

254 Stations and Stops for Countywide First/Last Mile Planning

To determine the 100 top ridership bus stops, staff first identified the 100 top ridership bus stop areas per the ATSP that were located outside half-mile radius of Metro rail, BRT and regional rail stations. The ATSP bus stop areas, identified by intersection, actually include multiple bus stops within a 300-foot radius of the intersection. The ridership for the bus stop area is the total combined ridership for all the bus stops within the radius of the intersection. Additionally, individual bus stops were ranked by ridership. From the 100 top ridership individual bus stops, there were two stops not already included in the 100 bus stop areas. To respond fully to the board motion, those two bus stops are also included with the top 100 ridership bus stop areas. The result is 102 bus stops and bus stop areas.
