable understates the human cost.

Beyond displacement and stress, the Hybrid ROW introduces avoidable safety and infrastructure risk. The corridor contains active pipeline infrastructure that requires long-term integrity protection, coordination, and ongoing monitoring. Any relocation, reinforcement, padding, or protective measures still intersect with subsurface conditions that have not yet been fully characterized for long-term soil integrity and cumulative disturbance risk.

The Torrance Refinery has indicated that continuous jet fuel distribution to Los Angeles International Airport cannot be halted. Any disruption, sequencing conflict, or integrity issue therefore carries implications that extend far beyond the immediate corridor, affecting regional transportation reliability and broader economic activity tied to LAX operations. These risks are not confined to a single neighborhood; they scale regionally and nationally.

An elementary school and a high school in Lawndale are located approximately one block from the corridor. These sensitive receptors were not meaningfully addressed in portions of the project's analysis, despite their obvious relevance to safety, exposure, and community protection. Overlooking nearby schools in proximity to expanded rail and freight activity elevates both public concern and regulatory vulnerability.

In addition, the Hybrid ROW materially increases long-term liability, insurance exposure, and

institutional risk. Co-locating commuter rail with hazardous freight operations, pipeline infrastructure, dense residential receptors, and nearby schools increases the probability of injury related to health impacts, property damage, and cascading claims over the life of the system are a mere few mentioned. These risks persist for decades across operations, maintenance, emergency response, and unforeseen incidents.

Emergency access considerations here are not about routine daily service disruptions or minor incidents. Considerations of catastrophic and multi-system scenarios such as derailments, pipeline integrity failures, hazardous material releases, and compounded infrastructure events requiring rapid multi-agency access, evacuation coordination, and sustained incident command under constrained physical conditions.

While operational plans contemplate spatial and temporal separation between freight and commuter activity, real-world emergency conditions inevitably create circumstances where freight movement and commuter operations overlap or converge during incidents, recovery operations, or service restoration. This co-presence cannot be fully eliminated in practice and increases both complexity and consequence severity.

From an institutional perspective, these conditions translate directly into higher long-term insurance premiums, underwriting scrutiny, claims exposure, litigation risk, and reputational vulnerability. These liabilities become embedded in Metro's operating risk profile and compound over time.

Analytical Integrity and Independent Review

Beyond physical risk, the integrity of the underlying technical record itself warrants independent scrutiny. While staff and consultants have invested significant effort over many years, the Board ultimately bears responsibility for whether the analysis supporting certification is accurate, unbiased, and internally consistent.

Residents and independent professionals have identified material discrepancies in portions of the technical work. For example, in one instance, noise monitoring locations were documented as being positioned significantly different from the stated locations, including variances on the order of approximately ninety feet in one case and forty feet in another. These are not isolated issues; there are numerous additional discrepancies that cannot reasonably be cataloged within a single email and warrant independent verification. Measurement accuracy matters because these inputs directly affect modeled impact conclusions..

In addition, retired engineer Dr. Holly Osborne and retired aerospace engineer Ray Holler have raised multiple concerns regarding mathematical assumptions, engineering measurements, and analytical methodology within portions of the project materials. These are not casual critiques; they come from individuals with deep technical training who are accustomed to

precision, validation, and error checking.

When technical inputs contain unresolved discrepancies or unverified assumptions, the resulting conclusions inherit that uncertainty. Without an independent, neutral review lens, the Board risks certifying a record that embeds avoidable analytical weakness.

Regulatory Implication: Certification based on disputed measurements or unresolved technical discrepancies materially increases vulnerability to regulatory challenge, audit scrutiny, post-certification credibility risk, and future exposure related to the reliability of engineering analyses, benefit calculations, forecasting assumptions, and the defensibility of projected performance outcomes.

Major capital agencies succeed when project decisions align with long-term fiscal sustainability, operational reliability, environmental responsibility, and public trust. When those pillars diverge, agencies inherit avoidable downstream risk: regulatory challenges, funding uncertainty, community opposition, and erosion of institutional credibility. These are precisely the risks this Board has consistently stated it seeks to avoid across all capital programs.

The Hawthorne Boulevard alignment offers a clear and responsible path that reduces exposure across all of these dimensions. It improves access to existing commercial centers and planned housing growth, avoids placing new rail infrastructure in immediate proximity to sensitive residential receptors, schools, hazardous freight activity, and pipeline infrastructure, minimizes displacement pressure and long-term community harm, and provides a more stable platform for delivery, funding confidence, operational resilience, and public acceptance. It is the alignment that demonstrably reduces risk while delivering greater public benefit.

This decision ultimately calls for setting aside any agendas, momentum, or external pressures and exercising the duty this Board was entrusted to uphold: protecting public safety, preserving community stability, maintaining fiscal discipline, and safeguarding institutional integrity. The Board's role is to choose the alignment that best serves the public interest, not the path of least resistance.

I respectfully urge the Board to advance the Hawthorne Boulevard alignment and to choose the option that reduces harm, protects residents, strengthens public trust, and positions Metro for durable long-term success.

I also want to acknowledge and thank Board Members Mitchell, Sandoval, Dupont-Walker, and Butts for their leadership, careful consideration, and willingness to engage thoughtfully on the merits and risks associated with the alignment decision.

Summary of Key Risk Considerations for Board Review

- **Residential Displacement & Quality of Life:** Irreplaceable loss of stable homes during a severe housing shortage, long-term health stress impacts, and avoidable degradation of community stability.

- **Sensitive Receptors:** Elementary and high school located approximately one block from the corridor were not meaningfully addressed in portions of the analysis.

- **Pipeline Integrity, Soil Uncertainty & Fuel Continuity:** Active pipeline infrastructure intersects with unresolved subsurface conditions. Torrance Refinery has indicated jet fuel distribution to LAX cannot be halted, scaling risk beyond the immediate corridor.

- **Liability, Health Risk Probability & Insurance Exposure:** Increased probability of injury, health impacts, property damage, long-tail claims, higher insurance premiums, underwriting scrutiny, and embedded institutional risk over decades of operation.

- **Catastrophic Emergency Response Constraints:** Emergency access concerns involve multi-system incident scenarios, not routine service disruptions, requiring complex multi-agency coordination under constrained physical conditions.

- **Unavoidable Freight–Commuter Co-Presence in Emergencies:** Operational separation cannot fully eliminate overlap during incidents, recovery, or service restoration, increasing consequence severity.

- **Analytical Integrity & Independent Review:** Documented discrepancies in measurement accuracy and engineering assumptions identified by qualified professionals raise record defensibility concerns.

- **Governance & Regulatory Exposure:** Elevated vulnerability to regulatory scrutiny, audit review, post-certification challenge, future engineering reliability concerns, benefit modeling defensibility, and institutional credibility risk.

Thank you for your consideration.

Respectfully,

Karen Ruby

Re: C Line Extension to Torrance Project – Support for the Hawthorne Boulevard Alignment

Dear Chair Dutra and Honorable Board Members,

On behalf of the North Redondo Beach Business Association, we respectfully submit this letter in support of the **Hawthorne Boulevard alignment** for the C Line Extension to Torrance Project.

NRBBA represents local businesses and neighborhood stakeholders throughout North Redondo Beach. After reviewing the alternatives evaluated in the Final EIR, a majority of the NRBBA Board supports the Hawthorne Boulevard option as the most business and resident-friendly alignment while still advancing regional transit goals.

The Hawthorne Boulevard alignment concentrates transit infrastructure along an established commercial corridor, preserving residential neighborhood cohesion and minimizing direct impacts to homes. This approach enhances transit visibility and accessibility, supports local economic activity, and allows for more effective coordination of traffic management, construction mitigation, and business-support strategies during implementation.

NRBBA aligns with the City of Redondo Beach and County Supervisor Holly J. Mitchell in supporting the Hawthorne Boulevard alignment as the option that best balances mobility, equity, economic vitality, and community quality of life.

While recognizing that large infrastructure projects involve tradeoffs and that our Board's position reflects a majority rather than unanimous view, we believe the Hawthorne Boulevard alignment represents the most practical and community-compatible path forward.

Thank you for your consideration and continued engagement with South Bay communities.

Sincerely,

North Redondo Beach Business Association

By the NRBBA Board of Directors

My name is Jennifer Dodge and I am a stakeholder who lives along the ROW in Redondo Beach.

I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard, NOT the hybrid ROW.

The Final EIR should not be certified because it does not show the true cost of the project by including the removal and relocation of the 7 gas pipelines underneath the ROW. Further, the ROW is simply not wide enough to accommodate a freight train and two light rail tracks. Significant and unavoidable impacts that will be permanent are set forth as well that will affect hundreds of homeowners along the ROW.

Community support is behind Hawthorne, NOT the hybrid ROW. Metro polls showing otherwise are skewed and were based on faulty premises.

Metro's own studies show that Hawthorne will have a 35% higher ridership because it will be located in a commercial corridor and exactly where the old Red Car used to run.

This is a generational decision. Please do the right thing and extend the line down Hawthorne Boulevard.

Thank you.

Jennifer Dodge

My name is George Guerrero and I live in Redondo Beach. I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard.

This was supposed to be my retirement forever home. But the risk associated with construction and issues associated with hundreds of trains, passing by my home 24/7 would make it impossible to live there. There would be no quality of life. And I would be irrevocably damaged by the proposed train.

Please consider the other option of running it through the businesses.

I really appreciate you considering this. And how impactful it is to the residents.

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

Please don't be short-sighted, think of future generations and what preserving the green space would do for the city of Lawndale and surrounding communities. One day there will be no need for the cargo trains and at that point the green space can be converted to useable trails for all. Look at the great success the City of Whittier had with turning their old rail tracks into the Greenway Trail.
https://www.whittierprcs.org/parks-center/greenway-trail
If Metro runs their trains down those tracks, that green space will be lost forever.

Your grandchildren and great grandchildren will thank you for preserving the green space.

Dear Metro Board,

My name is Zach and I am a North Redondo resident. I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

I support the Hawthorne Boulevard Alignment because it builds transit that I and others will actually use—faster to construct, better connected, safer for residents, and designed to serve riders and communities for the long term.

Hawthorne would generate more trips and delivers a lower cost-per-trip. Metro's own analysis shows the alignment delivers higher ridership potential and provides benefits that outweigh costs.

It is unfair that the most severe impacts of this project will be forced upon a diverse, working-class neighborhood identified as "disadvantaged" in the most-recent census.

Please do the right thing and vote to APPROVE the HAWTHORNE option.

Thanks,
Zach

Metro Board Members & Staff,

My name is Glen Brackenridge, and as a homeowner in Lawndale whose property lies along the ROW, I am in full SUPPORT for the Hawthorne Blvd alignment for the C/K Line Extension to Torrance.

Almost 10 years ago I founded an organization called Right of Say to help the community advocate for the Hawthrone alignment. From the very beginning, our slogan was always: "No on ROW, YES ON HAWTHORNE". I bring that up to show that we have always been transit advocates, but as I've said in every speech since then, we are for transit – but we want it to be smart transit. We only get one chance to do this right, and Hawthrone Blvd is clearly the smarter, healthier, and more just option of where to put the train.

To review the benefits of Hawthorne: it increases ridership by at least 35%, putting more riders on the train and less cars on the road; it increases business activity as there would be more foot traffic for the businesses on Hawthorne and a stop at the Galleria; it keeps the toxic chemicals currently buried on the ROW from being destabilized and airborne thereby increasing the health of residents; it does not need for the city to take any homeowner's property away as there are no homes on the Hawthorne commercial corridor; it keeps Lawndale's much-needed greenspace of trees for shade and pollution absorption; it avoids the moving of any chemical or jet fuel pipes, at least 6 of which are on the ROW; it will not interfere with traffic as it will run elevated along a center median in Hawthorne designed for the Pacific Rail; and most importantly it will be cheaper in the long run as there will be no costly time consuming lawsuits from Lawndale, Redondo Beach, and citizen groups because we are all advocating FOR HAWTHORNE.

So the Hawthorne Blvd alignment is pro-business, pro-environment, pro-ridership, pro-community, and ultimately pro-transit.

This is a rare opportunity for the Metro Board to choose something that everyone will be happy with: all those opposed to the ROW will be ecstatic for the Board to choose Hawthorne AND all those transit advocates on the other side will STILL GET A TRANSIT TRAIN! So by choosing Hawthorne, everyone can get what they want. And by choosing the Hawthorne Blvd alignment, the Metro Board will prove that ALL the residents of the South Bay are pro-transit.

Thank you for your time, and I look forward to your vote tomorrow in Support of Hawthorne.

Glen Brackenridge

Dear Honorable Metro Board,

- Expediency & lowest price are always the worst metrics to use when choosing a project whether personal or public
- Light rail down Hawthorne Blvd provides ease of access by both customers & employees to both sides of Hawthorne Blvd
- Proven testimonials: Major city centres around the world have light rail going down middle of major street

We need long term planning, not short term thinking.

Thank you,

Erik Orre

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

My name is Albert D. Shin and I live at 2305 Pullman Ln, Unit B, in Redondo Beach, California.

I believe it makes sense for the short term and long-term to place the C/K Line extension to Torrance on Hawthorne Blvd. There would be short-term construction impacts over the next several years to residential neighborhoods of the extension line was placed on the ROW area, and long-term noise issues and would lower the value of residential neighborhoods along the ROW area.

Although slightly more expensive, it makes sense to place the C/K Line extension to Torrance on Hawthorne Blvd. based on short-term and long-term reasonable factors. This C/K Line extension on a busy commercial street would make more sense and would also help invigorate the commercial business corridor there.

In addition, the placement of the new Redondo Beach station terminal on the other side of the South Bay Galleria mall and near commercial areas makes much more sense, rather than closer to residences on the ROW area.

Best Regards,

Albert D. Shin

Honorable Board of Directors,

I am writing to formally oppose the certification of the Final EIR for the C Line Extension (Hybrid Alternative). I am the homeowner at **4624 W 160th St**, directly abutting the proposed right-of-way.

My request for property acquisition has been rejected, forcing my family to remain in a home that this project will render unsafe and practically uninhabitable. I urge you to vote **NO** based on the following unmitigated impacts:

1. Critical Safety Hazards for My Young Family My wife and I have a two-year-old daughter. The proposed construction will place heavy industrial machinery, excavation equipment, and hazardous dust directly adjacent to her bedroom and play area. It is impossible to guarantee the safety of a toddler living feet away from a major multi-year infrastructure project. The inevitable air quality issues and construction hazards pose an unacceptable risk to her development and health.

2. Permanent Noise and Vibration Beyond the construction phase, the operational reality of trains passing every few minutes will destroy the quiet enjoyment of our home. The vibration and noise levels documented in the EIR do not account for the human toll of interrupted sleep and the inability to use our outdoor space.

3. Loss of Property Rights and Development Potential This project effectively freezes the utility of my land. The proximity of the line imposes severe limitations on my ability to develop my parcel, including restrictions on future renovations or the addition of an Accessory Dwelling Unit (ADU) to accommodate our growing family. You are stripping away the value and potential of my property without offering compensation or a way out.

4. Irreparable Reduction in Quality of Life This project transforms a quiet residential sanctuary into an industrial corridor. By voting yes, you are prioritizing the project timeline over the safety and well-being of existing residents. We are being asked to bear a

disproportionate burden for a regional benefit, with no path to relocate.

I ask you to reject the Hybrid Alternative until a solution is provided that guarantees the safety of my family or offers fair acquisition of my property.

Sincerely,

Trae Jennette

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

My name is Annaroza. My husband and I moved to Lawndale and bought house 4722 W 167 St almost four years ago. We plan to stay in this safe and quiet neighborhood and raise our son here. That's why we don't want any construction in our beautiful park with its lush green grass. It's the only nature we have in our neighborhood. We don't support this construction; we want to save these trees so we can walk our dog and child here. Don't ruin our neighborhood with this metro line. We never use the metro and don't need it here.

My name is Doug Eakins and I live in Redondo,and I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard.
I am greatly in favor of the Hawthorne Boulevard Alignment as it will provide easier access to transit for people who will actually use it. Also it be faster to construct, better connected, safer for residents, and designed to serve riders and communities for the long term
Also, it historically rail lines have a long history of contamination beneath the surface. Digging up these contaminants and making them airborne is a huge risk to our neighborhood. Metro has stated that more than 1,100 homes will have to deal with "significant and unavoidable" impacts of the construction period alone. This type of construction is much more adaptable for the commercial road of Hawthorne than the residential row option.
Thank you,
Doug Eakins
Redondo Beach Resident for 20 years

My name is Diane Lewis and I live in Redondo Beach, and I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard.

I will have to live with 8-10 years of significant construction impacts while trying to get to my Dr appointments, daily shopping, etc. I have breathing issues already. These rail lines have a history of contamination beneath the surface, so digging up these contaminants and making them airborne is a huge risk to me and my neighbors health.

Transit like this belongs on commercial corridors! I support the Hawthorne Boulevard Alignment because it builds transit that I and others would actually use. The Hawthorne Blvd alignment has political support from Lawndale, Redondo Beach, Hermosa Beach, and Hawthorne. Also the Hawthorne alignment is backed by major business interests including the North Redondo Beach Business Association and the current developer of the South Bay Galleria's new housing project. Please consider how badly, if chosen, the ROW will affect the communities it will run through, and choose the Hawthorne alignment for a better quality of life for the residents of the communities affected.

Hello - I'm Kelsey, a Redondo Beach resident reaching out in support of the motion to locate the C/K Line Extension to Torrance on Hawthorne Boulevard.

I am extremely concerned about the environmental and lifestyle impacts of the ROW - toxins close to my home, unknown contaminants below the surface, loss of trees providing oxygen, disrupting green space for families, and of course increased traffic in that area during construction.

Transit makes more sense on active commercial corridors, not in residential areas! Hawthorne Blvd is already a business/commuter corridor and the extension makes much more sense there - for the reasons stated above and for the amount of use the line would get on a commercial corridor!

Thank you for supporting residents in favor of the Hawthorne Blvd solution.

- Kelsey Good

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD. I live in North Redondo Beach, very close to this proposed project. I do not want to live with 8-10 years of construction chaos and toxicity near my home. Historic rail lines have a long history of contamination beneath the surface. Digging up these contaminants and making them airborne is a huge risk to our neighborhood. Further, this project would devastate the existing green space, which is unjust being that this location of the project is in Lawndale, which is the most park-poor city in the entire South Bay.

Moving this project to Hawthorne Blvd. makes much more sense for our community. It will generate more trips and deliver a lower cost-per-trip. Metro's own analysis shows the alignment delivers higher ridership potential and provides benefits that outweigh costs. The Hawthorne Boulevard alignment has broad political support including from the cities of Lawndale, Redondo Beach, Hermosa Beach and Hawthorne. State Senator Laura Richardson and State Assemblymember Tina McKinnor also support Hawthorne Blvd. The Hawthorne alignment is backed by major business interests including the North Redondo Beach Business Association and the current developer of the South Bay Galleria's new housing project.

Thank you for considering my input,
Sara Aguilar

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

My NAME IS ANGELINE SOUZA
I LIVE AT BREAKWATER VILLAGE ON THE OTHER SIDE OF THE TRAIN TRACKS.

I SUPPORT THE HAWTHORNE BOULEVARD BECAUSE IT WILL BE FASTER TO CONSTRUCT BETTER CONNECTED AND SAFER FOR RESIDENTS AND ONE THAT I WILL USE.

IF ALONG THE ROW I WORRY ABOUT DIGGING UP CONTAMINANTS AND HAVING THEM AIRBORNE AND PRESENTING HEALTH ISSUES FOR ALL OF US.

ANGELINE SOUZA

Dear Honorable Metro Board,

My name is Georgia Brewer, I live in Sherman Oaks, and I am writing to express my support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard.

I'm a resident of Los Angeles County, and I agree with County Supervisor Holly Mitchell's motion.

I believe transit belongs on active commercial corridors, not in residential areas. And Metro's own analysis shows the alignment delivers higher ridership potential and provides benefits that outweigh costs.

For too long, families have been the losers when major construction projects like this are conceived. It's time to put families first.

Let's do the right thing and run the C/K Line Extension on Hawthorne Blvd.

Thank you.
Best,
Georgia Brewer

My name is Jamison Hughes, and I live in Lawndale. I am writing in support of the motion to place the C/K Line extension to Torrance on Hawthorne Boulevard.

Across the country, transportation projects have too often been routed through low income communities and communities of color, creating long term disruption while providing limited benefit to the residents most affected. Highways and rail lines have historically divided neighborhoods and placed environmental and health burdens on communities that already face fewer resources.

The proposed ROW alignment risks repeating this pattern. It would concentrate years of construction impacts in a working class residential neighborhood. Metro's own analysis states that more than 1,100 homes would experience significant and unavoidable impacts during an eight to ten year construction period, including prolonged noise, vibration, and exposure to dust from a historic rail corridor.

Lawndale would experience these impacts without receiving a single station or stop. Residents would bear years of disruption without meaningful access to the transit benefits the project is intended to provide.

The Hawthorne Boulevard alignment offers a more fair and practical alternative. Transit belongs on active commercial corridors where it can serve more riders, support local businesses, and minimize harm to residential neighborhoods. Metro's analysis shows the Hawthorne alignment delivers stronger ridership and better value while better aligning with equity and environmental justice goals.

I respectfully urge you to support the Hawthorne Boulevard alignment.

Thank you for your time and consideration.

Sincerely,
Jamison Hughes

My name is Blake. I own my home in Lawndale. I purchased it in 2019. I am in favor of the sea line extension down Hawthorne Boulevard.

It would be detrimental to send the metro extension down the road as the construction cause the gas lines to break and put so many people in danger we need to think of people before anything else and their safety.

Thank you
Blake

Dear LA Metro Board,

My name is Colleen Kelly Brackenridge, and as a resident of Lawndale I am writing in SUPPORT of the motion to place the C/K Line Extension to Torrance on Hawthorne Blvd.

As Lawndale is the most park poor city in all of the South Bay, destroying our one greenspace (the ROW) would be devastating for the community. We count on those trees to provide shade and absorb pollution, we need that open space for our walks and our meet-ups, and we treasure the way it unites rather than divides our neighborhood. Plus, digging up the ROW would only spread the contaminants that are currently thankfully trapped under the soil into our backyards and homes.

Metro admits that using the ROW would unavoidably negatively impact more than 1,110 homes for not only the 8-10 years of construction, but also in perpetuity due to the noise, vibration, and air pollution of commuter trains from 4am-12am every day. Contrast that with the Hawhthorne alignment where no homes are affected, which is an already busy commercial corridor and whose businesses – including the North Redondo Beach Business Association and the South Bay Galleria – are in FAVOR of the train going down Hawthorne, and the choice for Hawthorne seems very clear.

We in Lawndale are in favor of transit connecting us to the rest of the city, but we want a transit that increases ridership and is a net benefit to the community. Hawthorne Blvd will bring in more riders, increase commerce at businesses, improve the environment, and please ALL your constituents. The choice is not between pro and anti-transit. The choice is between destroying a community, or picking an alignment that all of the city councils, the businesses, the citizens, and transit advocates can get behind, which is Hawthorne Blvd.

You have an incredible opportunity in choosing a way forward that rewards everyone on all sides of this issue. Please choose Hawthorne Blvd, please choose the smart transit choice for the South Bay.

Thank you!

Colleen Kelly Brackenridge

From: Stuart Pearson

To Whom It Concerns;

My name is Stuart Pearson and I live on 161st Street in Lawndale (half a block from the train track) and I support the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard.

Forcing the tracks into my neighborhood would cut our street in half (and all the other streets in our neighborhood) and mean somewhere around 8-10 years of construction, trenches, noise and toxic dust roughly 300 feet from my home. We are not renters. We own our home and take each local election very seriously. Two freight trains per day was the agreement, not 10 years of toxic, noisy construction. This would destroy the lives of numerous families and obliterate the property values of all our homes.

The Metro says more than 1100 homes will be impacted if the track is set in our ROW.

This type of traffic and transit would be much better served on commercial land, like Hawthorne Blvd, where there is ample room to build, while giving the local businesses a much-needed boost in retail traffic if stops are built. Over 300 businesses would benefit.

Senator Richardson and State Assembly member Tina McKinnor support building this on Hawthorne Blvd. The Hawthorne alignment is backed by major business interests including the North Redondo Beach Business Association and the current developer of the South Bay Galleria's new housing project. Hawthorne Blvd could utilize this in ways that would be wasted by ramming it through a quiet stretch of over 1100 family houses.

Thank you in advance for voting for Hawthorne Blvd instead of our Right of Way.

Stuart Pearson

Dear Board Members,

I strongly oppose the Right-of-Way (ROW) alignment for the C/K Line extension and urge you to support the Hawthorne Boulevard route instead.

The ROW option would permanently damage Lawndale by removing some of the very limited green space our community has left, placing infrastructure directly next to homes, and degrading quality of life for residents who already bear more than their fair share of environmental and infrastructure burdens.

Let's be clear: routing rail through ROW corridors in Lawndale is economically discriminatory. These alignments are repeatedly chosen in lower-income, historically marginalized communities because they are viewed as politically "easier," even when they impose higher noise, safety, pollution, and displacement risks. This pattern has been documented for decades in transportation planning, and Lawndale should not be the next example.

Hawthorne Boulevard is the equitable, modern, and economically sound choice. It serves more riders, supports local businesses, avoids residential intrusion, preserves scarce green space, and treats Lawndale residents with the same respect afforded to wealthier neighborhoods.

Please do not sacrifice our community because it is convenient. Choose the Hawthorne Boulevard alignment.

Metro Board,

My name is Ken Vick, I am a resident of Lawndale I am support for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

Hawthorne Blvd once had mass transit and could again. Metros own analysis showed in has higher ridership potential.

And it lacks all common sense to ignore a previous transit corridor to put the line in a residential neighborhood. There's no way it's better to the community to impact thousands of homes and destroy open green space in a diverse, working class neighborhood than to put it along a commercial corridor.

Do the right thing and support Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

I'm living in Breakwater in Redondo Beach.
My bedroom is facing the railroad.
It's too close to my home.
I can't sleep or live if train runs close to my bedroom .

Dear Board Clerk,

My name is Bernard Fallon, a resident of Torrance, and I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard. I believe the Hawthorne Blvd route would be the most beneficial for Torrance residents including myself with less impact on neighbors in Redondo Beach and Lawndale.

Sincerely,
Bernard Fallon

Dear Metro Board,

I support Supervisor Mitchell's motion to extend the C/K Line to Torrance on Hawthorne Boulevard. Older rail lines have contaminated soil. Digging up these contaminants poses a risk to me, my family, and neighbors. Our exposure depends on the wind direction during excavation. Please prioritize safety and vote for Hawthorne Blvd for the C/K line extension.

Thanks,
Monika Olmos, Redondo Beach resident.

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.
.
Please support Hawthorne and those with limited access to a car.
Good transit expands your world and offers greater opportunities.

Transit cities do not cater to park and ride commuters but to those riders whose lives depend on it.

Please support 11.1 and Hawthorne Option
Greater access and ridership now and especially with future development in a busy corridor. It represents fairness.

Remember Metro Equity Plan highlighting equity equality striving for justice.

The ROW makes a mockery of those words by giving Lawndale zero justice and every adverse consequence. It makes us the doormat for commuters from Torrance, PV, etc.

10,000 + reasons. This is the average number this decade of derailments.

2025 the average number of report to NTSB was 1,300 .
I
Please don't allow Metro to roll the dice on our lives.

Thank you,
Rose Rodriguez,
George Rodriguez
Patrick Rodriguez
Ryan Rodriguez

My name is Jill Love, and I am a homeowner in Redondo Beach along the Right of Way. I enthusiastically support the C-Line extension to Torrance via the Hawthorne Blvd. alignment and urge you to reject the FEIR in tomorrow's meeting.

As a mom of two, small business owner, and a geriatric care manager, I have many concerns about the ROW option, such as:

- **The inability of many of my older adult neighbors to age in place as planned, due to significant and unavoidable impacts to residents living at Breakwater Village or anywhere along the ROW**. As a geriatric care manager, I know that well over 90% of older adults wish to age in place at home compared to moving to assisted living communities, which here in the South Bay cost approximately $8,000-$15,000 (or more) per month. I regularly tour and conduct price comparisons for my clients here in the South Bay, so these are current market rates. In addition to those costs, home values during construction will plummet due to the significant and unavoidable impacts to ROW constituents, so these older adults will be in an even more precarious position when it comes to financing retirement living elsewhere.
- **Soil instability along the ROW**, in light of the fact that two of my neighbors had a sinkhole in their yards that took three years to repair by the gas pipeline operators. How much more disruption to the soil will there be over several years when trying to add two passenger rail lines, remediate the existing freight line, and protect (or move) the multiple gas lines buried along the ROW?
- **The unknown costs (not identified in the FEIR) to move or protect the multiple gas lines currently underneath the freight line**, owned by various pipeline companies. Metro did not account for pipeline relocation costs when they estimated that the ROW would be cheaper and take less time to complete compared to Hawthorne Blvd. I highly

doubt that there would be any significant savings of cost or time when all true costs are considered.

- **The need to exercise eminent domain,** with notices already going out to several Lawndale neighbors despite Metro stating that homes wouldn't be impacted. The more homes impacted, the higher the cost of construction for ROW, in addition to the displacement of so many of my neighbors.
- **The safety concerns of runnning passenger trains just feet away from freight trains containing fuel.** I am already dismayed that thousands of us may be plagued with the noise of passenger trains running 18-20 hours per day, hundreds of times per day. To add the risk of derailment or collision between trains is simply not worth any potential cost savings.

The Hawthorne Blvd. alignment eliminates all of my above concerns, and it provides a safe, pleasant, and convenient path of travel for our community to travel. It's also the alignment that will garner 35% higher ridership.

The Hawthorne Blvd. alignment does the greatest good while minimizing harm to local residents. Please vote for the Hawthorne alignment!

Thank you for your consideration,

Jill Love

My name is Kathlyn Lopez and I live in Lawndale and I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard.

I have lived near the row for my whole life, 30 years, and have always loved the trees and grass and feel of nature being so close to home. I would hate to see this greenery destroyed while there are other options for the metro to build down Hawthorne. Please keep our greenery and build elsewhere.

Best,
Kathlyn Lopez

Hi. My name is Michelle Hughes, and I live in Lawndale. I am writing in support of the motion to place the C/K Line extension to Torrance on **Hawthorne Boulevard.**

High-capacity transit should strengthen existing commercial corridors, not divide residential neighborhoods. Hawthorne Boulevard serves as a vital economic spine, supporting more than 350 businesses across 170 commercial properties. Routing the line along this corridor would bolster local jobs, retail, and services while avoiding the unnecessary disruption to homes, schools, and neighborhood life that would result from using the ROW.

By contrast, placing the line along the ROW would impose significant negative impacts on Lawndale without providing any corresponding benefit. The city would not receive a single station or stop, yet residents would endure years of construction, noise, and disruption without meaningful access to the transit benefits the project is intended to deliver.

For these reasons, I respectfully urge you to support the Hawthorne Boulevard alignment. Thank you for your time and thoughtful consideration.

Michelle Hughes
Lawndale home owner

My name is Severiano Lopez and I live in Lawndale and I am in support of the motion to put the C/K Line extension to Torrance on Hawthorne blvd.

I live down the street from the rail road tracks. One of the reasons I chose to buy a home here was for the green space. All five of my children grew up walking to school down those tracks, walking our dogs or playing with friends down there. Please do not destroy this green space. My grandchildren now enjoy this space when they come to visit. It is an important part of our community.

Severiano Lopez

Dear Honorable Metro Board,
Please, I am urging you to move the Metro Line to Hawthorne Blvd and away from my home. I have lived here for 25 years and have raised three daughters. We love our neighbors and our neighborhood. We are a giant family here, looking after one another. Please do not make a decision that will dismantle our lives. I am looking forward to raising my future grandchildren here. Please don't take that away. Keep our neighborhood the way it is,….safe and secure!
Thank you,
Anahid Magdesian

Dear Honorable Metro Board,

My name is Louis Vesely and I am a retiree living in Redondo Beach.

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

I was excited to hear that Metro was coming to our area until learning of the ROW proposed route. Traffic on Inglewood between the 405 and Manhattan Beach Blvd. can be challenging during AM & PM rush hours. With trains scheduled for every 10 minutes, the odds of an incident with an auto and a train increase. Putting the rail above all of this (just like at LAX) would be the safer and logical choice. A bonus would be for all the businesses along Hawthorn being seen by the passengers *Free Advertising*.

I look forward to using the Metro to go to LAX and downtown. Please do the right thing and vote YES on Hawthorne. Thank you for listening.

Sincerely,

Louis Vesely

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

My name is Matt Horwitz and I live in Redondo Beach along the ROW, and will have to live with 8-10 years of construction impacts, trenching and toxic dust in close proximity to my home and the place where my children are growing up! Metro itself says more than 1,100 homes will have to deal with "significant and unavoidable" impacts of the construction period alone. It is very unfair that the most severe impacts of placing the proposed metro line along the ROW will be forced upon a diverse, working-class neighborhood.

Rail lines have historically run along Hawthorne blvd and should continue that way.

I URGE you to support Supervisor Mitchell's motion to place the extension on Hawthorne Blvd and keep construction and trains away from my family and neighborhood! Transit belongs on active commercial corridors, not in residential areas. Hawthorne Boulevard supports more than 350 businesses across 170 commercial properties, where rail can strengthen jobs, shopping, and services without disrupting homes.

Thank you for your time, and please do the right thing!

Best,

--
Matt Horwitz

Dear Honorable Board Members and City Officials,

My name is Haol Yao and I am writing to you as a resident of Redondo Beach and a homeowner living directly adjacent to the Metro-owned Right-of-Way (ROW). I am writing to express my SUPPORT for Supervisor Mitchell's motion to select the **Hawthorne Boulevard alignment** for the C/K Line Extension to Torrance and to reject the use of the ROW residential alignment.

While I support the expansion of our public transit network and understand the vital need for connectivity in the South Bay, the choice of alignment will dictate the success of this line for generations. The decision before you is a choice between a "path of least resistance" that compromises our neighborhoods, or a forward-thinking investment in a true transit corridor.

Why the Hawthorne Boulevard Alignment is the Right Choice

Transit is most effective when it goes where the people are. Hawthorne Boulevard is the commercial spine of the South Bay. It is a hub of economic activity, jobs, retail, and dining. Placing the line here aligns with the fundamental principles of smart urban planning:

1. **Ridership and Utility:** A transit line along Hawthorne Blvd places stations within walking distance of major commercial destinations and workplaces. It serves the daily needs of riders—getting them to jobs and services—rather than just transporting them *through* a community.

2. **Economic Potential:** The Hawthorne alignment offers significant opportunities for Transit-Oriented Development (TOD). It can revitalize the corridor, support local businesses, and create a vibrant, walkable streetscape. The ROW, by contrast, is tucked behind fences and backyards, offering zero potential for economic synergy.

3. **Regional Connectivity:** As we look toward the 2028 Olympics and beyond, we need a system that highlights our region's assets. A line running down a major boulevard signals a modern, connected city. A line hidden in a residential alleyway feels like a retrofit that missed its potential.

Why the ROW Alignment is the Wrong Choice

The proposed ROW alignment attempts to force a high-frequency commuter train into a corridor that was historically used for infrequent, slow-moving freight. The context of our neighborhoods has changed dramatically since those tracks were laid.

1. **Irreparable Harm to Neighborhood Character:** The ROW cuts within feet of bedrooms, living rooms, and backyards. The noise, vibration, and visual blight of trains running every few minutes, from early morning until late at night, would fundamentally destroy the peace and privacy of hundreds of Redondo Beach and Lawndale families. This is not just a "NIMBY" concern; it is a question of whether it is ethical to sacrifice the quality of life of a specific residential corridor when a viable commercial alternative exists just blocks away.

2. **Safety Concerns:** Many of our properties abut the ROW with nothing more than a fence. The proximity of high-speed trains to homes where children play and families gather poses an undue safety risk. No amount of sound walls or mitigation measures can fully eliminate the hazard of running a major rail line through a dense residential fabric.

3. **The "Train to Nowhere" Effect:** Because the ROW avoids major intersections and commercial centers in favor of backyards, it creates stations that are harder to access and less safe for pedestrians. It forces riders to walk further to reach their actual destinations on Hawthorne Blvd, discouraging use.

Conclusion

We have a once-in-a-lifetime opportunity to build this extension correctly. A decision to use the ROW is a decision to prioritize cost and convenience over community well-being and long-term transit utility. It saves money today at the expense of our neighborhoods forever.

I implore you to look beyond the spreadsheet and see the communities on the ground. Please respect the families of Redondo Beach and Lawndale. Vote to put transit where it belongs: on our commercial boulevards, not in our backyards.

Support the **Hawthorne Boulevard alignment**.

Sincerely,

Haol Yao

Dear Honorable Metro Board,

I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD.

The Hawthorne Blvd location makes sense as it will be well situated to access retail stores in Lawndale & beyond. I feel it will bring renewed interest & tax revenue in shopping locally & I can see myself using this Metro line location.

Sincerely,
Theresa Thomas
Lawndale resident

My name is Cathy Mantell and I reside along the ROW in Redondo Beach.

I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard, NOT the hybrid ROW.

The Final EIR should not be certified because it does not show the true cost of the project by including the removal and relocation of the 7 gas pipelines underneath the ROW. Further, the ROW is simply not wide enough to accommodate a freight train and two light rail tracks. Significant and unavoidable impacts that will be permanent are also identified.

Community support is behind Hawthorne, NOT the hybrid ROW. Metro polls showing otherwise are skewed and were based on faulty premises.

Metro's own studies show that Hawthorne will have a 35% higher ridership because it will be located in a commercial corridor and exactly where the old Red Car used to run.

This is a generational decision. Please do the right thing and extend the line down Hawthorne Boulevard.

Thank you.

Cathy Mantell

Hello,

My name is Domenica Cresta and I live in North Redondo and I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard.

My house faces the train tracks and we will have to live many years here of significant construction impacts, trenching and toxic dust in close proximity to our home and we have children. We will also be dealing with the constant noise and disturbance that comes with this construction, to our quiet, safe, family oriented neighborhood. We have a ton of children that live in this area and it is not fair for them and to us to have to deal and live with this when there is a second/better option.

This train line needs to be in a more commercial area, not in a residential area where our kids go to school, ride their bikes or play outdoors in our green spaces. This is all we have and will be take away! Please think about your own families and this would impact you if a metro line was put in your front/back yard.

Thank you for your time and consideration to read my email.

My name is Jim Brown and I live in Redondo Beach and I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard.

Hawthorne Blvd is a significantly better route than going through residential areas.

The Hawthorne route puts the transit on a commercial corridor, where it belongs, not through a residential neighborhood.

Hawthorne Boulevard supports more than 350 businesses across 170 commercial properties, where rail can strengthen jobs, shopping, and services without disrupting homes.
Hawthorne generates more trips and delivers a lower cost-per-trip. Metro's own analysis shows the alignment delivers higher ridership potential and provides benefits that outweigh costs.
The Hawthorne Boulevard alignment has broad political support including from the cities of Lawndale, Redondo Beach, Hermosa Beach and Hawthorne. State Senator Laura Richardson and State Assemblymember Tina McKinnor also support Hawthorne Blvd. It is also backed by major business interests including the North Redondo Beach Business Association and the current developer of the South Bay Galleria's new housing project.
The constant noise and vibration of dozens of trains a day, regardless if surfaced or trenched, will disrupt the adjoining residences.

Jim Brown

I am in support of the motion to put the C/K Line Extension to Torrance on Hawthorne Boulevard, NOT the hybrid ROW.

Community support is behind Hawthorne, NOT the hybrid ROW. Metro polls showing otherwise are skewed and were based on faulty premises.

Metro's own studies show that Hawthorne will have a 35% higher ridership because it will be located in a commercial corridor and exactly where the old Red Car used to run.

This is a generational decision. Please do the right thing and extend the line down Hawthorne Boulevard.

Thank you,

Annie Noguchi

Dear Honorable Metro Board,

My Name is Frank Talavera, and I am a lifelong resident of Lawndale. I am writing in **SUPPORT** of Supervisor Mitchell's motion to place the C/K line Extension to Torrance on HAWTHORNE BLVD.

It is unfair that the most severe impacts of this project will be forced upon our community. This project will isolate and divide many of my neighbors with the constant interruption of trains passing through our city, destroy valued green space that our residents have come to enjoy, and many homeowners will lose their homes after sacrificing so much to provide a decent place to live and raise their children.

The Hawthorne Boulevard route makes more sense because it advances regional transportation objectives by providing the best connectivity between local and regional transit systems. Transit belongs on active commercial corridors, not in residential areas. This project should support local businesses, shopping, and services in the community.

This board MUST take heed of the communities that have voiced their opinions in favor of the Hawthorne Blvd. Alignment option, such as Lawndale, Redondo Beach, Hawthorne, and Hermosa Beach cities. How can you ignore the opinion of four South Bay cities that have, in unison, opposed the "Locally Preferred Alternative. (LPA).

PLEASE reconsider Item 11 #2025-0818 (LPA) and SUPPORT the motion by the three board members to move this project to Hawthorne Blvd.
Best Regards,

Best Regards,

Frank M. Talavera
Lawndale City Councilmember

1/21/2026
Metro Board of Directors:

Hello, I am Colleen Villegas, Right-of-Way homeowner. Thank you, Supervisors Mitchell, Dupont-Walker, and Sandoval, for placing Motion 11.1-support for the Hawthorne Boulevard alignment on Thursday's agenda. Being heard matters, and you

proved that listening leads to better decisions. I urge the remaining supervisors to support this alignment. It protects our neighborhood, preserves our environment, and avoids unnecessary risk.This is smart, forward-thinking transportation planning and the right choice for our community’s future. Thank you for your leadership.

Colleen Villegas
Lawndale residen

Hello,

My name is Alyssa Collins, I live in Los Angeles, and I support the Hawthorne Blvd elevated option and **strongly oppose** the ROW option. The Hawthorne option will revitalize Lawndale, boost the economy, preserve green space, and increase ridership, among many other benefits. Hawthorne Blvd is already designed for commuter railway track and previously housed the Pacific Electric Red Cars.

The ROW option is opposed by entire communities, as it poses significant physical, financial, environmental, and emotional risks. It will decimate communities that have existed for generations.

Please support the Hawthorne Blvd elevated option.

Thank you,
Alyssa Collins

Dear Metro Chair Dutra and Esteemed Members of the Board,

I support Agenda Item 11 and oppose Agenda Item 11.1. Metro owns the Right of Way (ROW) on the Locally Preferred Alternative (LPA) under the Agenda Item 11. The Hawthorne option under Agenda Item 11.1 leads to delays and at least an extra $700 million for the same ridership. I urge the L.A. Metro Board to support the staff recommendation, Agenda Item 11 and oppose Agenda Item 11.1.

I support Agenda Item 10 with changes to Modified Alternative 5 as the Locally Preferred Alternative (LPA). I advocate for a stop on Sherman Way as planned on Alternative 5 and an expansion of the Initial Operating Segment (IOS) to the Expo/Sepulveda E Line stop.

Sincerely,
Kevin Dedicatoria
Culver City
Transit advocate

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,
Michael Alvarado

Dear Metro Board:

1) I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

2) I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

3) I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. SB-79 also goes hand-in-hand with Metro's pledge of building 10,000 homes near its transit stops. It simply makes no sense for Metro to ask for an exemption from this transformative housing bill, and doing so further reinforces the desires of LA's political ruling class: to strengthen the status quo and protect wealthy homeowners at the expense of the literal livelihoods and homes of lower-income residents.

Thank you,
David Tran

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. Any concerns about future opposition to transit based on SB 79 is overblown because the law limits projects to those already on the books. NIMBYs will oppose housing and transit using whatever issue is most salient at the moment, so we shouldn't cave to them. I live in a single family home within half of a mile of an expo line station and I support the upzoning of my neighborhood!

Thank you,
Ben Mayne

Dear Metro Board Members,

My name is Cesar Garcia, and I serve on the United Neighborhoods Neighborhood Council. I live near the Expo/Crenshaw hub—an area with incredible transit access but a frustrating lack of housing investment and pedestrian safety. It is a shame to see such high-quality transit surrounded by so little density.

Because I want to see our transit system succeed, I am urging the Board to take the following actions:

1. Support Item 11 and Reject Item 11.1: Do not allow the C Line Extension to be derailed. Spending $700M more for a "worse" route is fiscally irresponsible and ignores the needs of future riders.

2. Support Item 10: I urge you to follow staff's recommendation for Modified Alternative 5 for the Sepulveda Transit Corridor.

3. Oppose Item 33: Requesting an exemption from SB-79 makes Metro look out of step with state housing goals. As a resident of the 90018 zip code, I know that more housing around our stops is the only way to ensure the long-term viability and safety of the system.

Transit works best when people actually have a place to live near it. Please prioritize ridership and housing over delays and exemptions.

Thank you,

Cesar Garcia

Member of United Neighborhoods Neighborhood Council

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,
Jada Jones

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBYs, the majority of whom have not read the report. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 11. The LPA is a good compromise between local interests and transit rider interests. It gets us what we need in a not unreasonable amount of time and for significantly lower cost.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. The automated heavy rail technology in this proposal has the potential to cause a modal shift in the region, getting a significant number of people out of their cars and greatly reducing traffic on the 405. We need this project to tie the region together.

I oppose Item 33. I campaigned in support of SB-79. I find it appalling that the metro board has decided to act with cowardice on this issue. Metro claims to be already building housing - plans are for 10,000 units. This is comically low. We need at least 100,000 or 1,000,000 units in Metro's jurisdiction to address the crushing housing affordability crisis we face in LA county. SB-79 empowers state and county officials to make those sweeping, necessary changes. Metro staff are concerned that SB-79 interferes with, or in some cases destroys, local partnerships that Metro builds to get transit projects done. This is a valid concern, but I think Metro board members fail to grasp that new partnerships can be forged; such as with community groups who support transit AND housing.

Instead of looking to the future, board members seem fixated on the past in this case; past community groups and past supporters. In dark times such as these, given the reckless actions of the current presidential administration, courage can be hard to find. But courage is like a muscle; the more you use it, the stronger it gets. This is one such time to exercise courage, courage for a brighter future where LA county does not face a housing affordability crisis, where Metro has increased political will for projects from other community groups like Streets for All, and where we can realize the promise of a brighter future for all Angelinos.

For these reasons, I hope the board decides to reject Item 33 - for a potential brighter future for

all Angelinos.

Thank you,
Nathan Schilling

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. This is a great project and if there are opportunities to speed this up (and the K-line Northern Extension) we should absolutely pursue them. I also look forward to seeing more automatic trains with world-class runtimes added throughout the Metro system.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. Los Angeles is facing a historic, self-inflicted housing crisis that is particularly affecting young families and homeowners like me. Opposing SB-79 is irresponsible, backwards, and embarrassing. We need more dense housing around transit, and Metro of all organizations should support that goal.

Thank you,
Kiersten Stanley

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,

Josh Graybill

I live right by the Expo/Sepulveda Station, so SB-79 would have a huge impact on where I live and I FULLY support the changes it will bring. My life has changed and benefited immensely from living near a Metro station. I want as many people as possible to benefit from all the good living near a Metro station can bring them.

SB-79 makes that possible.

Thank you,

Dear Metro Board,

I support Item 10 - please support Metro staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. As a physician working at UCLA Health in Westwood, this project would have a direct positive impact on my ability to use Metro rail transit to get to work, would provide additional high-speed, high-reliability options to all of UCLA Health's staff, and **most importantly would make our offices and hospital more accessible to patients from downtown (via the D line extension), to the west side, to the valley.**

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

Dear Honorable Metro Board,

My name is Lori Smalling and I am writing to express my SUPPORT for Supervisor Mitchell's motion to place the C/K Line Extension to Torrance on HAWTHORNE BOULEVARD. NOT the hybrid ROW.

My townhome complex is adjacent to the tracks. It will affect our livelihood, which my husband and I have worked so hard to build. It is not fair to all the residents who live along the track to disrupt their quality of life, especially since the cost of living here in California is so high which make every dollar we make and spend on living is the South Bay so precious.

Not only that , the Final EIR should not be certified because it does not show the true cost of the project by including the removal and relocation of the 7 gas pipelines underneath the ROW.

The ROW is not wide enough to accommodate a freight train and two light rail tracks. Significant and unavoidable impacts that will be permanent.

Community support is behind Hawthorne, NOT the hybrid ROW. Metro polls showing otherwise are skewed and were based on faulty premises.

Please respect the people who have built their lives to live in the community put the Extension on HAWTHORNE NOT ROW!

Sincerely,
Lori Smallin
North Redondo Beach Resident

To the LA County Metro Board,

As a resident of Los Angeles County, frequent commuter of SoCal, and advocate of improving public transit, I urge you all to consider the following:

> **Item 11:** As a Los Angeles County resident who relies on and strongly supports the expansion of public transit, I support Item 11 and strongly oppose the last-minute attempt in Item 11.1 to derail the C Line Extension to Torrance by giving in to NIMBY pressure. Metro already owns the right-of-way, and shifting course now would delay this long-needed project for years, add roughly $700 million in costs, and ultimately reduce ridership. Please follow staff's recommendation and vote **no**on Item 11.1.
>
> **Item 10:** I support Item 10 and urge you to approve staff's recommendation for the Modified Alternative 5 route for the Sepulveda Transit Corridor. This project is essential for improving mobility, reducing congestion, and connecting communities across Los Angeles County.
>
> **Item 33:** I oppose Item 33. SB-79 is the law in California, and asking for an exemption for Los Angeles County sends the wrong message at a time when we should be encouraging smart growth around transit. Embracing SB-79 and allowing more housing near Metro stations would strengthen our transit system by increasing ridership and making these investments work better for the people who depend on them.

I sincerely look forward to seeing you all do what is in the best interest of all residents and workers in LA County. Thank you for your consideration.

Very Respectfully,

Tom Rodriguez

to the board clerk et al:
We are Phil & Sandy Ives and we live immediately adjacent to the ROW in Redondo beach as we have for decades. We beg you to oppose building the C-Line extension down the ROW and disrupting our home life for the rest of our lives. Please carefully consider the lives of truly local citizens over that of the professional transportation advocates who don't have to live through the pain of greatly increased noise, 5-10 years of construction (and problems therewith), a vibrating house every 5 minutes, and all the other unavoidable problems that come with this project. Building the extension down Hawthorne Blvd would relieve most of these problems for local residents, but of course not building the extension would save billions of taxpayer dollars and eliminate all the problems.
Thank you in advance for considering the locals,
Phil & Sandy Ives

Dear Board Clerk,

Please accept and count my written comment in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.
My name is Craig St John , President of Westwood Building Materials a ROW stakeholder at 15708 Inglewood Ave in Lawndale.

Our business is on the corner of Inglewood Ave, and Manhattan Beach Blvd. While I appreciate Metro's willingness to minimize the impact of our business from the C-Line extension, I have serious concerns about using the ROW option.

The ROW Hybrid option would cause drastic disruption to not only our business but to ALL commuters coming and going from the beach cities during construction. Inglewood Ave is a major artery and having it torn up and lanes blocked will send ripples all throughout the entire So Bay for the entire construction period.

I also have major concerns with the numerous fuel lines that run at the back of our property along the ROW. Some of these lines deliver fuel directly to the LAX airport. What is going to be the impact to traveling out of LAX when you have disruptions to fuel delivery from years of construction?

Metro claims that they will move these fuel line seems like disaster in waiting. Many of these lines have been underground for over forty years and it will not take much for one to break and cause a huge environmental disaster.

I'm in support for the Hawthorne Blvd route. I feel with the numerous amounts of new housing complexes that are planned along Hawthorne Blvd the residence of these proposed new projects would be better served by stations along Hawthorne. This would also help revive the business climate along

Hawthorne by bringing in some new business. I can see more ridership if there were a stops for Del Amo Mall, Old Town Center and the So Bay Galleria.

Thank you for your attention to this matter.

Craig St John

Dear Board Clerk,

Please accept and count my written comment in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for the C-Line extension to Torrance.
My name is Doug Boswell, a Redondo Beach ROW stakeholder living on 182nd Street near the crossing there.

My home is 70 yards from the Right of Way on 182nd St which will be trenched. The ROW Hybrid option would clearly be a serious health risk to myself and my wife as senior citizens, during the 8 years of expected construction, churning up all manner of toxic substances, such as arsenic and metals, not to mention the dust and dirt kicked up as fine particulate material to damage our lungs.

The freight trains carrying as many as 40 tanker cars of highly explosive liquified petroleum gas, as well as the 7 underground fuel pipelines would be at risk of a major disaster should something go wrong on the tracks… and adding 2 rail lines for passenger service only raises the odds of a derailment that sets off an explosion… of course, the electrified Metro cars themselves bring a match to this house of straw.

This is a serious matter of public safety… beyond the obvious benefits of an elevated Hawthorne Blvd route, which will have far more ridership being on a business district corridor of train rider destinations… but also in the close proximity of new and planned high density high-rise residential development. I have always wondered why the Metro folks can't see this as a no-brainer.

Sincerely,

Doug Boswell

Dear Board Clerk,
Please accept and count my written comment in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.
My name is Pamela Weber, a Redondo beach ROW stakeholder at 1921 Condon Ave.

My home backs up to the ROW located (under the 20' embankment, or at the Grant Ave bridge, etc).
The ROW Hybrid option would continue to be a serious risk to the unstable embankment with high pressure gas pipes only 12' from my home/bedroom. I have owned this home for over forty years and have always been concerned about the dangers of having a train in my backyard. Having two, and one with more activity, is a strain that would be difficult. The concept of a Metro train is something I support, but not in this capacity. It is important to bring the train to where the people are. The people are on Hawthorne Blvd, not in my backyard.

I support the Hawthorne route to improve (or revitalize) the business district and make it a more efficient way to bring people, and their dollars, to a new improved living and shopping center on Hawthorne and Artesia,

Thank you for your attention to this matter.

Pam Weber

Dear Board Clerk,
Please accept and count my written comment in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.
My name is Danny Patel, a Redondo Beach ROW stakeholder residing at 1730 Ruxton Lane, Redondo Beach, CA.

My home is 50 yards from the ROW (under the berm, trench zone, 20' embankment, or at the Grant Ave bridge, etc).

The ROW Hybrid option would _____ be a serious risk to _____ or high pressure fuel risks are too great or something else that's serious, emergency response, public safety... whatever you'd like to say.

I support the Hawthorne route to improve (or revitalize) the business district and make it a better destination (or that we would definitely use or however you want to put it)

Thank you for your attention to this matter.

Danny Patel

Dear Metro Board of Directors,

As a Redondo Beach resident and former Public Safety Commissioner, I urge you to approve the Hawthorne Boulevard alignment for the C Line Extension (Item 11.1).

The Hawthorne path is the most effective option for our region. It offers the highest ridership potential by placing transit within an established commercial corridor, directly supporting local businesses and the South Bay Galleria.

Crucially, this alignment also protects the sanctity of Pacific Crest Cemetery. My sister's 17-year-old son, who was tragically killed in a boating accident, is buried there directly along the Right-of-Way. For my sister and the many other families who visit their loved ones, the peace of this final resting place is sacred. Running light rail through the ROW would permanently disrupt that quiet and the grieving process for our community.

The Hawthorne Boulevard path is the best choice for riders, for the local economy, and for preserving the dignity of our neighborhoods. I respectfully ask for your vote in its favor.

Sincerely,
Anneke Blair

Dear Board Clerk,

Please accept and count my written comment in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.

My name is Phyllis Shoemaker, a 25 year North Redondo Beach resident and a 40 year South Bay resident.

My home is (1) mile from the ROW Grant Ave bridge. It is peaceful in North Redondo.

Most days I hear the infrequent train going down ROW while in my yard or have my windows open. Where we are is quiet. I can hear folks' conversations while they are walking in the neighborhood. I can't imagine living with the noise of three tracks running multiple trains on a regular schedule.

Living less than a mile away, the ROW Hybrid option would be a serious risk to our area due to high pressure fuel risks to us as well.

I support the Hawthorne Blvd. route as desirable in the long term future as an EASILY accessible on/off destination to our business district, malls, and medical facilities on Hawthorne Blvd. that would more attract ridership.

Metro's idea of dropping us at out of the way locations like Marine or Torrance and then having to get on a bus to backtrack to Hawthorne Blvd. is plainly ridiculous.

We have allowed them to do this in other areas for far too long. Let's not make this another Bullet Train debacle (which no one I know wanted).

Just because Metro already owns the ROW property does not make it the best plan for L.A. in the 21st century.

Let's do this right.

If it takes longer I am all for it.

Please be a voice for our future and place a common sense vote for the people who live here and would use it if it was effortless.
Please YES for the Hawthorne Blvd Option.

Thank you kindly for your attention to this important matter.

Sincerely,
Phyllis Shoemaker

Dear Board Clerk,

I am writing in support of Motion 11.1 Approving Hawthorne Blvd Alignment as the project LPA for C-Line extension to Torrance.

I'm a commuter, or I travel to the South Bay, Or I live in Gardena/Torrance/Palos Verdes/Santa Monica/Westside/Hollywood or wherever.

The elevated Hawthorne Bl option makes the most sense and I would love to use it and visit the business district/see a movie/shop/eat at one of the restaurants, work there, make it a better destination, or we would definitely use or however you want to put it.

Thank you.

Best,

Lisa Cherry

Dear Metro Board Members,

First, I want to acknowledge and thank Board Members Mitchell, Sandoval, Dupont-Walker, and Butts for their leadership, careful consideration, and willingness to engage thoughtfully on the merits and risks associated with the alignment decision.

Analytical Integrity and Independent Review

Beyond physical risk, the integrity of the underlying technical record itself warrants independent scrutiny. While staff and consultants have invested significant effort over many years, the Board ultimately bears responsibility for whether the analysis supporting certification is accurate, unbiased, and internally consistent.

Residents and independent professionals have identified material discrepancies in portions of the technical work. For example, in one instance, noise monitoring locations were documented as being positioned significantly different from the stated locations, including variances on the order of approximately ninety feet in one case and forty feet in another. These are not isolated issues; there are numerous additional discrepancies that cannot reasonably be cataloged within a single email and warrant independent verification. Measurement accuracy matters because these inputs directly affect modeled impact conclusions..

In addition, retired engineer Dr. Holly Osborne and retired aerospace engineer Ray Holler have raised multiple concerns regarding mathematical assumptions, engineering measurements, and analytical methodology within portions of the project materials. These are not casual critiques; they come from individuals with deep technical training who are accustomed to

precision, validation, and error checking.

When technical inputs contain unresolved discrepancies or unverified assumptions, the resulting conclusions inherit that uncertainty. Without an independent, neutral review lens, the Board risks certifying a record that embeds avoidable analytical weakness.

Regulatory Implication:

Certification based on disputed measurements or unresolved technical discrepancies materially increases vulnerability to regulatory challenge, audit scrutiny, post-certification credibility risk, and future exposure related to the reliability of engineering analyses, benefit calculations, forecasting assumptions, and the defensibility of projected performance outcomes.

Major capital agencies succeed when project decisions align with long-term fiscal sustainability, operational reliability, environmental responsibility, and public trust. When those pillars diverge, agencies inherit avoidable downstream risk: regulatory challenges, funding uncertainty, community opposition, and erosion of institutional credibility. These are precisely the risks this Board has consistently stated it seeks to avoid across all capital programs.

The Hawthorne Boulevard alignment offers a clear and responsible path that reduces exposure across all of these dimensions. It improves access to existing commercial centers and planned housing growth, avoids placing new rail infrastructure in immediate proximity to sensitive residential receptors, schools, hazardous freight activity, and pipeline infrastructure, minimizes displacement pressure and long-term community harm, and provides a more stable platform for delivery, funding confidence, operational resilience, and public acceptance. It is the alignment that demonstrably reduces risk while delivering greater public benefit.

This decision ultimately calls for setting aside any agendas, momentum, or external pressures and exercising the duty this Board was entrusted to uphold: protecting public safety, preserving community stability, maintaining fiscal discipline, and safeguarding institutional integrity. The Board's role is to choose the alignment that best serves the public interest, not the path of least resistance.

Summary of Key Risk Considerations for Board Review

- **Residential Displacement & Quality of Life:** Irreplaceable loss of stable homes during a severe housing shortage, long-term health stress impacts, and avoidable degradation of community stability.

- **Sensitive Receptors:** Elementary and high school located approximately one block

from the corridor were not meaningfully addressed in portions of the analysis.

- **Pipeline Integrity, Soil Uncertainty & Fuel Continuity:** Active pipeline infrastructure intersects with unresolved subsurface conditions. Torrance Refinery has indicated jet fuel distribution to LAX cannot be halted, scaling risk beyond the immediate corridor.

- **Liability, Health Risk Probability & Insurance Exposure:** Increased probability of injury, health impacts, property damage, long-tail claims, higher insurance premiums, underwriting scrutiny, and embedded institutional risk over decades of operation.

- **Catastrophic Emergency Response Constraints:** Emergency access concerns involve multi-system incident scenarios, not routine service disruptions, requiring complex multi-agency coordination under constrained physical conditions.

- **Unavoidable Freight–Commuter Co-Presence in Emergencies:** Operational separation cannot fully eliminate overlap during incidents, recovery, or service restoration, increasing consequence severity.

- **Analytical Integrity & Independent Review:** Documented discrepancies in measurement accuracy and engineering assumptions identified by qualified professionals raise record defensibility concerns.

- **Governance & Regulatory Exposure:** Elevated vulnerability to regulatory scrutiny, audit review, post-certification challenge, future engineering reliability concerns, benefit modeling defensibility, and institutional credibility risk.

If this Board certifies the Hybrid ROW alignment, it places itself, starting today and well into the future, in a position of deep public distrust, heightened regulatory scrutiny, and escalating legal, operational, and financial exposure. These risks are not theoretical. They flow directly from choosing a higher-impact alignment when a demonstrably safer, lower-risk, and publicly supported alternative exists. Here, I am stating only a few of the numerous specifics.

At least three municipalities and their residents have formally urged selection of the Hawthorne Boulevard alignment. A fourth now joins that majority, based on clear, documented safety, environmental, operational, and community reasons. All of these positions were developed without the use of privately funded public relations campaigns or paid messaging. They reflect genuine community analysis and public-interest judgment, not manufactured outreach.

Importantly, the Mitchell-Sandoval-Dupont Walker motion recognizes the practical advantages of the Hawthorne Boulevard alignment, including stronger access to existing businesses, retail corridors, and regional destinations, as well as compatibility with planned growth such as the more than 600 housing units proposed within the South Bay Galleria

improvement plans. These are concrete land use and mobility benefits that support ridership, economic vitality, and long-term system value.

The human dimension of this decision cannot be minimized. The fear and housing insecurity associated with displacing even a single residential family matters, especially in today's severe housing shortage. For many residents, relocation does not mean simply finding another equivalent home. It often means losing an affordable, stable sanctuary that cannot realistically be replaced in the current market, even with assistance. The resulting long-term health consequences, loss of stability, erosion of community ties, and degradation of overall quality of life carry lasting social and human costs.

At the first re-established C-Line community meeting, following a period in which the project had been effectively dormant, a resident suffered a medical emergency. That moment underscored the real and immediate stress this process has placed on people's health and well-being.

Many individuals continue to live with ongoing fear related to displacement, safety, and long-term stability, while also confronting the significant and unavoidable impacts identified in the environmental reports. Importantly, these impacts are in fact avoidable through selection of a lower-risk alignment. These impacts are not abstract. They are already occurring.

While acquisition of commercial or industrial properties may be mitigated through established business relocation and startup assistance programs, residential displacement is fundamentally different. Homes are not interchangeable assets. Families do not simply relocate a sanctuary, social fabric, affordability, and stability in the same way a business relocates operations. Treating these impacts as comparable understates the human cost.

Beyond displacement and stress, the Hybrid ROW introduces avoidable safety and infrastructure risk. The corridor contains active pipeline infrastructure that requires long-term integrity protection, coordination, and ongoing monitoring. Any relocation, reinforcement, padding, or protective measures still intersect with subsurface conditions that have not yet been fully characterized for long-term soil integrity and cumulative disturbance risk.

The Torrance Refinery has indicated that continuous jet fuel distribution to Los Angeles International Airport cannot be halted. Any disruption, sequencing conflict, or integrity issue therefore carries implications that extend far beyond the immediate corridor, affecting regional transportation reliability and broader economic activity tied to LAX operations. These risks are not confined to a single neighborhood; they scale regionally and nationally.

An elementary school and a high school in Lawndale are located approximately one block from the corridor. These sensitive receptors were not meaningfully addressed in portions of the project's analysis, despite their obvious relevance to safety, exposure, and community protection. Overlooking nearby schools in proximity to expanded rail and freight activity

elevates both public concern and regulatory vulnerability.

In addition, the Hybrid ROW materially increases long-term liability, insurance exposure, and institutional risk. Co-locating commuter rail with hazardous freight operations, pipeline infrastructure, dense residential receptors, and nearby schools increases the probability of injury related to health impacts, property damage, and cascading claims over the life of the system are a mere few mentioned. These risks persist for decades across operations, maintenance, emergency response, and unforeseen incidents.

Emergency access considerations here are not about routine daily service disruptions or minor incidents. Considerations of catastrophic and multi-system scenarios such as derailments, pipeline integrity failures, hazardous material releases, and compounded infrastructure events requiring rapid multi-agency access, evacuation coordination, and sustained incident command under constrained physical conditions.

While operational plans contemplate spatial and temporal separation between freight and commuter activity, real-world emergency conditions inevitably create circumstances where freight movement and commuter operations overlap or converge during incidents, recovery operations, or service restoration. This co-presence cannot be fully eliminated in practice and increases both complexity and consequence severity.

From an institutional perspective, these conditions translate directly into higher long-term insurance premiums, underwriting scrutiny, claims exposure, litigation risk, and reputational vulnerability. These liabilities become embedded in Metro's operating risk profile and compound over time.

I respectfully urge the Board to advance the Hawthorne Boulevard alignment and to choose the option that reduces harm, protects residents, strengthens public trust, and positions Metro for durable long-term success.

Regarding Board of Directors meeting Agenda Item 11.1: C Line Extension to Torrance, **please support the motion for the Hawthorne Option**.

I am Ray Hollar, Lawndale homeowner for almost 40 years.

The Hawthorne option would be built above a noisy commercial area, where the Red Car street car used to run, while the Hybrid ROW trains would be built in my quiet residential neighborhood, with tracks located about 100 feet from my home of almost 40 years.

The Hawthorne option would take 15 months less to build than the Hybrid ROW trains. That means less disruption to the Lawndale community, less construction pollution which Metro staff says is "significant and unavoidable."

The Metro staff's weekday ridership forecast (project trips, which includes all users of the two new stations) of the Hawthorne option is 15,648 while the forecast of the Hybrid ROW is 11,579, so the Hawthorne option would produce 35% more project trips than Hybrid ROW. Since Metro staff wrote, "As more people switch to transit, fewer vehicles are observed on the highway, thus reducing overall Vehicle Miles Traveled (VMT),"** the Hawthorne option would better reduce congestion and air pollution, the desired **environmental impacts**.

There are many other reasons to favor the Hawthorne Option, but these are the most important to me.

Please support the Hawthorne Option motion.

Good morning,

I would like to express my support for Item 10, specifically selecting Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor Project. Choosing this alternative will have numerous benefits for the entire L.A. region, and I urge the Board to prioritize the best alternative for one of the most important transportation projects in recent history. Alternative 5 will ensure fast, frequent, reliable transit connecting the Westside and Valley, with automated trains and better connections to the Metro G line, Metro ESFV Project, as well as Metrolink and the Pacific Surfliner.

Additionally, I would like to express my support for the approval of the Hybrid Alignment LPA for Item 11. I urge the board to reject Motion 11.1 by Director Mitchell to advance the Hawthorne Alignment. The Hawthorne alignment is far more expensive, and does not utilize the existing Right-Of-Way that Metro already owns. Selecting the Hybrid Alignment will ensure the South Bay gets the transit it deserves, utilizing existing freight corridors while using state-of-the-art safety technologies. Selecting the Hawthorne Alignment will lead to a large budget deficit and further delay the project with billions of missing funding. Therefore, I urge the Board to approve the Hybrid Alignment and advance the C/K Line Southern Extension.

Thank you for the opportunity to comment.

Good morning,

I would like to express my support for Item 10, specifically selecting Modified Alternative 5 as the Locally Preferred Alternative (LPA) for the Sepulveda Transit Corridor Project. Choosing this alternative will have numerous benefits for the entire L.A. region, and I urge the Board to prioritize the best alternative for one of the most important transportation projects in recent history. Alternative 5 will ensure fast, frequent, reliable transit connecting the Westside and Valley, with automated trains and better connections to the Metro G line, Metro ESFV Project, as well as Metrolink and the Pacific Surfliner.

Additionally, I would like to express my support for the approval of the Hybrid Alignment LPA for Item 11. I urge the board to reject Motion 11.1 by Director Mitchell to advance the Hawthorne Alignment. The Hawthorne alignment is far more expensive, and does not utilize the existing Right-Of-Way that Metro already owns. Selecting the Hybrid Alignment will ensure the South Bay gets the transit it deserves, utilizing existing freight corridors while using state-of-the-art safety technologies. Selecting the Hawthorne Alignment will lead to a large budget deficit and further delay the project with billions of missing funding. Therefore, I urge the Board to approve the Hybrid Alignment and advance the C/K Line Southern Extension.

Thank you for the opportunity to comment.

Hello Metro Board,

For item # 2025-1062, though I was and still am in favor of Alt 4, if that is not an option I am For the proposal in order to support high quality, high capacity transit between the valley and the Westside.

For item # 2025-0818, I am For it as well in order to further expand transit to the South Bay and set the stage to expand the line to Long Beach.

For item # 2026-0037, I am Against it, as the Hawthorne option will likely come with so many construction difficulties that it will potentially jeopardize the project.

For item # 2025-0985, I am For it, in order to further support the financing of Measure M programs.

For item # 2026-0035 I am For this proposal as well, as reforming the LA Metro Board to better reflect the Counties overall transit needs as opposed to the concerns of a few NIMBY's is a must.

For item # 2025-1028, I am For this proposal as well, in order to ensure Phase 2B2 of the A Line Extension to Montclair is achieved.

For item # 2025-1081, I am For this proposal as it will expand access and public participation in transit governance in critical and necessary ways.

For item # 2025-1033, I am For the proposal in order to ensure a diversity high quality transit information and travel systems for the benefit of riders.

For item # 2025-1053, I am Against the measure, as the measure is a futile attempt at avoiding necessary housing improvement the City's and County desperately need.

Thank you so much,
Oliver Mather

January 21, 2026

Subject: 1/22/26 Board Meeting, Item 33 from Executive Management Committee: Oppose

Dear Metro Board Members,

As supporters of both SB 79 and SB 677, we write to express our **strong opposition to item 33** brought to the board by the Executive Management Committee, which recommends that Los Angeles Metro oppose SB 677 unless amended. The lack of

alignment across California between high-capacity transit investments and housing density is exacerbating our housing crisis, driving carbon emissions, threatening the sustainability of our transit agencies by limiting ridership, and preventing equitable access to public transportation. SB 79 addresses these linked policy crises by raising the floor on the types of housing that are permitted within very close proximity to the state's highest-capacity transit stops, including LA Metro's rail and Bus Rapid Transit lines.

In his signing statement for SB 79, Governor Newsom said the following: "For too long, California has poured billions into transit without building the housing density needed for those systems to meet their potential. SB 79 helps change that by focusing more homes near rail stations – boosting ridership, cutting traffic and pollution, lower household costs, and expanding access to jobs, schools, and services."

Metro should be commended for moving forward the most ambitious expansion of transit in the country. So too does the agency deserve praise for its Joint Development Program, which our organizations strongly support. But the Joint Development Program cannot, on its own, come anywhere close to meeting the need for housing near Metro stations. The Joint Development Program must be complemented by robust housing development on private land. Unfortunately, local governments have not adopted flexible enough zoning regulations to meet housing needs near transit, particularly in high opportunity areas. That is why SB 79 is so necessary.

We respect the intent of trying to shield the delivery of transit from the tricky and contentious politics of housing but the Metro staff report's recommendation to exempt or delay implementation in LA County is a total non-starter, and would have a tremendously negative impact on Metro's own riders. As staff note, LA's ridership is overwhelmingly low-income and transit-dependent. Blocking SB 79 in LA County would prevent many of these riders from living within walking distance of transit, increasing commute times and creating additional hardship for a vulnerable population. Delaying effectuation until transit stations are in service is also antithetical to the goal of increasing access to transit. Housing development is a time-intensive process. If our region has chosen to spend billions of dollars on a major transit project, and selected an alignment through a public process, we should be building housing near those stations in anticipation of their arrival.

SB 79 is a vital tool to support transit ridership and access, not undermine it. As such, Metro should be looking for opportunities to embrace the policy rather than block its implementation. We welcome opportunities to engage with Metro on ways to clarify SB 79's intent, via SB 677. But opposing SB 677 unless it guts SB 79's implementation in LA County is unserious and would move us backward as a region. Please reject the

Executive Management Committee recommendation drafted by staff and instead engage with the author and sponsors of SB 677 on constructive changes that clarify the law's intent and make it easier to implement.

To the Metro Board:

I am the author of the book *The Lost Subways of North America*, and have lectured on transit-oriented development in dozens of cities across the country. I urge you to reject the staff recommendation on Item 33. The current iteration of SB677 consists of uncontroversial technical cleanup to the SB79, the Governor's major rezoning bill from last year which legalizes apartment buildings near transit.

The staff's recommendation - oppose SB677, because SB79 should be repealed for Los Angeles - is completely wrong. Transit and dense housing go together like chips and salsa. One is not truly complete without the other. In claiming that SB79 makes it harder to build new transit, the staff forget the lessons of the Green Line construction in the 1990s: building high capacity transit infrastructure without dense land use is a recipe for empty trains and buses.

Sincerely,

Jake Berman

Dear Metro -

I am writing to strongly oppose the staff report for item 33!

SB79 is *critical* for both housing and transit here in Los Angeles!

I have visited Seoul and Paris this year and had a chance to see what density + transit can mean for the life of a city! For a transit acency to oppose SB79 is frankly madness, please please reconsider.

To the Metro Board-

About Item #11 on Thursday's meeting on Jan 22, 2026, I am writing this email to provide support FOR the C Line Extension to the Torrance Project. This line that will be named as the K Line is an extension project that will support many residents' abilities to access more areas within the South Bay more easily and efficiently, removing many transportation barriers to getting to Redondo and Torrance without an automobile.

I urge the board to move forward with approving the project and helping residents increase accessibility.

Furthermore, concerning item 33 on the agenda, I am in support FOR the SB 677 adoption and urge the board to APPROVE the adoption of the SB in order to provide some clarity on how to move forward with housing development around transit zones. Thank you!

Hello,

I'm a resident of Los Angeles County who frequently uses Metro trains. I've recently learned that Metro is pushing to have LA County be exempt from SB79, and I cannot emphasize enough my confusion at this. SB79 would highly benefit Metro, increasing ridership and in turn, bringing very needed funds in (especially as the Trump administration currently withholds federal funding). The only reason I can see to oppose SB79 is to appease a vocal minority that doesn't want dense housing built in their neighborhoods.

And if that's the case, I find it incredibly disheartening that Metro would prioritize the wants of a small number of individuals over the needs of the greater community of Los Angeles. This city is in a housing crisis. The demand for housing is only sky-rocketing with very little increase in supply, which will continue to fuel rent inflation.

It's also currently hard to find housing near Metro stations. Many Metro stations are surrounded by single-family units and industrial complexes, which makes options very limited for those who rely on public transit (and those who want to rely on public transit). With endless traffic, constant smog, and the greater threat of climate change, I have to hope it would be a priority of Metro to work for an LA that relies less on cars. And objecting high-density housing by Metro stations does only the opposite.

I really hope the Metro Board will reconsider and support SB79.

Thank you,
Joseph Cherbonnier

Hello:

It goes without saying that we are in a housing and affordability crisis in this city, not to mention a climate disaster that we've seen is all too real for us in the region. SB79 goes a long way to not only build the dense housing that we desperately need, but also to do it near transit so we can stop the car reliance that takes hundreds of dollars from us every month. This is an environmental issue, and it is for the future of our city. If you care about our city and our region, you will support SB79 as it is and start building the housing and transit we are asking for!

Thank you,
Garry

Hello Metro Board,

I am writing with a public comment on file # 2025-1053, Item 33. I am shocked and appalled to see discussion that Metro staff is encouraging Metro to publicly oppose SB79, a bill (already passed) that will help transform California housing and help build badly needed homes and lower housing costs for all. It is baffling that Metro, an agency FOCUSED ON TRANSIT, would try to push the state to repeal a law that will make it easier for HOUSING TO BE BUILT ON TRANSIT LINES. SB79 is a win-win for Metro: it will encourage more ridership (by placing more residents on bus/transit lines) and help lower costs for Metro employees (who are burdened, like many other renters in Los Angeles, by high housing costs and long commutes).

Los Angeles's leadership has taken shameful and self-sabotaging attitudes towards SB79, from the mayor's office through City Council. It is deeply embarrassing to see Metro staff recommend Metro do the same. I encourage the Metro board to strongly oppose the staff recommendation in Item 33. If they sign off on this recommendation, the Metro board should be immediately replaced with members who understand the double urgency of tackling transit and housing issues together. Metro should be a leading advocate for expanding housing on transit lines. If the board takes up the staff recommendation, they have truly failed Metro's mission.

To the Board,

I would like to express my support for building LPA 5 in the Sepulveda Transit corridor. As a daily rider of various Metro Rail lines and someone who used to commute through this corridor every work day, I understand how important this route through the mountains is to my neighbors. We owe it to our city and region's future to build the highest capacity and most sustainable infrastructure we can. The LPA 5 is that route. Please approve it.

Also I would like to encourage the board to vote in favor of the C (Now K) Line Extension using the hybrid alignment rather than the one along Hawthorne Blvd. Metro already owns the land for the hybrid alignment making this route cheaper. It connects to an existing transit center and it provides rail to the South Bay cheaper and probably sooner. The alignment along Hawthorne requires more complicated and expensive construction, a complicated interaction with CalTrans, and because of this it will take longer and be significantly more expensive. The South Bay deserves better.

Lastly I'm disappointed that the board is trying to get LA excused from its obligations under SB79. Having just purchased a condo in LA I am of the opinion that we have a massive shortage of housing here and this has driven rent and house prices through the roof. My wife and I are very privileged that we were able to afford this and I wish that extreme privilege wasn't required to live here comfortably. I love it here. I want more people to be able to live here. Please drop your opposition to this law and do everything you can to help LA County make it successful.

Thank you for your time,
-Alex Waggoner

Hello,

I would like to voice my support for the Hybrid LPA for the South Bay extension project. I believe the detractors for this project are acting in BAD faith, and do not want any line at all. The hawthorne option will cost more and take longer to build, it does not make sense. Use metro's hybrid right of way please!!!

I also do not support any restriction ot watering down of SB79. The city is in a housing crisis, with a clear lack of housing supply. I know many young talented bright individuals in this city who cannot afford a home. Do not destroy their American Dream!!!

Thank you,

Hello,

My name is Diego Celaya. I live in Culver City. I have been without a car for about a year. The LA transit system has made it so I can get around to certain places when I need to. The system is decent but could be so much better.

The K line should definitely be extended to Torrance. The route follows an existing rail line. It would help people to travel easier and make parts of the city better connected.

The Sepulveda line should definitely be Alt 5.

And do not change or water down anything about SB79. It will revitalize our city.

Thank you,
Diego

Dear LA Metro Board Clerk,

I stand with Abundant Housing LA to express my strong opposition to item 33 brought to the board by the Executive Management Committee, which recommends that Los Angeles Metro oppose SB 677 unless amended.

The lack of alignment across California between high-capacity transit investments and housing density is exacerbating our housing crisis, driving carbon emissions, threatening the sustainability of our transit agencies by limiting ridership, and preventing equitable access to public transportation. SB 79 addresses these linked policy crises by raising the floor on the types of housing that are permitted within very close proximity to the state's highest-capacity transit stops, including LA Metro's rail and Bus Rapid Transit lines.

In his signing statement for SB 79, Governor Newsom said the following: "For too long, California has poured billions into transit without building the housing density needed for those systems to meet their potential. SB 79 helps change that by focusing more homes near rail stations – boosting ridership, cutting traffic and pollution, lower household costs, and expanding access to jobs, schools, and services."

Metro should be commended for moving forward the most ambitious expansion of transit in the country. So too does the agency deserve praise for its Joint Development Program, which our organizations strongly support. But the Joint Development Program cannot on its own come anywhere close to meeting the need for housing near Metro stations. The Joint Development Program must be complemented by robust housing development on private land. Unfortunately, local governments have not adopted flexible enough zoning regulations to meet housing needs near transit, particularly in high opportunity areas. That is why SB 79 is so necessary.

The Metro staff report's recommendation to exempt or delay implementation in LA County is a total non-starter, and would have a tremendously negative impact on Metro's own riders. As staff note, LA's ridership is overwhelmingly low-income and transit-dependent. Blocking SB 79 in LA County would prevent many of these riders from living within walking distance of transit, increasing commute times and creating additional hardship for a vulnerable population. Delaying effectuation until transit stations are in service is also antithetical to the goal of increasing access to transit. Housing development is a time-intensive process. If our region has chosen to spend billions of dollars on a major transit project, and selected an alignment through a public process, we should be building housing near those stations in anticipation of their arrival.

SB 79 is a vital tool to support transit ridership and access, not undermine it. As such, Metro should be looking for opportunities to embrace the policy rather than block its implementation. I would welcome Metro engaging with the author and sponsors of SB 677 on ways to clarify SB 79's intent. But opposing SB 677 unless it guts SB 79's implementation in LA County is unserious and would move us backward as a region. Please reject the Executive Management Committee recommendation drafted by staff and instead engage with the author and sponsors of SB 677 on constructive changes that clarify the law's intent and make it easier to implement.

Sincerely,
Alejandra Ponce de Leon

Hello,

I'd like to write in support of the following items for the board meeting this week:

1. The Hybrid alignment for the K Line south extension will provide fantastic transit access to the South Bay at a reasonable cost. Killing this project or burdening it with extra costs would be a disaster for the region. Please keep this project moving forward!

2. The hybrid Alt 5 routing for the Sepulveda line looks great, please move this project forward!

3. SB79 provides much-needed housing for the region, please end your opposition to this fantastic bill.

Thank you very much for your consideration,
Daniel

Dear LA Metro Board Clerk,

I stand with Abundant Housing LA to express my strong opposition to item 33 brought to the board by the Executive Management Committee, which recommends that Los Angeles Metro oppose SB 677 unless amended.

It is a disgrace for a PUBLIC TRANSIT AGENCY to reject this bill. The lack of alignment across California between high-capacity transit investments and housing density is exacerbating our housing crisis, driving carbon emissions, threatening the sustainability of our transit agencies by limiting ridership, and preventing equitable access to public transportation. SB 79 addresses these linked policy crises by raising the floor on the types of housing that are permitted within very close proximity to the state's highest-capacity transit stops, including LA Metro's rail and Bus Rapid Transit lines.

In his signing statement for SB 79, Governor Newsom said the following: "For too long, California has poured billions into transit without building the housing density needed for those systems to meet their potential. SB 79 helps change that by focusing more homes near rail stations – boosting ridership, cutting traffic and pollution, lower household costs, and expanding access to jobs, schools, and services."

Metro should be commended for moving forward the most ambitious expansion of transit in the country. So too does the agency deserve praise for its Joint Development Program, which our organizations strongly support. But the Joint Development Program cannot on its own come anywhere close to meeting the need for housing near Metro stations. The Joint Development Program must be complemented by robust housing development on private land. Unfortunately, local governments have not adopted flexible enough zoning regulations to meet housing needs near transit, particularly in high opportunity areas. That is why SB 79 is so necessary.

The Metro staff report's recommendation to exempt or delay implementation in LA County is a total non-starter, and would have a tremendously negative impact on Metro's own riders. As staff note, LA's ridership is overwhelmingly low-income and transit-dependent. Blocking SB 79 in LA County would prevent many of these riders from living within walking distance of transit, increasing commute times and creating additional hardship for a vulnerable population. Delaying effectuation until transit stations are in service is also antithetical to the goal of increasing access to transit. Housing development is a time-intensive process. As for Item 33, I want to add that SB 79 will generate revenue badly needed by Metro. If we don't want to end up like other transit agencies around the nation that are facing fiscal cliffs, we need new revenue and ridership drivers. SB 79-enabled housing will greatly boost Metro's position.

> I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to a vocal few. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support the majority of South Bay people, and the staff's recommendation, and vote no on 11.1. As I said before, as someone who works in aerospace, this project will be crucial to connecting job centers for such an important industry of LA to the rest of LA, enabling opportunities for people who work in aerospace and live around LA, who want to work in the South Bay's important aerospace industry. It is of national importance that this project gets going ASAP, due to these jobs in the area.
>
> I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.
>
> I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. I recognize that there are concerns about voices opposed to housing that will now be opposed to transit, but I guarantee you, the same people against housing are already basically the same people opposed to transit projects.

Dear Metro Board,

I am writing to voice my opinions on some of the items at the upcoming Metro Board meeting this Thursday. I was born and grew up in Los Angeles and am currently a City Planning student at Cal Poly San Luis Obispo.

I support Item 10. The Modified Alternative 5 for the Sepulveda Transit Corridor is a great alternative for what may become the most important line in our entire network. The staff were right to recommend this alternative.

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance. To pass item 11.1 would be to cave to a small group of loud opponents who do not actually reflect public opinion about our public transit. Metro already owns the ROW; we should avoid delaying the project by years and spending hundreds of millions of more dollars. Please support staff's recommendation, and vote no on 11.1.

Finally, I oppose Item 33. SB 79 is the law in California, to ask for an exemption is ridiculous and will limit us from creating more housing around transit stops which will increase ridership and ease the housing crisis.

Thank you for your consideration,
Owen Taylor

Dear Board Members,

I am writing to urge you NOT to oppose SB 79, regardless of any amendment. This is a hugely important bill, which will go a long way toward making Los Angeles a much more livable city, and the efforts to undermine it are frankly embarrassing.

This is the second-largest city in the country, and it's been treated like one giant suburb for far too long. Upzoning near the transit we *do* have is a small but necessary step in weaning this city off its disgusting and dangerous car dependency, and it's about time we did the right thing regardless of the NIMBYs.

Sincerely,
Matt Monson

Dear LA Metro Board,

I am writing to express my full support for the Hybrid LPA alignment for the C Line. The proposed right of way already exists and already includes an active rail corridor, making it the most cost-effective option and, by a significant margin, the quickest to construct. This alignment reflects years of careful planning and collaboration. I respectfully urge you not to undo the substantial progress that has already been made or delay the construction.

In addition, I respectfully request that you initiate the FEIR for the modified LPA of the S Line as soon as possible. There is no clear justification for additional delays or for increasing project costs when a viable and well-vetted option is already available.

Finally, I strongly encourage you to adopt SB79 as written, without modifications or dilution. SB79 is a critical tool for enabling the transit-oriented development necessary to address our ongoing housing challenges and to significantly improve the effectiveness and ridership of the Metro system. Weakening this legislation would undermine its purpose and the broader regional benefits it is intended to deliver.

Please see our attached letter signed by our friends and community members who will be unable to come to the meeting but still wish for their voices to be counted.

Thank you for your time and consideration,

-Friends of LA Metro

Hello Metro Board,

For item # 2025-1062, though I was and still am in favor of Alt 4, if that is not an option I am For the proposal in order to support high quality, high capacity transit between the valley and the Westside.

For item # 2025-0818, I am For it as well in order to further expand transit to the South Bay and set the stage to expand the line to Long Beach.

For item # 2026-0037, I am Against it, as the Hawthorne option will likely come with so many construction difficulties that it will potentially jeopardize the project.

For item # 2025-0985, I am For it, in order to further support the financing of Measure M programs.

For item # 2026-0035 I am For this proposal as well, as reforming the LA Metro Board to better reflect the Counties overall transit needs as opposed to the concerns of a few NIMBY's is a must.

For item # 2025-1028, I am For this proposal as well, in order to ensure Phase 2B2 of the A Line Extension to Montclair is achieved.

For item # 2025-1081, I am For this proposal as it will expand access and public participation in transit governance in critical and necessary ways.

For item # 2025-1033, I am For the proposal in order to ensure a diversity high quality transit information and travel systems for the benefit of riders.

For item # 2025-1053, I am Against the measure, as the measure is a futile attempt at avoiding necessary housing improvement the City's and County desperately need.

Thank you so much,
Oliver Mather

Hello Metro Board,

For item # 2025-1062, though I was and still am in favor of Alt 4, if that is not an option I am For the proposal in order to support high quality, high capacity transit between the valley and the Westside.

For item # 2025-0818, I am For it as well in order to further expand transit to the South Bay and set the stage to expand the line to Long Beach.

For item # 2026-0037, I am Against it, as the Hawthorne option will likely come with so many construction difficulties that it will potentially jeopardize the project.

For item # 2025-0985, I am For it, in order to further support the financing of Measure M programs.

For item # 2026-0035 I am For this proposal as well, as reforming the LA Metro Board to better reflect the Counties overall transit needs as opposed to the concerns of a few NIMBY's is a must.

For item # 2025-1028, I am For this proposal as well, in order to ensure Phase 2B2 of the A Line Extension to Montclair is achieved.

For item # 2025-1081, I am For this proposal as it will expand access and public participation in transit governance in critical and necessary ways.

For item # 2025-1033, I am For the proposal in order to ensure a diversity high quality transit information and travel systems for the benefit of riders.

For item # 2025-1053, I am Against the measure, as the measure is a futile attempt at avoiding necessary housing improvement the City's and County desperately need.

Thank you so much.

From: Yonah Gereboff
To: Board Clerk

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,
Yonah Gereboff

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBYs, the majority of whom have not read the report. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 11. The LPA is a good compromise between local interests and transit rider interests. It gets us what we need in a not unreasonable amount of time and for significantly lower cost.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. The automated heavy rail technology in this proposal has the potential to cause a modal shift in the region, getting a significant number of people out of their cars and greatly reducing traffic on the 405. We need this project to tie the region together.

I oppose Item 33. I campaigned in support of SB-79. I find it appalling that the metro board has decided to act with cowardice on this issue. Metro claims to be already building housing - plans are for 10,000 units. This is comically low. We need at least 100,000 or 1,000,000 units in Metro's jurisdiction to address the crushing housing affordability crisis we face in LA county. SB-79 empowers state and county officials to make those sweeping, necessary changes. Metro staff are concerned that SB-79 interferes with, or in some cases destroys, local partnerships that Metro builds to get transit projects done. This is a valid concern, but I think Metro board members fail to grasp that new partnerships can be forged; such as with community groups who support transit AND housing.

Instead of looking to the future, board members seem fixated on the past in this case; past community groups and past supporters. In dark times such as these, given the reckless actions of the current presidential administration, courage can be hard to find. But courage is like a muscle; the more you use it, the stronger it gets. This is one such time to exercise courage, courage for a brighter future where LA county does not face a housing affordability crisis, where Metro has increased political will for projects from other community groups like Streets for All, and where we can realize the promise of a brighter future for all Angelinos.

For these reasons, I hope the board decides to reject Item 33 - for a potential brighter future for

all Angelinos.

Thank you,
Nathan Schilling

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. Alternative 5 will be extremely important for commuters getting from the valley to the westside and those working at UCLA, one of the largest employers in LA county.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. Metro has a lot to gain from SB-79, both on current existing transit lines and future lines. Letting the fear of dense housing near transit stations dictate decisions is a losing strategy, please follow SB-79.

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system.

Thank you,
Matthew Litwiller

Dear Metro Board:

I support Item 11 and oppose the last minute attempt (Item 11.1) to derail the C Line Extension to Torrance by caving to NIMBY pressure. Metro already owns the ROW, and we should not delay the project by years and spend an extra $700M to get worse ridership! Please support staff's recommendation, and vote no on 11.1.

I support Item 10 - please support staff's recommendation on the Modified Alternative 5 route for the Sepulveda Transit Corridor. This is a great project and if there are opportunities to speed this up (and the K-line Northern Extension) we should absolutely pursue them. I also look forward to seeing more automatic trains with world-class runtimes added throughout the Metro system.

I oppose Item 33 - SB-79 is law in California, and it makes Metro look absurd to ask for an exemption for L.A. County. In fact, if Metro embraced SB-79 and more housing was built around Metro stops, it would lead to higher ridership of the system. Los Angeles is facing a historic, self-inflicted housing crisis that is particularly affecting young families and homeowners like me. Opposing SB-79 is irresponsible, backwards, and embarrassing. We need more dense housing around transit, and Metro of all organizations should support that goal.

Thank you,
Kiersten Stanley

Dear Metro Board Members & Holly Mitchell (our representative),

We are writing to express our support for several critical policy and project decisions that will shape the long-term effectiveness, equity, and sustainability of Los Angeles County's transit system. Specifically, we wish to:

1. support extending the C Line along the existing freight railroad right-of-way,
2. express opposition to Metro's current stance opposing SB-79, and
3. strongly support the use of heavy rail for the proposed Sepulveda Transit Corridor.

Item 11 - Support for the C Line Extension via the Freight Right-of-Way

Extending the C Line by utilizing the existing freight railroad right-of-way represents a pragmatic, cost-effective, and community-sensitive approach to expanding high-capacity transit. Reusing an established corridor minimizes displacement, reduces environmental impacts, shortens delivery timelines, and lowers right-of-way acquisition costs. It also makes use of infrastructure that has long been designated for transportation purposes, aligning with best practices in urban rail planning.

While some opposition has been raised by a relatively small number of nearby residents, it is important to recognize that this corridor has been actively used for freight rail operations for decades. Individuals who chose to purchase or rent property adjacent to this right-of-way did so with the knowledge that it was an existing transportation corridor with ongoing rail activity. Adapting such corridors for passenger rail, often with quieter, cleaner, and more predictable operations than freight, represents an incremental and reasonable evolution of land use rather than a fundamentally new intrusion that will displace dozens of businesses and homes.

Allowing a minority opposition to derail or significantly delay projects that rely on long-established transportation corridors risks setting a precedent that undermines the region's ability to deliver critical infrastructure. The broader public benefits of improved mobility, reduced congestion, far more cost savings, enhanced regional connectivity, and lower greenhouse gas emissions should remain the guiding criteria for decision-making, particularly when impacts are mitigated and displacement is avoided.

Opposition to Metro's Opposition of SB-79

We are concerned by Metro's opposition to SB-79, which would promote transit-oriented development near high-quality transit corridors. Aligning land use with transportation investments is essential to achieving Metro's stated goals of increasing ridership, reducing vehicle miles traveled, and meeting climate targets. SB-79 would help ensure that public investments in transit are supported by housing and job density, improving system efficiency and rider convenience while addressing the region's severe housing shortage. Rather than viewing this legislation as a constraint, Metro should see it as a complementary tool that strengthens the long-term return on transit investments and supports more livable, walkable communities.

Item 10 - Support for Modified Alt 5 Heavy Rail on the Sepulveda Transit Corridor

Finally, we strongly support the use of heavy rail for the Sepulveda Transit Corridor, and specifically the Modified Alt 5 alignment. This corridor represents one of the most congested travel paths in the nation and demands a solution that offers true grade separation, high speed, and high passenger capacity. While alternatives (or heaven forbid a no-build) may appear less expensive in the short term, they risk becoming inadequate almost immediately upon opening. Heavy rail provides the reliability, scalability, and long-term value necessary to justify the scale of public investment and to meaningfully compete with automobile travel. Given the corridor's strategic importance, this is a case where building the right solution matters more than building the cheapest one.

Closing

Los Angeles has a rare opportunity to make transformative, forward-looking transit decisions that will shape mobility patterns for generations. We urge the Board to prioritize long-term performance, integration, and public value by supporting the C Line extension via the freight right-of-way, reconsidering its opposition to SB-79, and committing to the modified alt 5 heavy rail for the Sepulveda Transit Corridor.

Thank you for your time, leadership, and continued service to the residents of Los Angeles County.

Respectfully,

To the LA County Metro Board,

As a resident of Los Angeles County, frequent commuter of SoCal, and advocate of improving public transit, I urge you all to consider the following:

> **Item 11:** As a Los Angeles County resident who relies on and strongly supports the expansion of public transit, I support Item 11 and strongly oppose the last-minute attempt in Item 11.1 to derail the C Line Extension to Torrance by giving in to NIMBY pressure. Metro already owns the right-of-way, and shifting course now would delay this long-needed project for years, add roughly $700 million in costs, and ultimately reduce ridership. Please follow staff's recommendation and vote **no**on Item 11.1.
>
> **Item 10:** I support Item 10 and urge you to approve staff's recommendation for the Modified Alternative 5 route for the Sepulveda Transit Corridor. This project is essential for improving mobility, reducing congestion, and connecting communities across Los Angeles County.
>
> **Item 33:** I oppose Item 33. SB-79 is the law in California, and asking for an exemption for Los Angeles County sends the wrong message at a time when we should be encouraging smart growth around transit. Embracing SB-79 and allowing more housing near Metro stations would strengthen our transit system by increasing ridership and making these investments work better for the people who depend on them.

I sincerely look forward to seeing you all do what is in the best interest of all residents and workers in LA County. Thank you for your consideration.

Very Respectfully,

Tom Rodriguez

Hello Metro Board,

I urge you to vote in favor of the Sepulveda Modified Alt 5 and Torrance Hybrid ROW options as the LPA for either project. I have friends in the Valley and the Sepulveda line would be transformative in being able to connect two previously hard-to-reach areas (without a car). I also hope that the current hybrid alignment for the K Line to Torrance will be approved. Having the South Bay connected to the rest of LA's rail network (AS SOON AS POSSIBLE) would be such a no-brainer economic boon and allow people more options on where to work and live. Accepting the plan along Hawthorne would be much more expensive for little benefit, and is something I would not want to see my tax dollars spent towards (for more studies, EQAs, and loads of mitigations). Unlike other projects, there is funding and a concrete plan for the Hybrid ROW to Torrance, and I urge the Metro Board to capitalize on this.

Lastly, I hope you reconsider the measure to oppose SB 79. There is already an acute housing shortage in LA and any attempt to water down housing density provisions would only exacerbate this issue. I grew up in LA and love this city, and I want to keep living in this city, but the cost of housing and living make it difficult to be able to stay; I know I am not alone in this sentiment. With local governments historically doing little in the way of building enough housing units, let alone affordable ones, I think reverting back from state to local control over zoning is a massive mistake that would only serve to hinder your objectives of expanding your ridership base and providing high quality transit services for everyone in the Greater LA area by driving people away from your service area.

In conclusion, I want to remind the Metro Board of who you serve. Los Angeles is the second largest city in the US, not some quaint suburb that some people try to vocally say otherwise. In terms of public transit infrastructure and ridership, LA embarrassingly falls behind other "global" American cities, such as New York, Chicago, San Francisco, and D.C.. Building as much transit infrastructure as possible, and getting people to use that infrastructure, should be your main goals if you are to provide world class transit. Therefore, by advancing the current plans for our rail expansions and retaining the commitment to upzoning transit corridors is of utmost priority in my opinion to be able to achieve those goals.

Thanks,
Aaron

Hello Metro Board,

For item # 2025-1062, though I was and still am in favor of Alt 4, if that is not an option I am For the proposal in order to support high quality, high capacity transit between the valley and the Westside.

For item # 2025-0818, I am For it as well in order to further expand transit to the South Bay and set the stage to expand the line to Long Beach.

For item # 2026-0037, I am Against it, as the Hawthorne option will likely come with so many construction difficulties that it will potentially jeopardize the project.

For item # 2025-0985, I am For it, in order to further support the financing of Measure M programs.

For item # 2026-0035 I am For this proposal as well, as reforming the LA Metro Board to better reflect the Counties overall transit needs as opposed to the concerns of a few NIMBY's is a must.

For item # 2025-1028, I am For this proposal as well, in order to ensure Phase 2B2 of the A Line Extension to Montclair is achieved.

For item # 2025-1081, I am For this proposal as it will expand access and public participation in transit governance in critical and necessary ways.

For item # 2025-1033, I am For the proposal in order to ensure a diversity high quality transit information and travel systems for the benefit of riders.

For item # 2025-1053, I am Against the measure, as the measure is a futile attempt at avoiding necessary housing improvement the City's and County desperately need.

Thank you so much.

To members of the Metro Board,

With regards to the section noted *A benchmarking analysis of peer transit agencies of comparable size, scope, and governance complexity, including a summary of each agency's governing board composition, appointment or selection structure, voting authority, and any relevant statutory or local governance provisions*, I would like to point out that:

- **LA County is the largest and most populous county in the United States** so there are no "peer transit agencies of comparable size, scope and governance complexity" within our nation
- If one were to look at anyone who has the size, population, and complexity, **we must look outisde the United States for comparison**.
- When looking at geographic size and population served, there's only few metropolitan areas in the entire world where it comes close to the needs of Los Angeles:
    - Tokyo Metropolitan Area (approx 5200 sq mi with pop of 38 million)
    - Seoul Metropolitan Area (approx 5300 sq mi with pop of 26 milion)
    - London Metropolitan Area (approx 3400 sq mi with pop of 15 million)
    - Paris Metropolitan Area (approx 7300 sq mi with pop of 13 million)
    - Los Angeles County (approx 4000 sq mi with pop of 9.7 million)
    - Taipei Metropolitan Area (approx 1000 sq mi with pop of 7 million

There is no point in trying to compare ourselves to places like New York, San Francisco, St. Louis or Kansas City, nor are we like Frankfurt, Stockholm, Vienna or Luxembourg either, which are vastly smaller either area size or population.
Los Angeles County, which LA Metro serves, sits somewhere along London and Tokyo and Seoul in terms of land size, and between Taipei and Paris in terms of population size.

Hence, I urge the Metro Board that if we're to have a great transit system, we need to look at the governance and adopt practices of peer transit system that best reflects the realities of LA County.
If that means there are no relatable peers in the US, we need to look beyond our borders to see what metropolitan areas best matches what the needs are for LA County.

Thank you

Ken Wakita

Hello Metro Board,

For item # 2025-1062, though I was and still am in favor of Alt 4, if that is not an option I am For the proposal in order to support high quality, high capacity transit between the valley and the Westside.

For item # 2025-0818, I am For it as well in order to further expand transit to the South Bay and set the stage to expand the line to Long Beach.

For item # 2026-0037, I am Against it, as the Hawthorne option will likely come with so many construction difficulties that it will potentially jeopardize the project.

For item # 2025-0985, I am For it, in order to further support the financing of Measure M programs.

For item # 2026-0035 I am For this proposal as well, as reforming the LA Metro Board to better reflect the Counties overall transit needs as opposed to the concerns of a few NIMBY's is a must.

For item # 2025-1028, I am For this proposal as well, in order to ensure Phase 2B2 of the A Line Extension to Montclair is achieved.

For item # 2025-1081, I am For this proposal as it will expand access and public participation in transit governance in critical and necessary ways.

For item # 2025-1033, I am For the proposal in order to ensure a diversity high quality transit information and travel systems for the benefit of riders.

For item # 2025-1053, I am Against the measure, as the measure is a futile attempt at avoiding necessary housing improvement the City's and County desperately need.

Thank you so much,
Oliver Mather

To whom it may concern ;
As someone who lives in a nice townhome complex off Ruxton Lane in N. Redondo Beach I'm writing to voice my strong opposition to the proposal to run the new metro link line along side the existing freight rail line . The freight trains 3x/day are bad enough as the are literally 50 ft. From our doors . 8 yrs. of noisy construction not to mention a couple hundred very noisy commuter trains / day on top of that is and would be extremely detrimental to our quality of life !!
This route option will have serious ramifications to property values for owners and renters if it it built along the existing rail lines . I envision potential lawsuits to stop this option for a route from property owners I've spoken with about this issue .

Hello -

I am a resident of CD-4 and strongly in favor of expanding the Metro line from the Valley to Santa Monica. A public access corridor along the 405 would be life changing! Please do whatever you can to help make this happen for all the citizens of LA. We'd all love to use public transportation more.

To the Attention of the Board Clerk:

Please find attached a **sworn Declaration** regarding systemic safety and sanitation failures observed along the Cahuenga Boulevard transit corridor (specifically the Universal City transit point at 3300 Cahuenga Blvd).

I request that this document be:

1. **Distributed** to all members of the Board of Directors prior to the upcoming meeting on Thursday, January 22, 2026.

2. **Entered formally** into the public record as written testimony regarding **General Public Comment** (or specific Agenda Item number, if applicable).

This declaration serves as official notice of non-performance and a demand for specific remedial action regarding the deteriorating conditions in this district.

Respectfully,

Daniel Ochoa

NOTICE OF NON-PERFORMANCE AND COMMUNITY IMPACT STATEMENT

SENT VIA ELECTRONIC TRANSMISSION AND U.S. MAIL

CAPTION OF NOTICE

Metro Report ID: 932396

Item	Details
Recipient	**LACMTA Board of Directors** One Gateway Plaza, Los Angeles, CA 90012
Copy To	**Los Angeles City Council Public Safety Committee** 200 N. Spring Street, Los Angeles, CA 90012
Claimant	**Daniel Ochoa** Community Stakeholder / Transit Patron
Subject Property	**Universal City Transit Hub** 3300 Cahuenga Blvd (Metro Route 222 Stop: Cahuenga/Oakshire)
Incident Date	January 17, 2026
Nature of Filing	Evidence of Systemic Governance Failure; Petition for Specific Performance; Demand for Restoration of Public Right of Way.

EXECUTIVE SUMMARY

TO THE HONORABLE BOARD AND COUNCIL:

This correspondence serves as formal notification that the safety protocols and maintenance standards mandated for the Universal City Transit Hub have collapsed. The incident detailed herein—occurring on the morning of January 17, 2026—is not an isolated criminal occurrence but a **contextual indicator of systemic administrative failure**.

The evidence attached to this notice demonstrates that the Metro Authority and City Safety Oversight have effectively surrendered the Public Right of Way at 3300 Cahuenga Blvd. The failure to enforce basic penal and health codes has resulted in a de facto "zone of exception" where narcotics trafficking and severe human incapacity are tolerated, in direct violation of the Authority's Duty of Care to its patrons. This document codifies these failures into three specific "Partidas" or divisions of grievance and outlines the necessary remedies to restore the rule of law.

TABLE OF AUTHORITIES CITED

The following statutes constitute the legal framework governing the "Duty of Care" and "Public Right of Way" referenced in this petition. The failure to enforce these codes serves as the basis for this Notice of Non-Performance.

Citation	Statute Title	Relevance to Incident
Health & Safety Code § 11364(a)	Possession of Drug Paraphernalia	Subject observed possessing and using a glass pipe for narcotics ingestion.
Penal Code § 647(f)	Public Intoxication / Incapacity	Subject found in a condition unable to exercise care for own safety (prone, barefoot in hazardous heat).
Penal Code § 647c	Obstruction of Public Way	Subject willfully blocked the free movement of patrons in the designated boarding zone.
Penal Code § 370	Public Nuisance	Subject's conduct (fumes, obstruction) interfered with the comfortable enjoyment of public property.
Metro Code § 6-05-100	Customer Code of Conduct	Violation of zero-tolerance policies regarding loitering and consumption of controlled substances.
Welf. & Inst. Code § 5150	Involuntary Detention (LPS Act)	Criteria for protective custody when a subject is "gravely disabled" and unable to provide for personal safety.

MEMORANDUM OF SYSTEMIC FAILURE

DATE: January 17, 2026 **FROM:** Daniel Ochoa, Community Stakeholder **SUBJECT:** EVIDENCE OF SYSTEMIC FAILURE: Unabated Narcotics Trafficking and Human Incapacity at Universal City Transit Hub.

PREAMBLE: THE CHARGE OF NON-PERFORMANCE

Formal Statement: The Community Stakeholder hereby asserts that the Los Angeles County Metropolitan Transportation Authority (LACMTA) and the Los Angeles Police Department (LAPD) have failed to maintain the "Duty of Care" and preserve the "Public Right of Way" at the Cahuenga/Oakshire transit stop.
Basis: The specific incident documented on this date demonstrates that existing Penal Codes and Health & Safety statutes are not being enforced. This non-enforcement constitutes a passive acceptance of public hazards, resulting in the surrender of public space to unregulated narcotics activity and the exploitation of vulnerable populations.

PARTIDA I: THE EVIDENCE OF PHYSICAL COLLAPSE

Title: On the Abandonment of the Vulnerable
The Facts (The Observable State): At approximately 0930 hours, an adult male subject was observed in a state of severe physical neglect. The subject was barefoot, lying prone on a blanket

directly within the designated boarding zone, and exposed to direct sunlight on concrete without attempt to seek shade. The subject physically obstructed the ingress and egress of transit patrons.
The Systemic Implication: The continued presence of an individual in this state of incapacity—a clear violation of **Penal Code § 647(f)** (Public Intoxication/Inability to Care for Safety)—confirms a critical failure of municipal social safety nets and patrol efficacy.

1. **Failure of Patrol Frequency:** That a subject could reach this level of exposure and obstruction suggests a lack of consistent security presence at a major transit node.
2. **Failure of Intervention:** The state of being barefoot and prone in a hazardous zone warrants immediate protective custody for the subject's own survival, yet the system permitted the neglect to continue until witness intervention.

PARTIDA II: THE EVIDENCE OF UNRESTRICTED TRAFFICKING

Title: On the Toleration of Narco-Terrorism Indicators
The Facts (The Chemical Act): Upon the approach of emergency vehicles (fire apparatus) and the sounding of sirens, the Subject produced a "straight pipe" (glass paraphernalia) and ignited it. The Subject proceeded to inhale and subsequently exhale noxious fumes into the immediate vicinity of waiting passengers.
The Systemic Implication: The open consumption of narcotics—a violation of **Health & Safety Code § 11364(a)**—serves as a visible metric of governance failure.

1. **Contextual Indicator:** Public consumption is not merely "use"; it is a signal that the local supply chain for illicit substances is operating without restriction.
2. **Exploitation of Space:** The transit hub has been allowed to devolve into a node for human exploitation. The subject, clearly addicted and incapacitated, is a victim of a trafficking system that the Authority has failed to disrupt. The tolerance of this act in broad daylight signifies that the location is viewed by criminal actors as a "safe harbor" from enforcement.

PARTIDA III: THE PETITION FOR RELIEF

Title: On the Restoration of Order and Safety
To remedy these grievances and restore the Public Trust, the Stakeholder demands Specific Performance on the following items:
1. Demand for Audit (Transparency): A comprehensive audit of security patrol logs for the 3300 Cahuenga Blvd hub for the preceding 90 days. The Community requests an explanation for the persistence of these conditions despite the budget allocated for transit security.
2. Demand for Enforcement (Restoration of Right of Way): Immediate and consistent enforcement of **Metro Code § 6-05-100**. The boarding zone must remain clear for transit users. The policy of "passive observation" must be replaced with active abatement of nuisance conditions.
3. Demand for Protective Custody (Humanitarian Intervention): Utilization of involuntary hold protocols (**Welfare & Institutions Code § 5150**) for subjects demonstrating "barefoot/prone" incapacity. The current policy of allowing incapacitated individuals to "loiter" until they commit a violent crime is inhumane. We demand intervention that prioritizes life-saving protective custody over passive neglect.

DECLARATION

DECLARATION OF DANIEL OCHOA REGARDING: Systemic Safety and Sanitation Failures – Cahuenga Boulevard Corridor DATE: January 17, 2026

I, Daniel Ochoa, hereby declare the following to be true and correct:

1. On January 17, 2026, at approximately 0930 hours, I was present at the designated transit boarding point at 3300 Cahuenga Blvd, a central artery of the Universal City district.

2. I observed a male subject lying prone on the pavement, directly obstructing the public right-of-way. The subject was barefoot, exposed to direct sunlight, and unresponsive to verbal offers of assistance. His condition demonstrated an observable incapacity to care for his own safety, a clear violation of Penal Code § 647(f).

3. Upon the approach of emergency vehicles, I witnessed the subject produce a glass pipe and inhale a substance, releasing noxious fumes into the crowd. This open usage occurred without fear of intervention, serving as a microcosm of the lawlessness that now pervades the entire Cahuenga Boulevard transit corridor.

4. I declare that this incident is not an anomaly, but evidence of a district-wide breach in the Duty of Care. The Authority has allowed this commercial and transit sector to deteriorate into an unregulated zone of human exploitation and public hazard, abandoning both the vulnerable and the commuting public.

5. I submit this declaration to demand specific performance: a comprehensive audit of patrol logs for the Cahuenga District and the immediate enforcement of Metro Code § 6-05-100 to restore order to this vital municipal thoroughfare.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on January 17, 2026, at Los Angeles, California.

FAR EAST
LANDSCAPE &
MAINTENANCE INC.

January 14,2026

The Honorable Fernando Dutra Board Chair
Los Angeles County Metropolitan Transportation Authority (Metro)
One Gateway Plaza
Los Angeles, CA 90012-2952

Subject: Unresolved Protest
[redacted] – Graffiti Abatement Services

Dear Mr. Dutra:

My team and I filed a timely protest to the subject RFP, which was denied on 12/04/2025. We then filed an appeal on 12/10/2025, and, to date, we have not received a response to our appeal from Metro.

When we received the denial of our protest, we were quite disappointed in Metro's incomplete analysis of the DEOD Set-Aside Program parameters of the subject RFP. However, given the history of this RFP, an incomplete analysis was to be expected.

1. Small Business Set-Aside Program versus Medium Business Set-Aside Program

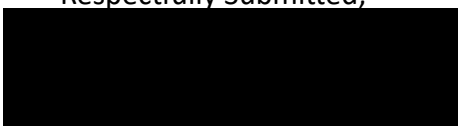
According to the applicable state statute, Metro is required to use the "expected expenditure" for each contract, up to the five-year term that Metro utilized for award purposes in determining which Set-Aside program would be used. Despite this legal requirement, this procurement used the Independent Cost Estimate – but only the estimated amount for the three-year base period. This error resulted in the RFP being released as a Small Business Set-Aside rather than the statutorily required Medium Business Set-Aside.

2. Evaluation Missteps During the RFP Process

During the evaluation process for the current RFP, an evaluator's scores were omitted from the scoring of the proposals. This omission was not discovered during the recommendation awardee phase nor was it discovered when a protest and appeal were submitted and were both denied. These failures certainly call into question the integrity of the procurement process.

Based upon the above, my team and I are requesting that this RFP be canceled, all award recommendations be rescinded, any contracts be terminated, and the RFPs made smaller to be appropriate as a true small business set-aside contract.

Respectfully Submitted,



Tony Moon
President
Far East Landscape and Maintenance, Inc.

AVNC Officers: Co-Chairs: Brent Pritchett, Danielle Bond • Treasurer: Anthony Forester • Secretary: Will Lentz

To: Supervisor Hilda Solis

Cc: Mayor Karen Bass, Councilmember Hugo Soto-Martinez, Metro Board

Date: Jan 8, 2026

RE: Metro LA River Bike Path proposed for the 8-mile gap along the LA River between Elysian Valley and the City of Vernon

Dear Supervisor Solis,

We are writing to urge you, in your role as an LA Metro Board member, to support two critical actions that will finally allow the completion of the LA River bike path through central Los Angeles by 2028:

1) Adopt a Bottom-of-Channel design.
2) Create a Joint Powers Authority solely focused on delivering this project by 2028.

This project is not only long overdue — it is **transformative for mobility, green commuting**, **equity, public health**, and our region's readiness for the **2028 Olympic and Paralympic Games**.

Connect the River and get this project done.

Metro currently has approximately $400 million in Measure M funding dedicated to closing the 8-mile gap in the LA River bike path between the Arroyo Seco and Vernon. As outlined in recent analyses, this is more than enough to build an **in-channel/bottom-of-channel path** that would be rideable roughly 350 days per year and would not reduce the channel's water-carrying capacity, improving biking commutes throughout the year.

Unfortunately, Metro has only considered above-channel alternatives costing more than $1.1 billion — *nearly triple the available funding* — and has stated publicly that they cannot deliver the project by 2028 under those designs. Arroyo Seco successfully implemented Bottom-of-Channel designs in order to increase access. The status quo is limited in length and requires riders to cross over dangerous, high traffic roads.

To ensure this vital connection is completed on time, we respectfully ask you to support the following:

- **Adopting a Bottom-of-Channel design** that can be built with existing funds and provides a safe, dedicated, car-free corridor for people biking, walking, and rolling. This design offers enormous benefits for low-income communities that rely on affordable

transportation options and would dramatically improve access to jobs in Downtown Los Angeles from Atwater Village. This will also streamline the number of permitting agencies and entities.

- **Creating a Joint Powers Authority solely focused on delivering this project by 2028**. As demonstrated nationwide, independent agencies dedicated to a single piece of infrastructure are far more effective at expediting construction and maintaining accountability. We believe a JPA is crucial regardless of what design is selected.

Completing this segment of the LA River bike path will unlock a continuous regional corridor, expand access to parks and open space, reduce emissions, and strengthen our sense of place along the river. It will also serve as a cornerstone of the **Festival Trail**, ensuring that residents and visitors alike can experience Los Angeles on foot, by bike, and through transit during the 2028 Games.

This is a rare opportunity to deliver a project that is cost-effective, equitable, environmentally beneficial, and deeply aligned with our region's long-term goals. We hope you will champion these two actions and help ensure that the LA River bike path becomes a reality for the communities that need it most.

Thank you for your leadership and for considering this request.

Sincerely,

[redacted]

Danielle Bond
Co-Chair
